MISSISSIPPI DEPARTMENT OF ENVIRONMENTAL QUALITY
GARY C. RIKARD, EXECUTIVE DIRECTOR

**Mississippi Department of Environmental Quality (MDEQ)
Available Solid Waste Management Facilities in
Flood Impacted Counties
(July 31, 2019)**

This information has been prepared by MDEQ to assist in responding to the damage needs from the recent severe flooding in counties in the State of Mississippi along the Mississippi River and its tributaries. The high impact areas of the flooding have been currently identified to include those counties directly along the Mississippi River and its tributaries and those off these waterways that may be prone to flooding. There are several existing solid waste management facilities in these areas that may be available for disposal of flood debris subject to the operating conditions of the facility, the type of debris to be disposed and the approval of the site operator. Also, solid waste facilities that exist in counties adjacent to those high impact areas and in other counties impacted by the storm have been listed as well. For contacts and information on solid waste management facilities in counties not listed in the attached information, visit our website at: <https://www.mdeq.ms.gov/wp-content/uploads/2017/06/ActiveFacilityListing.pdf> or contact the MDEQ Waste Division at 601-961-5171.

The solid waste facilities identified on the attached listings can accept certain approved solid waste materials as follows:

Municipal Solid Waste (MSW) Landfills: The MSW landfill sites are approved to accept all household garbage, mixed building debris, vegetative debris, commercial wastes, office wastes, packaging wastes and any other nonhazardous solid waste.

Class I Rubbish Sites: Class I rubbish sites are approved to accept all rubbish wastes and building and structural debris such as brick, wood, metal, concrete, roofing, siding, furniture, carpet and other types of building debris. The sites can also accept all class II rubbish such as vegetative wastes and inert debris. The sites cannot accept household garbage, household chemicals and certain industrial wastes for disposal.

Class II Rubbish Sites: Class II rubbish sites are approved to accept vegetative wastes and inert debris such as concrete and brick that can be separated from other building debris. The sites cannot accept mixed building debris, household garbage or household chemicals.

MDEQ may also be evaluating and approving temporary storm debris management sites in the affected counties that are not included on the attached listing of permanent permitted solid waste facilities. Additional information on these sites is forthcoming.

Impact Areas

(Yazoo, Holmes, Washington, Warren, Sharkey, Issaquena, Humphreys)

Municipal Solid Waste Landfills

Big River Landfill
BFI Waste Systems of Mississippi, LLC
Contact: Shayne Haseloff, Operator
52 Landfill Road
Leland, MS 38756 (Washington County)
