INTRODUCTION

The Mississippi Department of Environmental Quality (MDEQ) developed this status report to provide information on solid waste disposal activities that were conducted during Calendar Year 2004 at all permitted landfills and rubbish sites within the State of Mississippi. An annual report on the solid waste disposal activities conducted at each landfill and rubbish site in the state is due to MDEQ from the facility owner each year by February 28th. This status report provides summary information on the amounts of solid waste disposed at both commercial and non-commercial disposal facilities as listed below:

Part I - Commercial Solid Waste Disposal Facilities

Part I of this report contains a summary report on disposal activities conducted at commercial disposal facilities in the state. A commercial solid waste disposal facility means any facility that is engaged in the disposal of solid waste for compensation or which accepts waste from more than one generator not owned by the facility owner. Commercial solid waste disposal facilities include:

- Municipal Solid Waste (MSW) Landfills
- Non-Municipal Solid Waste (non-MSW) Landfills
- Class I and Class II Rubbish Sites

Part II - Non-Commercial Solid Waste Disposal Facilities

Part II of this report contains a summary report on disposal activities conducted at non-commercial disposal facilities. A non-commercial solid waste disposal facility means a facility that receives solid waste from one generator and where the disposal facility is not operated for compensation. Non-commercial solid waste disposal facilities include:

- Industrial and Institutional Landfills
- Industrial and Institutional Rubbish Sites

This status report contains information that may be utilized by local government officials and/or solid waste decision makers, disposal facility owners and operators, state agencies, and other organizations. The information provided includes the following:

1. The total amount of waste received at each permitted solid waste disposal facility as reported by the facility owners/operators;
2. An estimated remaining life at solid waste disposal facilities as reported by the facility owners/operators; and
3. State maps showing the locations of each disposal facility.

Copies of this report will be provided to local government officials and/or solid waste decision makers to assist them in planning for the management of solid wastes in their jurisdictions. A

copy of this status report will also be provided to the Mississippi State Tax Commission for verification of the information that the State Tax Commission receives from commercial facility owners/operators each year.

The annual reports indicate that a total of approximately 6,711,084 tons of solid waste was disposed during Calendar Year 2004 at commercial and non-commercial landfills and rubbish sites in Mississippi. Approximately 46.5% (3,119,614 tons) of the total waste was disposed at commercial landfills, 43.1% (2,891,809 tons) at non-commercial landfills, 10.2% (685,333 tons) at commercial rubbish sites, and 0.2% (14,328) was disposed at non-commercial rubbish sites (see Figure: 1 below).

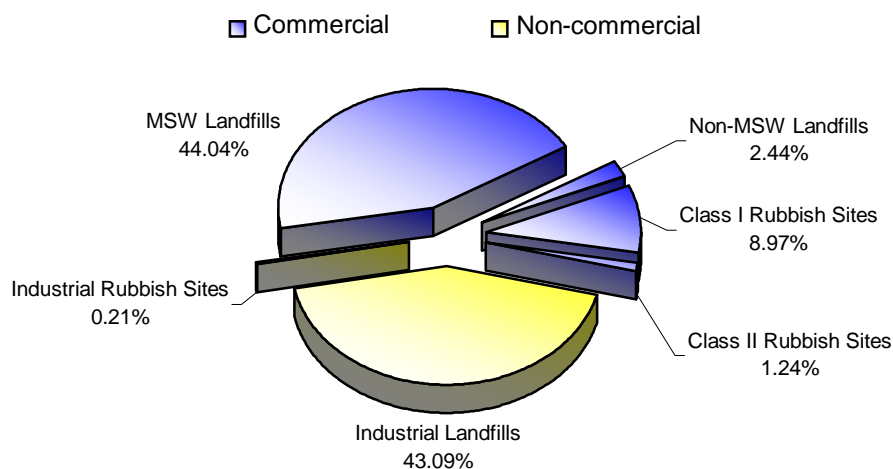

Figure: 1

This status report also indicates that Mississippi received a total of 724,436 tons of solid waste from out-of-state sources representing approximately 11% of the total solid waste that was disposed in Mississippi during Calendar Year 2004. Commercial landfills received approximately 647,452 tons and commercial rubbish sites received approximately 76,984 tons of out-of-state waste.

The information on the total amount of wastes received in tons/year at landfills and rubbish sites has not been verified or altered by the MDEQ for accuracy. For additional information on this Status Report or to review the individual facility annual reports, please contact:

Mr. Pradip Bhowal, Environmental Administrator
MDEQ Solid Waste Policy, Planning & Grants Branch

PART I

**COMMERCIAL SOLID WASTE
DISPOSAL FACILITIES**

Municipal Solid Waste (MSW) Landfills

Municipal Solid Waste (MSW) Landfills are disposal facilities that are designed and constructed to receive a wide range of nonhazardous solid wastes for disposal including household garbage, nonhazardous industrial wastes, and special wastes such as asbestos or treated medical wastes. There were seventeen (17) MSW landfills that operated in the state during Calendar Year 2004. According to the annual reports submitted by the owners/operators, these landfills received a total of 2,955,590 tons of solid waste during Calendar Year 2004.

The annual report on the solid waste disposal activities conducted at each MSW landfill is required by the Mississippi Code Annotated Section 17-17-219 (Supp. 2004) and Section IV.B.14 of the Mississippi Nonhazardous Waste Management Regulations. This report contains a summary of these individual facility reports as provided by the facility owners. The report includes the following information:

1. A state map showing the GIS locations of MSW landfills;
2. A summary of operational information contained in the individual annual reports for Calendar Year 2004 for MSW landfills; and
3. Individual state maps for the 17 active MSW landfills including geographic locations, the geographic areas serviced with the amount of wastes received in tons/year, and other pertinent information.

MSW Landfill Disposal Trends

Data in this report indicates that during 2004, Mississippi landfills received slightly less municipal solid waste (approximately 23,900 tons less) as compared to the amount received during Calendar Year 2003. (see [Figure: 2](#) below).

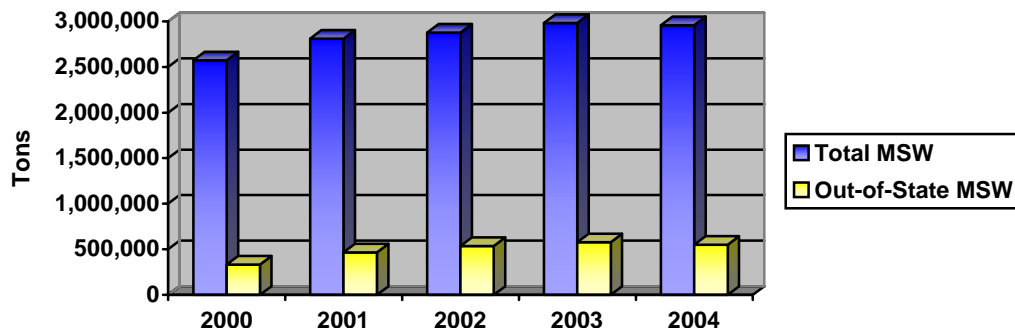

Figure: 2

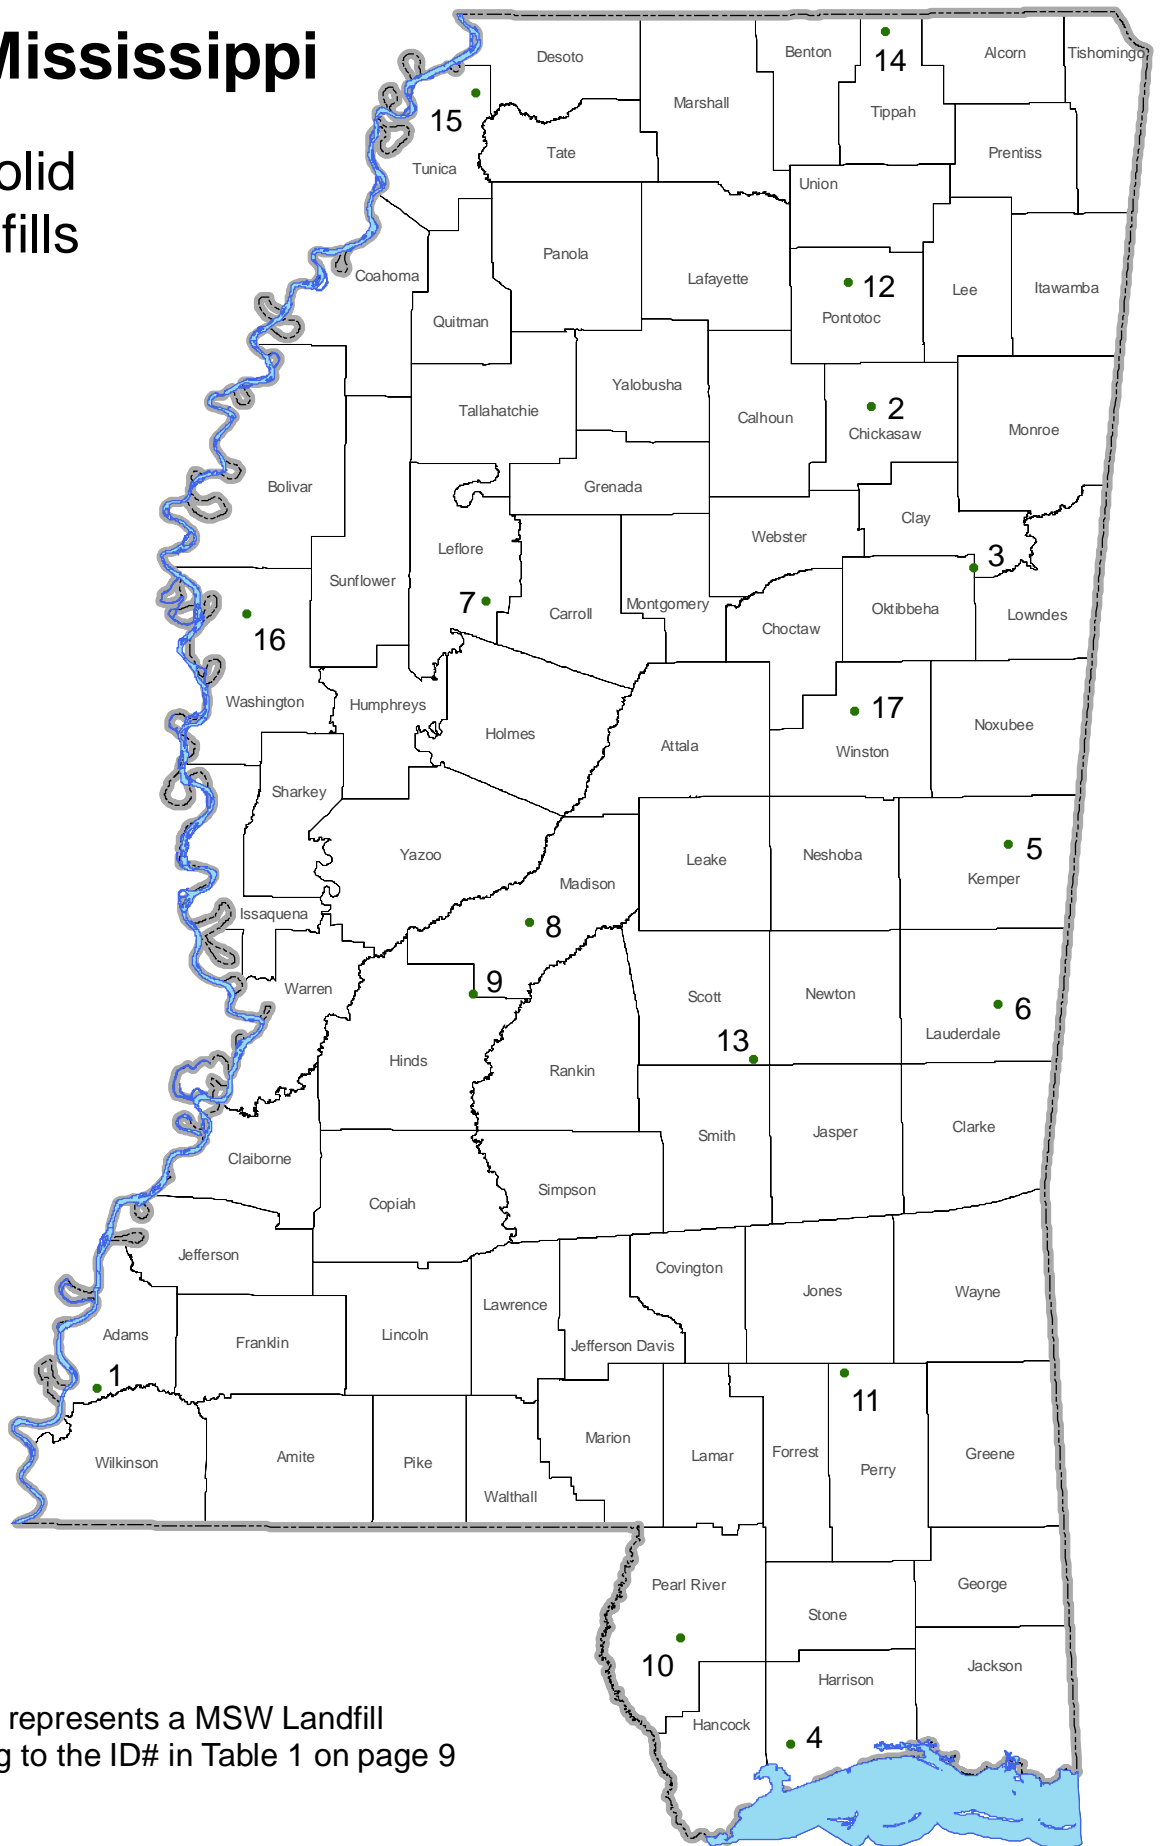

Figure: 3 below shows a comparison of disposal rates during the five year period from Calendar Year 2000 thru 2004. Over this five year period, the average annual percent change in disposal rates was +3.6% for total MSW, +1.9% for in-state MSW, and +14.4% for out-of-state MSW.

MSW (tons)	CALENDAR YEAR					Avg. Annual % Change
	2000	2001	2002	2003	2004	
Total	2,570,879	2,808,684	2,877,376	2,979,490	2,955,590	+3.6
In-State	2,236,514	2,342,285	2,339,872	2,399,738	2,405,179	+1.9
Out-of-State	334,365	466,399	537,504	579,752	550,411	+14.4

 Areas serviced with the amount of waste recieved (in tons) during 2004

Permit Issuance Date: October 8, 1986
 Permitted Airspace: Not Available
 Remaining Life: 6 years
 Waste: 16,304 tons/year; 53 tons/day (310 days)
 Out-of-State Waste: 0 tons/year
 % Out-of-State Waste: 0%
 Other States Serviced: None

Non-Municipal Solid Waste (Non-MSW) Landfills

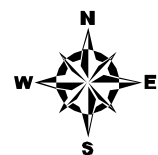

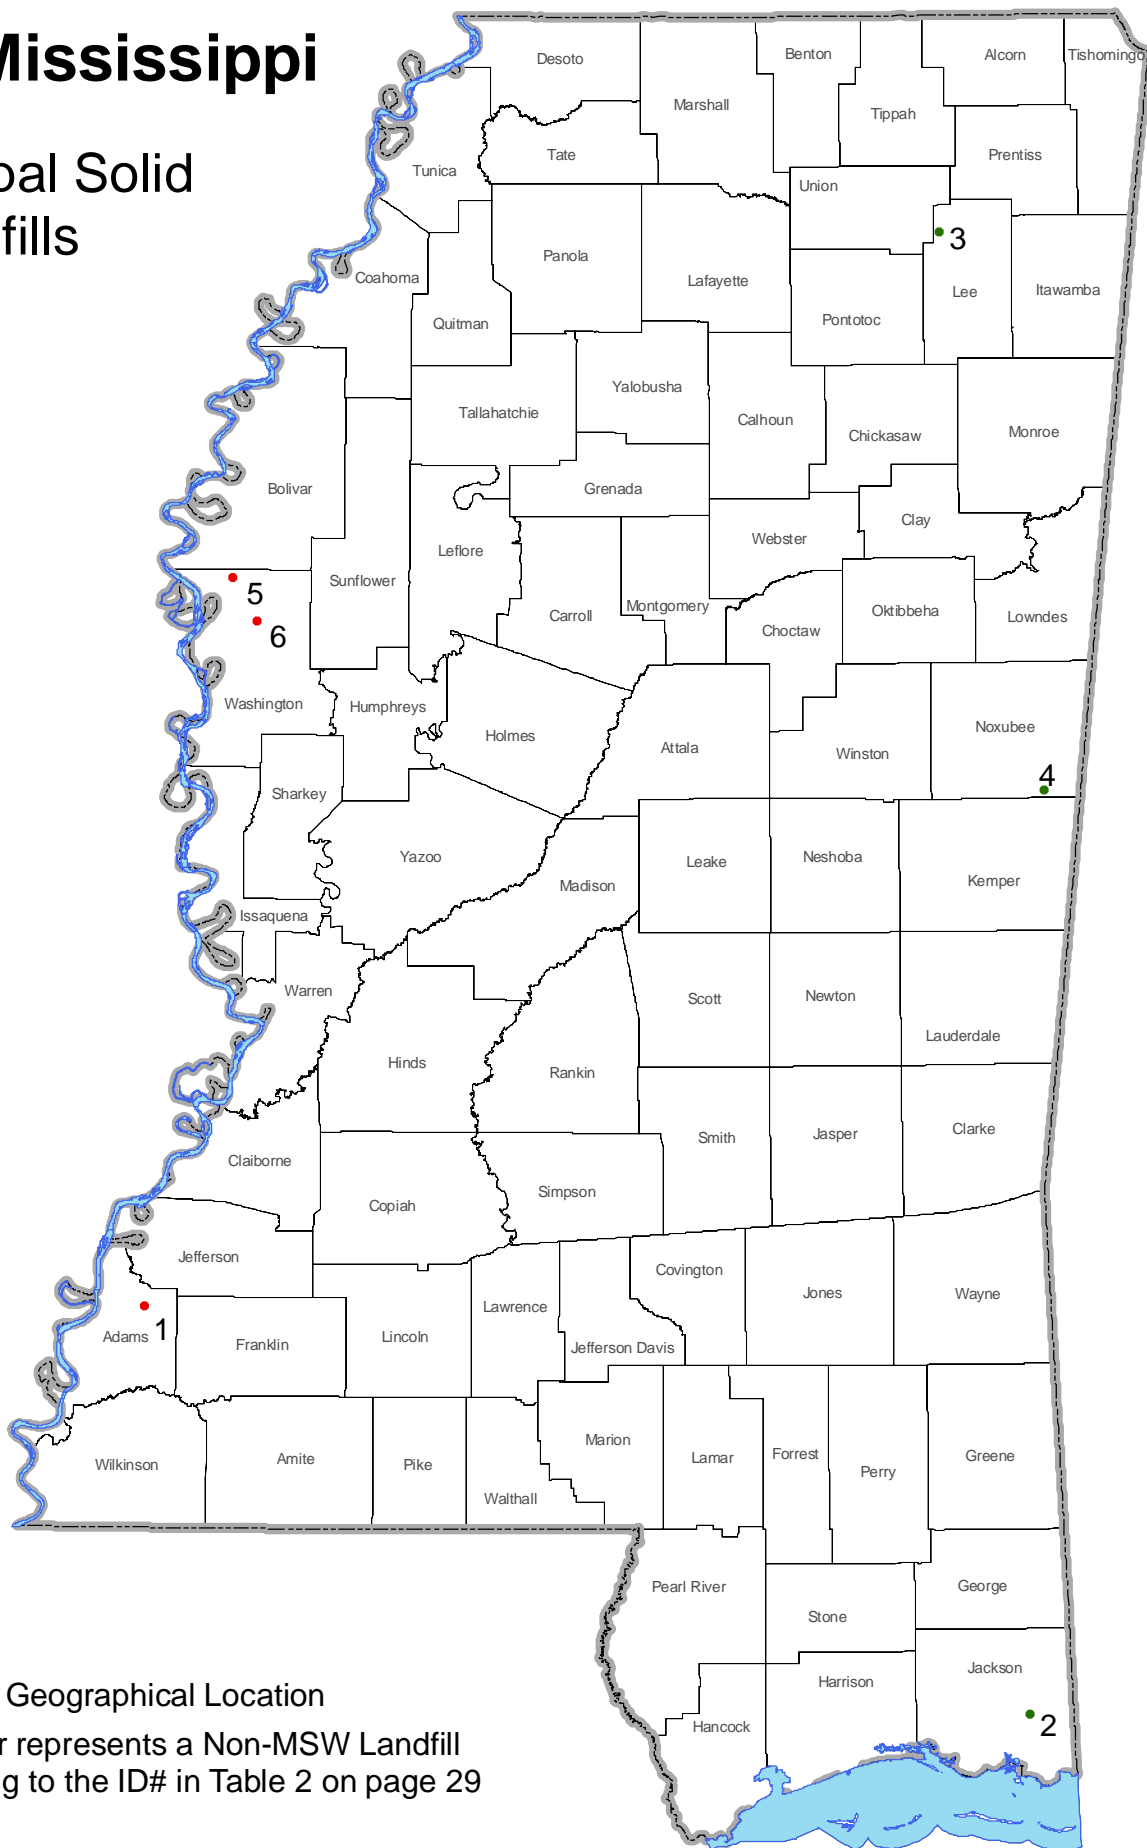

Non-Municipal Solid Waste (non-MSW) Landfills are disposal facilities that are designed and constructed to receive a limited range of nonhazardous solid wastes, such as industrial sludges and ashes, and special wastes, such as asbestos, for disposal. These landfills generally receive waste from either one primary industrial source or receive one primary waste stream. These facilities are not authorized to accept household garbage or other similar wastes. One (1) of the six (6) permitted non-MSW landfills was inactive during Calendar Year 2004. According to the annual reports submitted by the owners/operators, the remaining five (5) non-municipal landfills received a total of 164,024 tons of solid waste during Calendar Year 2004.

The annual report on the solid waste disposal activities conducted at each non-MSW landfill is required by the Mississippi Code Annotated Section 17-17-219 (Supp. 2004) and Section IV.B.14 of the Mississippi Nonhazardous Waste Management Regulations. This report contains a summary of these individual facility reports as provided by the facility owners. The report includes the following information:

1. A state map showing the locations of non-MSW landfills; and
2. A summary of operational information contained in the individual annual reports for Calendar Year 2004 for non-MSW landfills. The information is listed alphabetically by County;

Class I and Class II Rubbish Sites

Class I and Class II Rubbish Sites are facilities that are designed and constructed to receive rubbish wastes from a variety of sources for disposal. Rubbish is a subset of the overall municipal solid waste stream generated in the State of Mississippi that includes non-putrescible types of wastes. A significant amount of rubbish wastes are managed and disposed of each year at commercial rubbish disposal facilities across the state.

There were eighty (80) permitted commercial class I rubbish sites, eight (8) of which were inactive during Calendar Year 2004. Also, three (3) sites did not report. According to the annual reports submitted by the owners/operators, a total of 602,192 tons of rubbish wastes were disposed of at the remaining sixty-nine (69) active class I rubbish sites during Calendar Year 2004.

In addition, there were seventy-four (74) permitted commercial class II rubbish sites, fourteen (14) of which were inactive during Calendar Year 2004. Also, four (4) sites did not report and one (1) site was closed. According to the annual reports submitted by the owners/operators, a total of 83,141 tons of rubbish wastes were disposed of at the remaining fifty-five (55) active class II rubbish sites during Calendar Year 2004.

Class I rubbish sites may accept all solid wastes that are defined as rubbish wastes. These wastes generally include the following information:

- construction and demolition debris;
- brick, mortar, concrete, stone, and asphalt;
- cardboard;
- natural vegetation;
- appliances which have had the motor removed (except refrigerators);
- furniture;
- plastic, glass, crockery, and metal (except containers); and
- sawdust, wood shavings, and wood chips.

Class II rubbish sites may accept limited types of inert rubbish wastes. These inert wastes include natural vegetation, brick, mortar, concrete, stone, and asphalt.

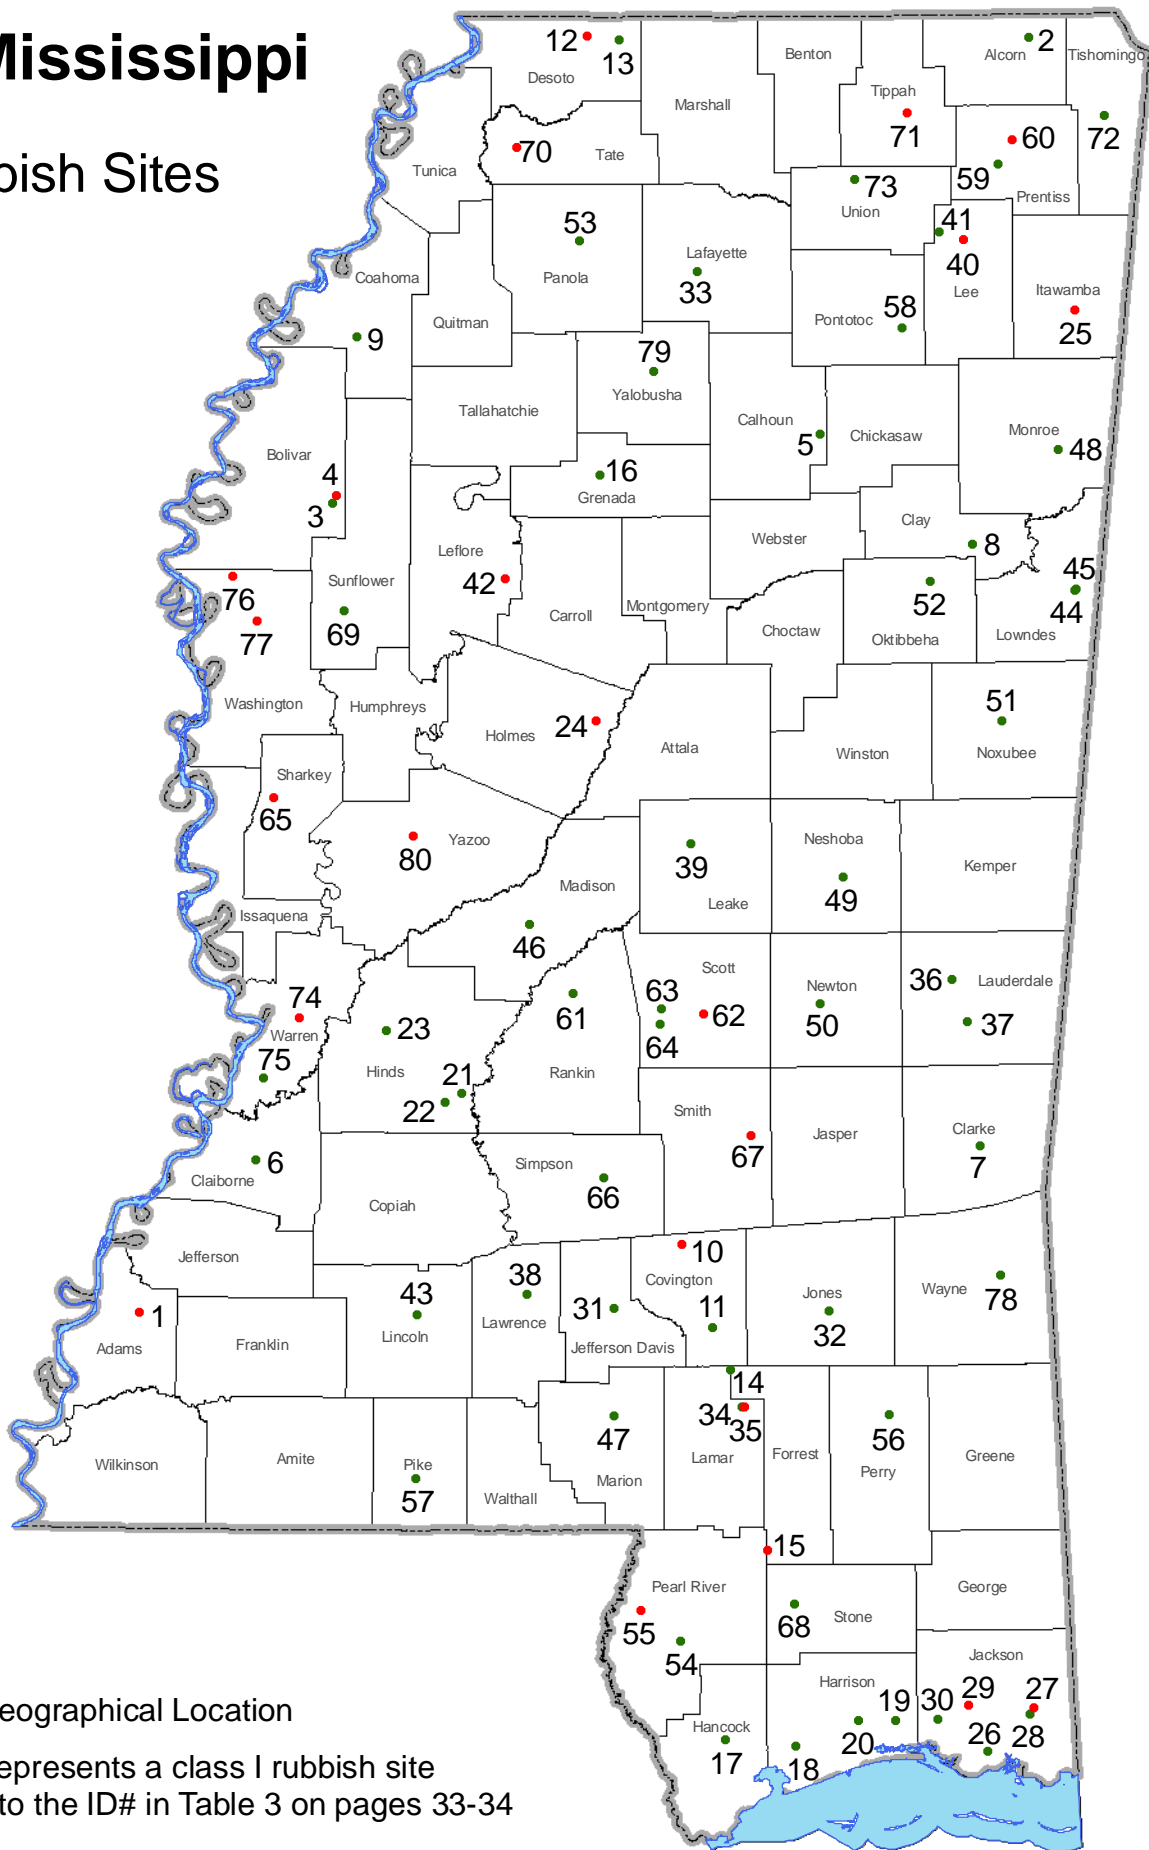

The annual report on the solid waste disposal activity conducted at each rubbish site is required by the Mississippi Code Annotated, Section 17-17-219 (Supp. 2004), Section T of Statewide General Permit No. SWGP-R1 for class I rubbish sites, and Section R of Statewide General Permit No. SWGP-R2 for class II rubbish sites. This report contains a summary of these facility reports as provided by the facility owners. The report includes the following information:

1. A state map showing the locations of class I rubbish sites;

2. A summary of the information provided by rubbish site owners in the individual annual reports for Calendar Year 2004 for class I rubbish sites in Mississippi. The information is listed alphabetically by County;
3. A state map showing the locations of class II rubbish sites; and
4. A summary of the information provided by rubbish site owners in the individual annual reports for Calendar Year 2004 for class II rubbish sites in the State of Mississippi. The information is listed alphabetically by County.

PART II

**NON-COMMERCIAL SOLID WASTE
DISPOSAL FACILITIES**

Industrial and Institutional Landfills

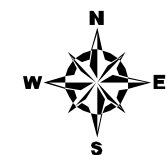

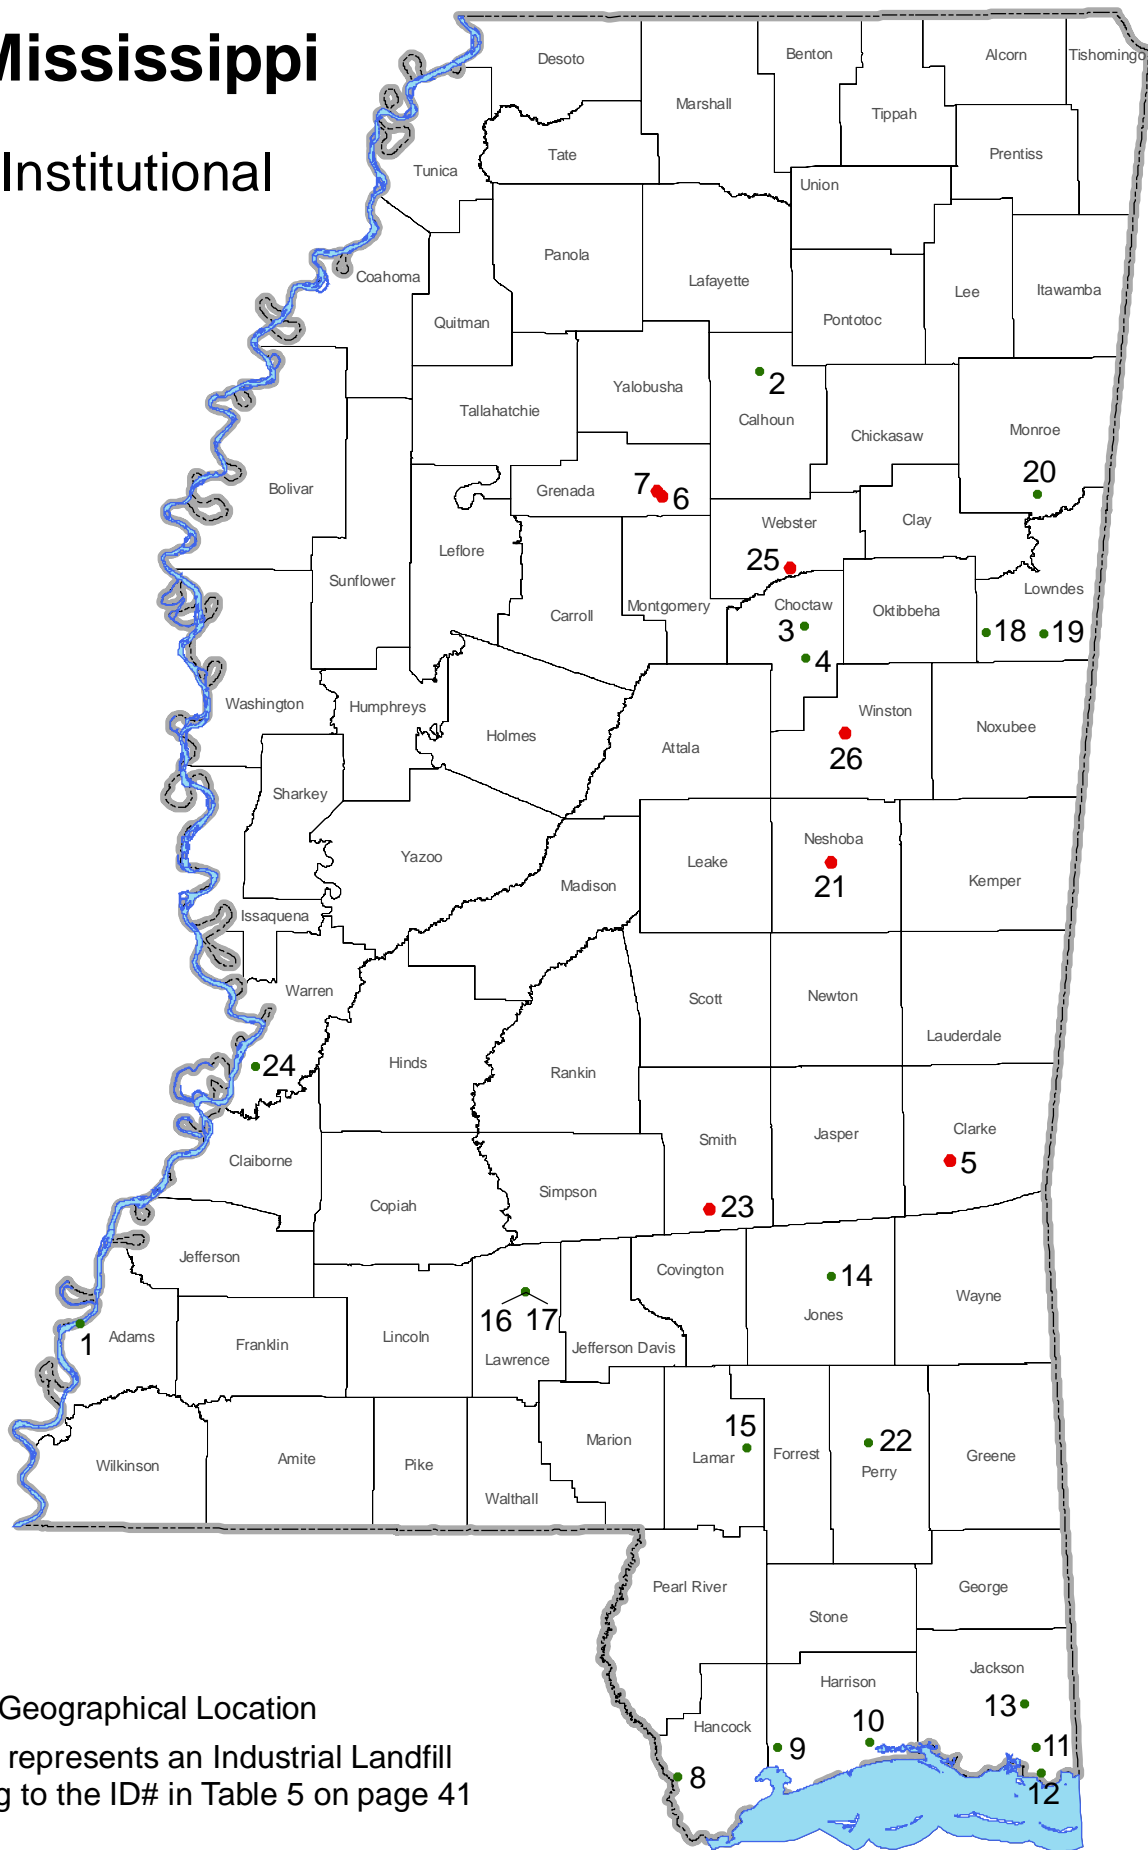

Industrial and Institutional Landfills are disposal facilities that are designed and constructed to receive nonhazardous industrial wastes and certain special wastes from one primary source for ultimate disposal. These disposal facilities are generally owned and operated by the industry or institution that generates the wastes. There were twenty-five (25) permitted industrial and institutional landfills, of which two (2) were inactive and one (1) was closed during Calendar Year 2004. According to the annual reports submitted by the owners/operators, a total of 2,891,809 tons of solid waste were disposed of at the remaining twenty-two (22) landfills during Calendar Year 2004.

The annual report on the solid waste disposal activities conducted at each industrial and institutional landfill is required by the individual facility permit conditions. This report contains a summary report on the disposal activities conducted at landfills in Mississippi during Calendar Year 2004. The report includes the following information:

1. A state map showing the locations of industrial and institutional landfills; and
2. A summary of operational information contained in the individual annual reports for Calendar Year 2004 for industrial and institutional landfills. The information is listed alphabetically by County.

Industrial and Institutional Rubbish Sites

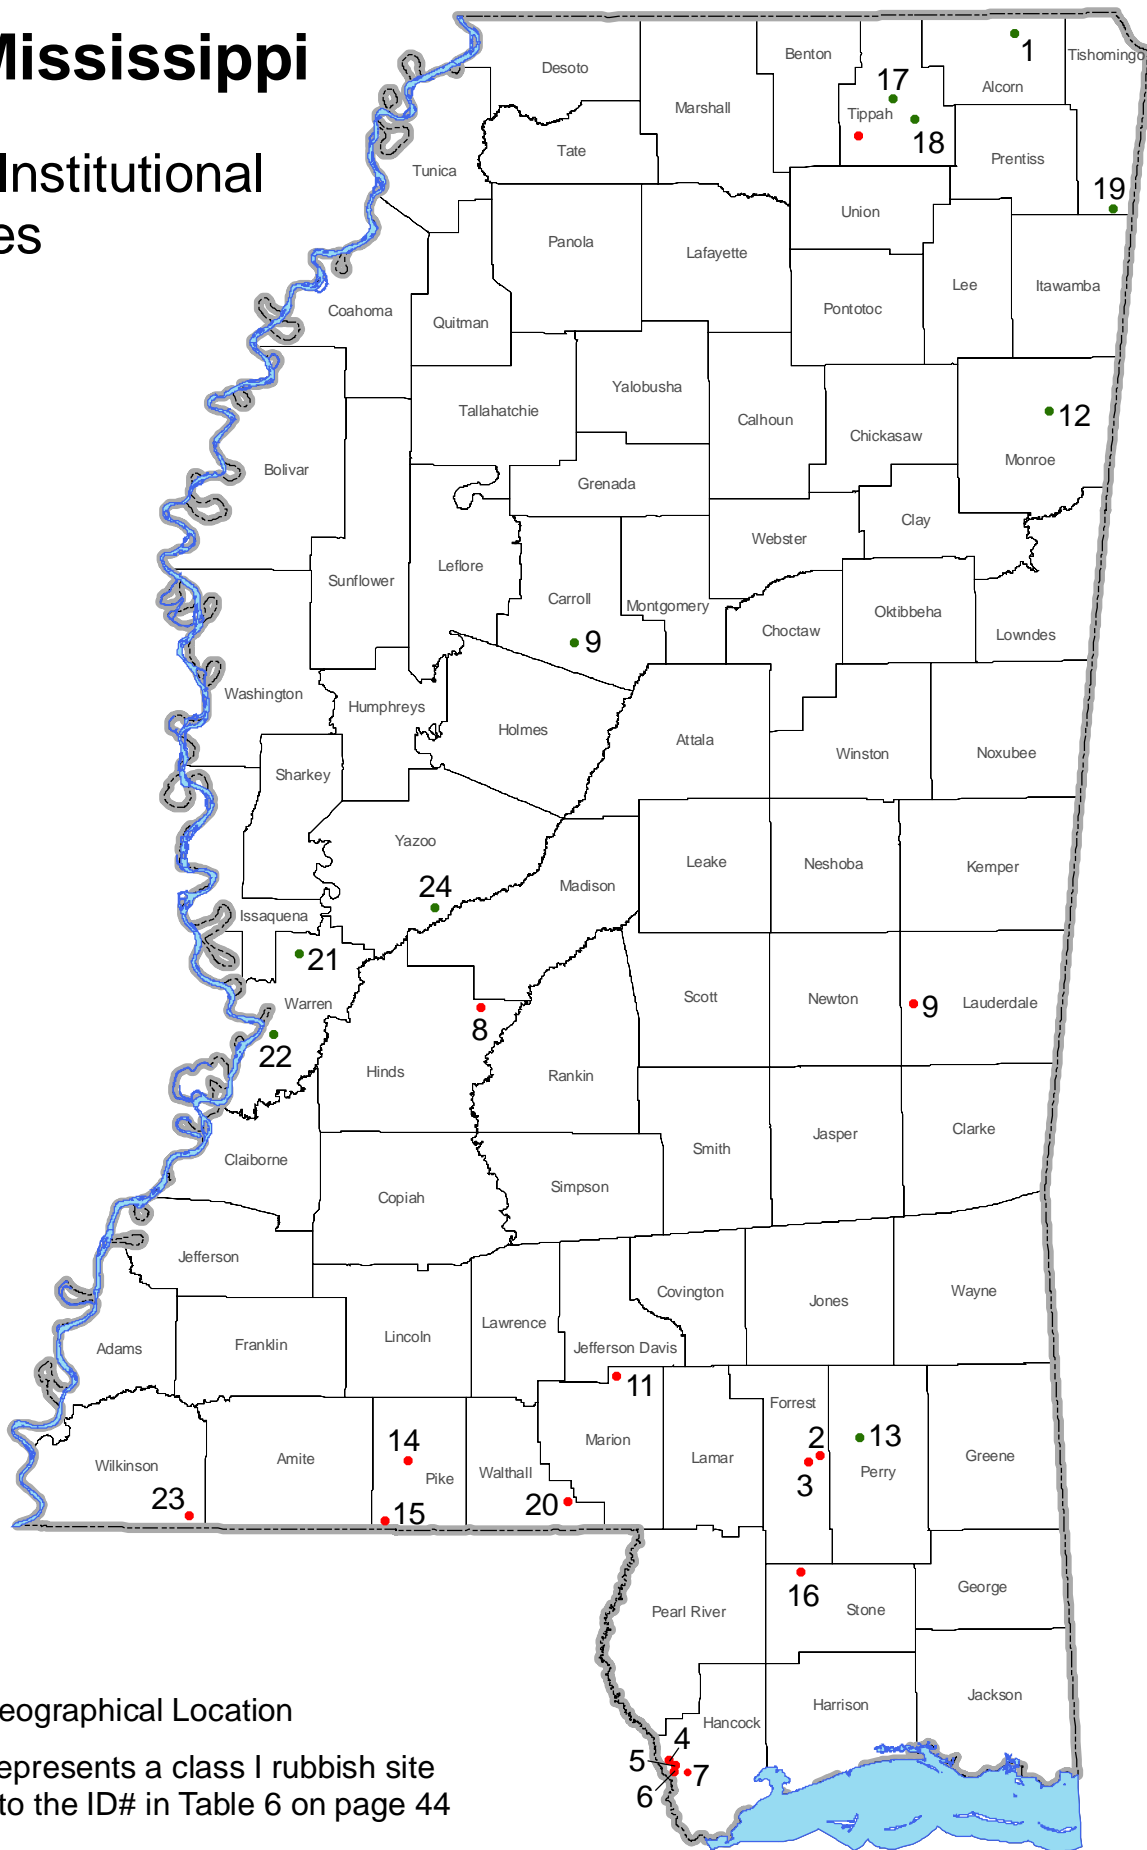

Industrial and Institutional Rubbish Sites are facilities that are designed and constructed to receive class I and/or class II rubbish wastes from industrial or institutional sources for disposal. These disposal facilities are generally owned and operated by the industry or institution that generates the wastes and are categorized as either class I or class II rubbish sites depending upon the types of waste disposed. There were twenty-four (24) permitted industrial or institutional rubbish sites, eleven (11) of which were inactive during Calendar Year 2004. According to the annual reports submitted by the owners/operators, a total of 14,328 tons of solid wastes were disposed of at the remaining fourteen (13) industrial rubbish sites during Calendar Year 2004.

The annual report on the solid waste disposal activity conducted at each rubbish site is required by Section T of Statewide General Permit No. SWGP-R1 for class I rubbish sites and Section R of Statewide General Permit No. SWGP-R2 for class II rubbish sites. This report contains a summary of the individual facility reports as reported by the facility owners. The report includes the following information:

1. A state map showing the locations of industrial and institutional rubbish sites; and
2. A summary of the information provided by the rubbish site owners in the individual annual reports for Calendar Year 2004 for all non-commercial rubbish sites in Mississippi. The information is listed alphabetically by County.
