

To Schedule the Certification Test(s)

One of the requirements for certification to install, repair, or remove underground storage tanks is to take the certification test and make at least 75% on the test. The certification test for installers, repairers, and/or removers is offered on a first come first served basis. The test is given in Jackson, Mississippi, at the office of the Mississippi Department of Environmental Quality. Registration is required before taking the test. If you need to schedule to take the test call (601) 961-5282.
