

PART II

ATTACHMENTS AND OPERATIONAL DATA

WASTE TIRE COLLECTION FACILITY **(Generator Sites)**

Please submit the following information as a part of the application for a generator waste tire collection facility. For purposes of this application, a generator waste tire collection facility is a site operated by businesses that generate waste tires in the normal course of their operations (Examples include: tire retailers, salvage yards, and other waste tire generators). Such businesses that propose to store more than 500 waste tires on-site at any time must complete this application and obtain authorization. This authorization does not allow the collection and storage of waste tires generated from other businesses at the site. (Note: We request that all information be typewritten).

A. Property Information and Map

1. Attach a legal description of the business property.
2. Attach a City, County, or United States Geological Survey (USGS) topographical quadrangle map of the area which shows the property boundaries of the business site, the storage areas within the property boundaries and the location of the site in relation to the City or County. The map may be a high quality photocopy.
3. Attach a list of the complete names and addresses of the immediately adjacent property owners to the site and the current uses of the adjacent property.

B. Local Government Regulations

Attach a letter or other documentation from the appropriate county or city official confirming that the storage of waste tires at your business site will be in conformance with all local laws, regulations, and ordinances, or that no such laws, regulations, or ordinances are applicable.

Prior to the operation of a generator waste tire collection facility, it is the responsibility of the operator to confirm that the operation will be in conformance with all local laws, regulations, and ordinances. This confirmation must be obtained from the appropriate county and/or city officials in which the business is located.

C. Plan of Operation

A plan of operation for the storage area should be submitted including:

- a. A description of the day to day business operations at the site including an explanation of why it is necessary to store numbers of tires at this site.

- b. A description of how the storage requirements of Section C.2 and C.3 of the Waste Tire Management Regulations will be met with regards to whole waste tires and Section C.6 (if applicable) of said regulations with regards to reusable tires separated for resale/retread.
- c. The maximum amount of whole tires proposed for storage on-site at any given time.
- d. Upon review of the plan of operation by the Department, documentation of compliance with the financial responsibility requirements of Section F of the Waste Tire Management Regulations may be required for the operation of a generator waste tire collection facility. For certain sites, exemptions to these requirements may be granted by the Department.
- e. A fire prevention plan and information demonstrating that the local fire prevention officials have been notified of the proposed tire storage area at your business site.
- f. A mosquito prevention control plan such as details of routine fogging or other appropriate mosquito control measures.
- g. The days and hours of operation of your business.
- h. Details of all waste tire transportation activity away from the business site including the name and identification number of the waste tire hauler(s) transporting tires from the site. If the applicant is conducting the transportation activity, then provide the hauler identification number and the name under which registration was obtained with the Department.
- i. The name and address of the authorized processing and/or disposal facilities to which the waste tires will be transported and attach a copy of an executed contract or other written agreement with the waste tire hauler transporting the tires, with the authorized processing facility which will be accepting the tires or with the authorized mobile tire processor who may be processing them on site. If the tires are processed on site by a mobile tire processor, then documentation of a contract or agreement with an approved solid waste landfill/waste tire recycling facility for acceptance of the processed tires should be provided.

D. Siting Requirements for Waste Tire Collection Facilities

The following siting requirements apply to outdoor storage facilities only (Note: For purposes of this application, an outdoor facility is any facility where the storage activity involving waste or reusable tires is not adequately enclosed within a walled and roofed structure):

**Generator Waste Tire Collection Facility
Permit Application
Page 3 of 4**

1. Is the proposed tire storage area located within the 100 year floodplain?

_____ yes _____ no

If yes, attach a demonstration that the facility will not restrict the flow of the 100 year flood, reduce the temporary water storage capacity of the floodplain, or result in washout of waste tires from the facility.

2. Will the proposed storage area at your business be located within 250 feet of the banks of any river, stream, lake, reservoir, or coastal water?

_____ yes _____ no

3. Will the tire storage area be located in an area which may result in recurring washout of waste tires, such as within or along the banks of a drainage ditch channel or basin, or other surface water drainage area?

_____ yes _____ no

4. Is the proposed storage area located within 0.5 miles of a national, state, county, or city designated park or an outdoor recreational area, such as a golf course or swimming pool, owned by a city, county, or other public agency?

_____ yes _____ no

If yes, attach a letter from the person or agency responsible for managing the park or recreational area consenting to a smaller setback distance.

5. Is the tire storage area at your business located within a national forest land, a national wilderness area, or national wildlife refuge area, as designated by the appropriate federal agency?

_____ yes _____ no

6. Is the tire storage area at your business located within a state wildlife management area, state game management area, or state natural area, as designated by the Mississippi Department of Wildlife, Fisheries, and Parks?

_____ yes _____ no

If yes to either, attach written consent for the proposed processing operation from the agency responsible for managing such area.

7. Is the tire storage area at your business located within 0.5 miles of any licensed school, licensed day-care center licensed hospital, or licensed nursing home, or within 1000 feet of any church?

_____ yes _____ no

If yes, attach a letter from the person, group or agency, which owns or operates the facility, consenting to a smaller setback distance.

8. Is the setback distance between the storage areas and the property lines surrounding your business less than 200 feet on any side?

_____ yes _____ no

Is the setback distance between the processing/storage areas and the property lines less than 50 feet on any side? (indoor facilities)

_____ yes _____ no

If yes, attach documentation of compliance with Section III.T.2 - Property Line Setbacks of the Mississippi Nonhazardous Waste Management Regulations.

The following siting requirements generally apply to both indoor and outdoor waste tire generator collection facilities:

Upon evaluation of the appropriate siting information provided in this application, the Department may require additional documentation to demonstrate compliance with applicable state and federal rules and regulations. This may include documentation from the U.S. Army Corps of Engineers regarding wetland determination, and the U.S. Fish and Wildlife Service and the Mississippi Department of Wildlife, Fisheries and Parks, regarding federally or state listed endangered or threatened species, and the Mississippi Department of Archives and History, regarding possible impacts to any cultural resource listed or eligible for listing in the National Register of Historic Places.
