REFINERY

FACILITY NAME HERCULES INCORPORATED

FACILITY ADDRESS W. 7TH STREET, HATTIESBURG

TANK IDENTIFICATION NO./NAME F-7 M-0167

Empty Out of Service

1. Product stored; e.g. crude oil, gasoline, etc.	Empty
2. True vapor pressure of product at storage temperature (PSIA/°F)	N/A
3. Reid vapor pressure of product at storage temperature (PSIA/°F)	N/A
4. Density of product stored at storage temperature (lbs/gal)	N/A
5. Molecular weight of product vapor at storage temperature lb/lb mole	N/A
6. Throughput for the most recent calendar year (gals/year)	N/A
7. Tank Capacity (gals)	480
8. Tank Diameter (feet)	3.5
9. Tank Height (feet)	7
10. Average Vapor Space Height (feet)	7
11. Tank Construction: Riveted or Welded	Welded
12. Type of Tank: Fixed Roof, Floating, Variable, Pressure, Other	Fixed Roof
15. Tank paint color: White, Aluminum, Gray, Other	Stainless Steel
16. Tank paint condition: Good or Poor	N/A
17. Tank shell condition: Light rust, dense rust, gunite lined	Poor (rust)
18. Tank seal condition: Good or or Poor	Good
19. Date tank installed	N/A
20. Tank modifications: Give date and describe	None
21. Is the tank equipped with a vapor recovery system?	No
22. Average wind velocity of the area (miles/hour)	5mph

HERCULES INCORPORATED
THIS DOCUMENT AND THE INFORMATION THEREIN IS THE EXCLUSIVE PROPERTY OF HERCULES INCORPORATED AND MAY NOT BE USED, REPRODUCED OR DISCLOSED TO OTHERS WITHOUT THE WRITTEN PERMISSION OF HERCULES INCORPORATED.

Item No. For Most Recent Calendar Year (loading/unloading information)	
1. Product transferred: crude oil, gasoline, etc.	Empty
2. Amount transferred (loading), gals/day	N/A
3. Amount transferred (unloading), gals/day	N/A
4. Amount transferred (pipe line), gals/day	N/A
5. Bulk temperature of the product, °F	N/A
6. True vapor pressure of the product at storage temperature, psia	N/A
7. Reid vapor pressure of the product, psia	N/A
8. Molecular weight of the product, lb/lb mole	N/A
9. Density of the product at bulk temperature (lbs/gal)	N/A
10. Type of loading: vessel, barge, truck, other (specify)	Vessel
11. Type of filling: submerged, fill pipe splash filling, bottom filling, other(specify)	Bottom
11a. If submerged fill is used, what approximate percent is the fill pipe submerged	N/A
12. Type of service: dedicated service to one product, vapor balance service, other(specify)	Out of service
13. Is loading/unloading operation equipped with vapor recovery or other pollution control system(specify)	No
14. Efficiency of vapor collection system	

BC-123

FACILITY NAME HERCULES INCORPORATED

FACILITY ADDRESS W. 7TH STREET, HATTIESBURG

TANK IDENTIFICATION NO./NAME F-8 M-0169

Empty Out of Service

1. Product stored; e.g. crude oil, gasoline, etc.	Empty
2. True vapor pressure of product at storage temperature (PSIA/°F)	N/A
3. Reid vapor pressure of product at storage temperature (PSIA/°F)	N/A
4. Density of product stored at storage temperature (lbs/gal)	N/A
5. Molecular weight of product vapor at storage temperature lb/lb mole	N/A
6. Throughput for the most recent calendar year (gals/year)	-0-
7. Tank Capacity (gals)	432
8. Tank Diameter (feet)	3.5
9. Tank Height (feet)	6
10. Average Vapor Space Height (feet)	6
11. Tank Construction: Riveted or Welded	Welded
12. Type of Tank: Fixed Roof, Floating, Variable, Pressure, Other	Fixed Roof
15. Tank paint color: White, Aluminum, Gray, Other	Stainless steel
16. Tank paint condition: Good or Poor	N/A
17. Tank shell condition: Light rust, dense rust, gunite lined	Rusty
18. Tank seal condition: Good or or Poor	Good
19. Date tank installed	N/A
20. Tank modifications: Give date and describe	None
21. Is the tank equipped with a vapor recovery system?	No
22. Average wind velocity of the area (miles/hour)	5mph

FACILITY NAME HERCULES INCORPORATED

FACILITY ADDRESS W. 7TH STREET, HATTIESBURG

TANK IDENTIFICATION NO./NAME R-12 0271

Out of service Empty

1. Product stored; e.g. crude oil, gasoline, etc.	Soda Ash
2. True vapor pressure of product at storage temperature (PSIA/°F)	N/A
3. Reid vapor pressure of product at storage temperature (PSIA/°F)	N/A
4. Density of product stored at storage temperature (lbs/gal)	N/A
5. Molecular weight of product vapor at storage temperature lb/lb mole	N/A
6. Throughput for the most recent calendar year (gals/year)	-0-
7. Tank Capacity (gals)	300
8. Tank Diameter (feet)	4
9. Tank Height (feet)	3'3"
10. Average Vapor Space Height (feet)	3'3"
11. Tank Construction: Riveted or Welded	Riveted
12. Type of Tank: Fixed Roof, Floating, Variable, Pressure, Other	Fixed Roof
15. Tank paint color: White, Aluminum, Gray, Other	Gray
16. Tank paint condition: Good or Poor	Poor
17. Tank shell condition: Light rust, dense rust, gunite lined	Dense
18. Tank seal condition: Good or or Poor	Good
19. Date tank installed	N/A
20. Tank modifications: Give date and describe	None
21. Is the tank equipped with a vapor recovery system?	No
22. Average wind velocity of the area (miles/hour)	5mph

1. Product stored; e.g. crude oil, gasoline, etc.	Crude Pale
2. True vapor pressure of product at storage temperature (PSIA/°F)	3mm Hg/300
3. Reid vapor pressure of product at storage temperature (PSIA/°F)	N/A
4. Density of product stored at storage temperature (lbs/gal)	10.5
5. Molecular weight of product vapor at storage temperature lb/lb mole	App. 300
6. Throughput for the most recent calendar year (gals/year)	0
7. Tank Capacity (gals)	470
8. Tank Diameter (feet)	4′
9. Tank Height (feet)	5′
10. Average Vapor Space Height (feet)	2.5′
11. Tank Construction: Riveted or Welded	Welded
12. Type of Tank: Fixed Roof, Floating, Variable, Pressure, Other	Fixed Roof
15. Tank paint color: White, Aluminum, Gray, Other	Aluminum
16. Tank paint condition: Good or Poor	Good
17. Tank shell condition: Light rust, dense rust, gunite lined	"
18. Tank seal condition: Good or Poor	"
19. Date tank installed	N/A
20. Tank modifications: Give date and describe	None
21. Is the tank equipped with a vapor recovery system?	Vent System
22. Average wind velocity of the area (miles/hour)	5 mph
Item No. For Most Recent Calendar Year (loading/unloading information)	
1. Product transferred: crude oil, gasoline, etc.	Crude Pale
2. Amount transferred (loading), gals/day	1500
3. Amount transferred (unloading), gals/day	1500
4. Amount transferred (pipe line), gals/day	0
5. Bulk temperature of the product, °F	App. 300
6. True vapor pressure of the product at storage temperature, psia	3mm Hg/300
7. Reid vapor pressure of the product, psia	N/A
8. Molecular weight of the product, lb/lb mole	App 300
9. Density of the product at bulk temperature (lbs/gal)	10.5
10. Type of loading: vessel, barge, truck, other (specify)	Vessel
11. Type of filling: submerged, fill pipe splash filling, bottom filling, other(specify)	Submerged Fill
11a. If submerged fill is used, what approximate percent is the fill pipe submerged	90%
12. Type of service: dedicated service to one product, vapor balance service, other(specify)	Separator
13. Is loading/unloading operation equipped with vapor recovery or other pollution control system(specify)	No
14. Efficiency of vapor collection system	-

FACILITY ADDRESS W. 7TH STREET, HATTIESBURG

TANK IDENTIFICATION NO./NAME P-56 M-0243

1. Product stored; e.g. crude oil, gasoline, etc.	Crude Pale
2. True vapor pressure of product at storage temperature (PSIA/°F)	3mm Hg/300
3. Reid vapor pressure of product at storage temperature (PSIA/°F)	N/A
4. Density of product stored at storage temperature (lbs/gal)	10.5
5. Molecular weight of product vapor at storage temperature lb/lb mole	App. 300
6. Throughput for the most recent calendar year (gals/year)	15,500,000
7. Tank Capacity (gals)	1,469
8. Tank Diameter (feet)	5′
9. Tank Height (feet)	10′
10. Average Vapor Space Height (feet)	5′
11. Tank Construction: Riveted or Welded	Welded
12. Type of Tank: Fixed Roof, Floating, Variable, Pressure, Other	Fixed Roof
15. Tank paint color: White, Aluminum, Gray, Other	Aluminum
16. Tank paint condition: Good or Poor	Good
17. Tank shell condition: Light rust, dense rust, gunite lined	"
18. Tank seal condition: Good or Poor	"
19. Date tank installed	N/A
20. Tank modifications: Give date and describe	None
21. Is the tank equipped with a vapor recovery system?	Vent System
22. Average wind velocity of the area (miles/hour)	5 mph
Item No. For Most Recent Calendar Year (loading/unloading information)	
1. Product transferred: crude oil, gasoline, etc.	Crude Pale
2. Amount transferred (loading), gals/day	0
3. Amount transferred (unloading), gals/day	0
4. Amount transferred (pipe line), gals/day	0
5. Bulk temperature of the product, °F	App. 300
6. True vapor pressure of the product at storage temperature, psia	3mm Hg/300
7. Reid vapor pressure of the product, psia	N/A
8. Molecular weight of the product, lb/lb mole	App. 300
9. Density of the product at bulk temperature (lbs/gal)	10.5
10. Type of loading: vessel, barge, truck, other (specify)	Vessel
11. Type of filling: submerged, fill pipe splash filling, bottom filling, other(specify)	Submerged Fill
11a. If submerged fill is used, what approximate percent is the fill pipe submerged	90%
12. Type of service: dedicated service to one product, vapor balance service, other(specify)	Storage
13. Is loading/unloading operation equipped with vapor recovery or other pollution control system(specify)	No
14. Efficiency of vapor collection system	-

FACILITY NAME HERCULES INCORPORATED

FACILITY ADDRESS W. 7TH STREET, HATTIESBURG

TANK IDENTIFICATION NO./NAME P-59 M-0231

1. Product stored; e.g. crude oil, gasoline, etc.	Beltor
2. True vapor pressure of product at storage temperature (PSIA/°F)	1mm Hg/300
3. Reid vapor pressure of product at storage temperature (PSIA/°F)	N/A
4. Density of product stored at storage temperature (lbs/gal)	10.1
5. Molecular weight of product vapor at storage temperature lb/lb mole	App 302
6. Throughput for the most recent calendar year (gals/year)	143,000
7. Tank Capacity (gals)	10,278
8. Tank Diameter (feet)	8′
9. Tank Height (feet)	27′ 4"
10. Average Vapor Space Height (feet)	13′ 8"
11. Tank Construction: Riveted or Welded	Insulated
12. Type of Tank: Fixed Roof, Floating, Variable, Pressure, Other	Fixed Roof
15. Tank paint color: White, Aluminum, Gray, Other	Insulated
16. Tank paint condition: Good or Poor	"
17. Tank shell condition: Light rust, dense rust, gunite lined	"
18. Tank seal condition: Good or Poor	Good
19. Date tank installed	1/60
20. Tank modifications: Give date and describe	None
21. Is the tank equipped with a vapor recovery system?	No
22. Average wind velocity of the area (miles/hour)	5 mph
Item No. For Most Recent Calendar Year (loading/unloading information)	
1. Product transferred: crude oil, gasoline, etc.	Vinsol
2. Amount transferred (loading), gals/day	600
3. Amount transferred (unloading), gals/day	600
4. Amount transferred (pipe line), gals/day	0
5. Bulk temperature of the product, °F	300°
6. True vapor pressure of the product at storage temperature, psia	1mm Hg/300
7. Reid vapor pressure of the product, psia	N/A
8. Molecular weight of the product, lb/lb mole	App 302
9. Density of the product at bulk temperature (lbs/gal)	10.1
10. Type of loading: vessel, barge, truck, other (specify)	Vessel
11. Type of filling: submerged, fill pipe splash filling, bottom filling, other(specify)	Submerged fill
11a. If submerged fill is used, what approximate percent is the fill pipe submerged	90%
12. Type of service: dedicated service to one product, vapor balance service, other(specify)	Storage
13. Is loading/unloading operation equipped with vapor recovery or other pollution control system(specify)	No
14. Efficiency of vapor collection system	-

FACILITY NAME HERCULES INCORPORATED

FACILITY ADDRESS W. 7TH STREET, HATTIESBURG

TANK IDENTIFICATION NO./NAME P-72 M-0045

OUT OF SERVICE

1. Product stored; e.g. crude oil, gasoline, etc.	Pexite Gas
2. True vapor pressure of product at storage temperature (PSIA/°F)	.3/68°F
3. Reid vapor pressure of product at storage temperature (PSIA/°F)	N/A
4. Density of product stored at storage temperature (lbs/gal)	App. 7.3
5. Molecular weight of product vapor at storage temperature lb/lb mole	App. 50
6. Throughput for the most recent calendar year (gals/year)	0
7. Tank Capacity (gals)	176
8. Tank Diameter (feet)	5′
9. Tank Height (feet)	12′
10. Average Vapor Space Height (feet)	6′
11. Tank Construction: Riveted or Welded	Welded
12. Type of Tank: Fixed Roof, Floating, Variable, Pressure, Other	Fixed Roof
15. Tank paint color: White, Aluminum, Gray, Other	Aluminum
16. Tank paint condition: Good or Poor	Good
17. Tank shell condition: Light rust, dense rust, gunite lined	"
18. Tank seal condition: Good or Poor	"
19. Date tank installed	N/A
20. Tank modifications: Give date and describe	None
21. Is the tank equipped with a vapor recovery system?	Vent System
22. Average wind velocity of the area (miles/hour)	5 mph
Item No. For Most Recent Calendar Year (loading/unloading information)	Pexite gas/
1. Product transferred: crude oil, gasoline, etc.	Water
2. Amount transferred (loading), gals/day	1,000
3. Amount transferred (unloading), gals/day	1,000
4. Amount transferred (pipe line), gals/day	0
5. Bulk temperature of the product, °F	350°F
6. True vapor pressure of the product at storage temperature, psia	10/350
7. Reid vapor pressure of the product, psia	N/A
8. Molecular weight of the product, lb/lb mole	App. 50
9. Density of the product at bulk temperature (lbs/gal)	App. 7.3
10. Type of loading: vessel, barge, truck, other (specify)	Vessel
11. Type of filling: submerged, fill pipe splash filling, bottom filling, other(specify)	Submerged fill
11a. If submerged fill is used, what approximate percent is the fill pipe submerged	90%
12. Type of service: dedicated service to one product, vapor balance service, other(specify)	Separator
13. Is loading/unloading operation equipped with vapor recovery or other pollution control system(specify)	No
14. Efficiency of vapor collection system	-

FACILITY ADDRESS W. 7TH STREET, HATTIESBURG

TANK IDENTIFICATION NO./NAME P-76 M-0889

OUT OF SERVICE

1. Product stored; e.g. crude oil, gasoline, etc.	Water, Steam
2. True vapor pressure of product at storage temperature (PSIA/°F)	.3/68°F
3. Reid vapor pressure of product at storage temperature (PSIA/°F)	N/A
4. Density of product stored at storage temperature (lbs/gal)	8.4
5. Molecular weight of product vapor at storage temperature lb/lb mole	18
6. Throughput for the most recent calendar year (gals/year)	0
7. Tank Capacity (gals)	317
8. Tank Diameter (feet)	3'
9. Tank Height (feet)	6'
10. Average Vapor Space Height (feet)	3'
11. Tank Construction: Riveted or Welded	Insulated
12. Type of Tank: Fixed Roof, Floating, Variable, Pressure, Other	Fixed Roof
15. Tank paint color: White, Aluminum, Gray, Other	Insulated
16. Tank paint condition: Good or Poor	"
17. Tank shell condition: Light rust, dense rust, gunite lined	"
18. Tank seal condition: Good or Poor	Good
19. Date tank installed	N/A
20. Tank modifications: Give date and describe	None
21. Is the tank equipped with a vapor recovery system?	No
22. Average wind velocity of the area (miles/hour)	5 mph
Item No. For Most Recent Calendar Year (loading/unloading information)	
1. Product transferred: crude oil, gasoline, etc.	Water Steam
2. Amount transferred (loading), gals/day	2,000
3. Amount transferred (unloading), gals/day	2,000
4. Amount transferred (pipe line), gals/day	-
5. Bulk temperature of the product, °F	210-220
6. True vapor pressure of the product at storage temperature, psia	11.5/200
7. Reid vapor pressure of the product, psia	N/A
8. Molecular weight of the product, lb/lb mole	18
9. Density of the product at bulk temperature (lbs/gal)	App. 8.0
10. Type of loading: vessel, barge, truck, other (specify)	Vessel
11. Type of filling: submerged, fill pipe splash filling, bottom filling, other(specify)	Top
11a. If submerged fill is used, what approximate percent is the fill pipe submerged	-
12. Type of service: dedicated service to one product, vapor balance service, other(specify)	Flash Tank
13. Is loading/unloading operation equipped with vapor recovery or other pollution control system(specify)	No
14. Efficiency of vapor collection system	-

11. Type of filling: submerged, fill pipe splash filling, bottom filling, other(specify)	Top
11a. If submerged fill is used, what approximate percent is the fill pipe submerged	
12. Type of service: dedicated service to one product, vapor balance service, other(specify)	Sludge Tank
13. Is loading/unloading operation equipped with vapor recovery or other pollution control system(specify)	No
14. Efficiency of vapor collection system	

BC-279

FACILITY NAME HERCULES INCORPORATED

FACILITY ADDRESS W. 7TH STREET, HATTIESBURG

TANK IDENTIFICATION NO./NAME T-12 M-0367

1. Product stored; e.g. crude oil, gasoline, etc.	Rosin/Toluene/Sulfuric Acid
2. True vapor pressure of product at storage temperature (PSIA/°F)	15mm Hg/70
3. Reid vapor pressure of product at storage temperature (PSIA/°F)	N/A
4. Density of product stored at storage temperature (lbs/gal)	12
5. Molecular weight of product vapor at storage temperature lb/lb mole	164
6. Throughput for the most recent calendar year (gals/year)	2,500,000
7. Tank Capacity (gals)	130
8. Tank Diameter (feet)	2'6"
9. Tank Height (feet)	3'6"
10. Average Vapor Space Height (feet)	1
11. Tank Construction: Riveted or Welded	Welded
12. Type of Tank: Fixed Roof, Floating, Variable, Pressure, Other	Fixed Roof
15. Tank paint color: White, Aluminum, Gray, Other	Insulated
16. Tank paint condition: Good or Poor	
17. Tank shell condition: Light rust, dense rust, gunite lined	Light
18. Tank seal condition: Good or or Poor	Poor
19. Date tank installed	N/A
20. Tank modifications: Give date and describe	None
21. Is the tank equipped with a vapor recovery system?	To scrubber
22. Average wind velocity of the area (miles/hour)	5mph

Item No. For Most Recent Calendar Year (loading/unloading information)	
1. Product transferred: crude oil, gasoline, etc.	Rosin/Toluene/Sulfuric Acid
2. Amount transferred (loading), gals/day	6880
3. Amount transferred (unloading), gals/day	6880
4. Amount transferred (pipe line), gals/day	N/A
5. Bulk temperature of the product, °F	Ambient
6. True vapor pressure of the product at storage temperature, psia	15mm Hg/70
7. Reid vapor pressure of the product, psia	N/A
8. Molecular weight of the product, lb/lb mole	164
9. Density of the product at bulk temperature (lbs/gal)	12
10. Type of loading: vessel, barge, truck, other (specify)	Vessel
11. Type of filling: submerged, fill pipe splash filling, bottom filling, other(specify)	Top
11a. If submerged fill is used, what approximate percent is the fill pipe submerged	
12. Type of service: dedicated service to one product, vapor balance service, other(specify)	Separator
13. Is loading/unloading operation equipped with vapor recovery or other pollution control system(specify)	No
14. Efficiency of vapor collection system

8. Molecular weight of the product, lb/lb mole	164
9. Density of the product at bulk temperature (lbs/gal)	12
10. Type of loading: vessel, barge, truck, other (specify)	Vessel
11. Type of filling: submerged, fill pipe splash filling, bottom filling, other(specify)	Bottom
11a. If submerged fill is used, what approximate percent is the fill pipe submerged	
12. Type of service: dedicated service to one product, vapor balance service, other(specify)	Separator
13. Is loading/unloading operation equipped with vapor recovery or other pollution control system(specify)	No
14. Efficiency of vapor collection system	

BC-287

FACILITY NAME HERCULES INCORPORATED

FACILITY ADDRESS W. 7TH STREET, HATTIESBURG

TANK IDENTIFICATION NO./NAME T-26 M-0505

1. Product stored; e.g. crude oil, gasoline, etc.	Wash Sol'n.
2. True vapor pressure of product at storage temperature (PSIA/°F)	25mm Hg/115
3. Reid vapor pressure of product at storage temperature (PSIA/°F)	N/A
4. Density of product stored at storage temperature (lbs/gal)	12.5
5. Molecular weight of product vapor at storage temperature lb/lb mole	92
6. Throughput for the most recent calendar year (gals/year)	4,500,000
7. Tank Capacity (gals)	2060
8. Tank Diameter (feet)	5
9. Tank Height (feet)	14
10. Average Vapor Space Height (feet)	7
11. Tank Construction: Riveted or Welded	Welded
12. Type of Tank: Fixed Roof, Floating, Variable, Pressure, Other	Fixed Roof
15. Tank paint color: White, Aluminum, Gray, Other	Gray
16. Tank paint condition: Good or Poor	Poor
17. Tank shell condition: Light rust, dense rust, gunite lined	Light
18. Tank seal condition: Good or or Poor	Good
19. Date tank installed	5/49
20. Tank modifications: Give date and describe	None
21. Is the tank equipped with a vapor recovery system?	To Scrubber
22. Average wind velocity of the area (miles/hour)	5mph

PROPRIETARY
HERCULES INCORPORATED

8. Molecular weight of the product, lb/lb mole	300
9. Density of the product at bulk temperature (lbs/gal)	8.4
10. Type of loading: vessel, barge, truck, other (specify)	Vessel
11. Type of filling: submerged, fill pipe splash filling, bottom filling, other(specify)	Top
11a. If submerged fill is used, what approximate percent is the fill pipe submerged	-
12. Type of service: dedicated service to one product, vapor balance service, other(specify)	Storage
13. Is loading/unloading operation equipped with vapor recovery or other pollution control system(specify)	Conservation Vent
14. Efficiency of vapor collection system	-

FACILITY NAME HERCULES INCORPORATED

FACILITY ADDRESS W. 7TH STREET, HATTIESBURG

TANK IDENTIFICATION NO./NAME T-48 M-0390

OUT OF SERVICE

1. Product stored; e.g. crude oil, gasoline, etc.	Sludge
2. True vapor pressure of product at storage temperature (PSIA/°F)	35mm Hg/320
3. Reid vapor pressure of product at storage temperature (PSIA/°F)	N/A
4. Density of product stored at storage temperature (lbs/gal)	12
5. Molecular weight of product vapor at storage temperature lb/lb mole	200
6. Throughput for the most recent calendar year (gals/year)	0
7. Tank Capacity (gals)	505
8. Tank Diameter (feet)	3'6"
9. Tank Height (feet)	7
10. Average Vapor Space Height (feet)	3
11. Tank Construction: Riveted or Welded	Welded
12. Type of Tank: Fixed Roof, Floating, Variable, Pressure, Other	Fixed Roof
15. Tank paint color: White, Aluminum, Gray, Other	Unpainted
16. Tank paint condition: Good or Poor	
17. Tank shell condition: Light rust, dense rust, gunite lined	Dense
18. Tank seal condition: Good or or Poor	Good
19. Date tank installed	N/A
20. Tank modifications: Give date and describe	None
21. Is the tank equipped with a vapor recovery system?	To Condenser
22. Average wind velocity of the area (miles/hour)	5mph

9. Density of the product at bulk temperature (lbs/gal)	12
10. Type of loading: vessel, barge, truck, other (specify)	Vessel
11. Type of filling: submerged, fill pipe splash filling, bottom filling, other(specify)	Top
11a. If submerged fill is used, what approximate percent is the fill pipe submerged	
12. Type of service: dedicated service to one product, vapor balance service, other(specify)	Hydrolyzer
13. Is loading/unloading operation equipped with vapor recovery or other pollution control system(specify)	No
14. Efficiency of vapor collection system	

BC-290

FACILITY NAME HERCULES INCORPORATED

FACILITY ADDRESS W. 7TH STREET, HATTIESBURG

TANK IDENTIFICATION NO./NAME T-92 M-1223

1. Product stored; e.g. crude oil, gasoline, etc.	Weak Sulfuric Acid
2. True vapor pressure of product at storage temperature (PSIA/°F)	.3 mm Hg/77°
3. Reid vapor pressure of product at storage temperature (PSIA/°F)	N/A
4. Density of product stored at storage temperature (lbs/gal)	15.3
5. Molecular weight of product vapor at storage temperature lb/lb mole	98
6. Throughput for the most recent calendar year (gals/year)	0
7. Tank Capacity (gals)	6050
8. Tank Diameter (feet)	8'
9. Tank Height (feet)	16'
10. Average Vapor Space Height (feet)	5'
11. Tank Construction: Riveted or Welded	Welded
12. Type of Tank: Fixed Roof, Floating, Variable, Pressure, Other	Fixed Roof
15. Tank paint color: White, Aluminum, Gray, Other	Gray
16. Tank paint condition: Good or Poor	Poor
17. Tank shell condition: Light rust, dense rust, gunite lined	Dense
18. Tank seal condition: Good or Poor	Good
19. Date tank installed	N/A
20. Tank modifications: Give date and describe	None
21. Is the tank equipped with a vapor recovery system?	To Common Vent
22. Average wind velocity of the area (miles/hour)	5mph

PROPRIETARY
HERCULES INCORPORATED

10.	Type of loading: vessel, barge, truck, other (specify)	Vessel
11.	Type of filling: submerged, fill pipe splash filling, bottom filling, other(specify)	Bottom
11a.	If submerged fill is used, what approximate percent is the fill pipe submerged	-
12.	Type of service: dedicated service to one product, vapor balance service, other(specify)	Blend Tank
13.	Is loading/unloading operation equipped with vapor recovery or other pollution control system(specify)	Conservation Vent
14.	Efficiency of vapor collection system	-

FACILITY NAME HERCULES INCORPORATED

FACILITY ADDRESS W. 7TH STREET, HATTIESBURG

TANK IDENTIFICATION NO./NAME T-116 M-0942

1. Product stored; e.g. crude oil, gasoline, etc.	Waste Water
2. True vapor pressure of product at storage temperature (PSIA/°F)	.3mmHg/68°
3. Reid vapor pressure of product at storage temperature (PSIA/°F)	.3mmHg/68°
4. Density of product stored at storage temperature (lbs/gal)	8.345
5. Molecular weight of product vapor at storage temperature lb/lb mole	18
6. Throughput for the most recent calendar year (gals/year)	600,000
7. Tank Capacity (gals)	3,500
8. Tank Diameter (feet)	7'
9. Tank Height (feet)	12'
10. Average Vapor Space Height (feet)	4'
11. Tank Construction: Riveted or Welded	Welded
12. Type of Tank: Fixed Roof, Floating, Variable, Pressure, Other	Fixed Roof
15. Tank paint color: White, Aluminum, Gray, Other	Gray
16. Tank paint condition: Good or Poor	Good
17. Tank shell condition: Light rust, dense rust, gunite lined	Good
18. Tank seal condition: Good or Poor	Good
19. Date tank installed	NA
20. Tank modifications: Give date and describe	None
21. Is the tank equipped with a vapor recovery system?	To Scrubber/Yes
22. Average wind velocity of the area (miles/hour)	5mph

THIS DOCUMENT AND THE INFORMATION THEREIN, IS THE EXCLUSIVE PROPERTY OF HERCULES INCORPORATED AND MAY NOT BE USED, REPRODUCED OR DISCLOSED TO OTHERS WITHOUT THE WRITTEN PERMISSION OF HERCULES INCORPORATED.

Item No. For Most Recent Calendar Year (loading/unloading information)	
1. Product transferred: crude oil, gasoline, etc.	Glycerine
2. Amount transferred (loading), gals/day	280
3. Amount transferred (unloading), gals/day	280
4. Amount transferred (pipe line), gals/day	
5. Bulk temperature of the product, °F	180
6. True vapor pressure of the product at storage temperature, psia	.1mm Hg/180
7. Reid vapor pressure of the product, psia	N/A
8. Molecular weight of the product, lb/lb mole	75
9. Density of the product at bulk temperature (lbs/gal)	10.5
10. Type of loading: vessel, barge, truck, other (specify)	Vessel
11. Type of filling: submerged, fill pipe splash filling, bottom filling, other(specify)	Top
11a. If submerged fill is used, what approximate percent is the fill pipe submerged	
12. Type of service: dedicated service to one product, vapor balance service, other(specify)	Storage/Feed
13. Is loading/unloading operation equipped with vapor recovery or other pollution control system(specify)	No
14. Efficiency of vapor collection system	

BC-18

FACILITY NAME HERCULES INCORPORATED

FACILITY ADDRESS W. 7TH STREET, HATTIESBURG

TANK IDENTIFICATION NO./NAME S-20 M-0325

OUT OF SERVICE

1. Product stored; e.g. crude oil, gasoline, etc.	Resin
2. True vapor pressure of product at storage temperature (PSIA/°F)	.05mm Hg/300
3. Reid vapor pressure of product at storage temperature (PSIA/°F)	N/A
4. Density of product stored at storage temperature (lbs/gal)	8.33
5. Molecular weight of product vapor at storage temperature lb/lb mole	APP 500
6. Throughput for the most recent calendar year (gals/year)	10,000
7. Tank Capacity (gals)	264
8. Tank Diameter (feet)	3
9. Tank Height (feet)	5
10. Average Vapor Space Height (feet)	2.5
11. Tank Construction: Riveted or Welded	Insulated
12. Type of Tank: Fixed Roof, Floating, Variable, Pressure, Other	Fixed Roof
15. Tank paint color: White, Aluminum, Gray, Other	Insulated
16. Tank paint condition: Good or Poor	Insulated
17. Tank shell condition: Light rust, dense rust, gunite lined	Insulated
18. Tank seal condition: Good or Poor	Good
19. Date tank installed	N/A
20. Tank modifications: Give date and describe	None
21. Is the tank equipped with a vapor recovery system?	No
22. Average wind velocity of the area (miles/hour)	5mph

Item No. For Most Recent Calendar Year (loading/unloading information)	87
1. Product transferred: crude oil, gasoline, etc.	Diesel Fuel
2. Amount transferred (loading), gals/day	50
3. Amount transferred (unloading), gals/day	50
4. Amount transferred (pipe line), gals/day	-
5. Bulk temperature of the product, °F	variable
6. True vapor pressure of the product at storage temperature, psia	8mmHg/70°
7. Reid vapor pressure of the product, psia	NA
8. Molecular weight of the product, lb/lb mole	NA
9. Density of the product at bulk temperature (lbs/gal)	7.1
10. Type of loading: vessel, barge, truck, other (specify)	truck
11. Type of filling: submerged, fill pipe splash filling, bottom filling, other(specify)	bottom
11a. If submerged fill is used, what approximate percent is the fill pipe submerged	-
12. Type of service: dedicated service to one product, vapor balance service, other(specify)	storage 1 product
13. Is loading/unloading operation equipped with vapor recovery or other pollution control system(specify)	conservation vent
14. Efficiency of vapor collection system	NA

FACILITY NAME HERCULES INCORPORATED

FACILITY ADDRESS W. 7TH STREET, HATTIESBURG

TANK IDENTIFICATION NO./NAME Y-46 M-0853

1. Product stored; e.g. crude oil, gasoline, etc.	Pine Oil
2. True vapor pressure of product at storage temperature (PSIA/°F)	21/100°
3. Reid vapor pressure of product at storage temperature (PSIA/°F)	NA
4. Density of product stored at storage temperature (lbs/gal)	7.8
5. Molecular weight of product vapor at storage temperature lb/lb mole	greater 74
6. Throughput for the most recent calendar year (gals/year)	storage 9,700
7. Tank Capacity (gals)	202,680
8. Tank Diameter (feet)	34.5
9. Tank Height (feet)	29
10. Average Vapor Space Height (feet)	14
11. Tank Construction: Riveted or Welded	welded
12. Type of Tank: Fixed Roof, Floating, Variable, Pressure, Other	fixed roof
15. Tank paint color: White, Aluminum, Gray, Other	white
16. Tank paint condition: Good or Poor	good
17. Tank shell condition: Light rust, dense rust, gunite lined	good
18. Tank seal condition: Good or Poor	good
19. Date tank installed	1/62
20. Tank modifications: Give date and describe	none
21. Is the tank equipped with a vapor recovery system?	no
22. Average wind velocity of the area (miles/hour)	5mph

Item No. For Most Recent Calendar Year (loading/unloading information)	
1. Product transferred: crude oil, gasoline, etc.	Pine Oil
2. Amount transferred (loading), gals/day	0
3. Amount transferred (unloading), gals/day	0
4. Amount transferred (pipe line), gals/day	0
5. Bulk temperature of the product, °F	Ambient
6. True vapor pressure of the product at storage temperature, psia	2.1/100°
7. Reid vapor pressure of the product, psia	NA
8. Molecular weight of the product, lb/lb mole	greater 74
9. Density of the product at bulk temperature (lbs/gal)	7.8
10. Type of loading: vessel, barge, truck, other (specify)	vessel
11. Type of filling: submerged, fill pipe splash filling, bottom filling, other(specify)	bottom
11a. If submerged fill is used, what approximate percent is the fill pipe submerged	-
12. Type of service: dedicated service to one product, vapor balance service, other(specify)	storage
13. Is loading/unloading operation equipped with vapor recovery or other pollution control system(specify)	conservation vent
14. Efficiency of vapor collection system	NA

2. Amount transferred (loading), gals/day	-0-
3. Amount transferred (unloading), gals/day	-0-
4. Amount transferred (pipe line), gals/day	-0-
5. Bulk temperature of the product, °F	N/A
6. True vapor pressure of the product at storage temperature, psia	N/A
7. Reid vapor pressure of the product, psia	N/A
8. Molecular weight of the product, lb/lb mole	N/A
9. Density of the product at bulk temperature (lbs/gal)	N/A
10. Type of loading: vessel, barge, truck, other (specify)	Vessel
11. Type of filling: submerged, fill pipe splash filling, bottom filling, other(specify)	Top
11a. If submerged fill is used, what approximate percent is the fill pipe submerged	
12. Type of service: dedicated service to one product, vapor balance service, other(specify)	Out of Service
13. Is loading/unloading operation equipped with vapor recovery or other pollution control system(specify)	Conservation Vent
14. Efficiency of vapor collection system

Empty Out of Service

1. Product stored; e.g. crude oil, gasoline, etc.	
2. True vapor pressure of product at storage temperature (PSIA/°F)	N/A
3. Reid vapor pressure of product at storage temperature (PSIA/°F)	N/A
4. Density of product stored at storage temperature (lbs/gal)	N/A
5. Molecular weight of product vapor at storage temperature lb/lb mole	N/A
6. Throughput for the most recent calendar year (gals/year)	-0-
7. Tank Capacity (gals)	7,772
8. Tank Diameter (feet)	10.5
9. Tank Height (feet)	12
10. Average Vapor Space Height (feet)	12
11. Tank Construction: Riveted or Welded	Riveted
12. Type of Tank: Fixed Roof, Floating, Variable, Pressure, Other	Fixed Roof
15. Tank paint color: White, Aluminum, Gray, Other	Aluminum
16. Tank paint condition: Good or Poor	Good
17. Tank shell condition: Light rust, dense rust, gunite lined	Good
18. Tank seal condition: Good or or Poor	Good
19. Date tank installed	N/A
20. Tank modifications: Give date and describe	None
21. Is the tank equipped with a vapor recovery system?	No
22. Average wind velocity of the area (miles/hour)	5mph

RETURN RECEIPT REQUESTED
P 004 497 687

Mr. Don Watts
Bureau of Pollution Control
P. O. Box 10385
Jackson, MS 39209

Dear Mr. Watts:

Operating Permit No. 0800-00001

Please find the enclosed emissions testing data and storage tank data forms as required by Part III, other requirements, Item (8).

Enclosed are:

(1) October 6, 1987 letter - outlining the scope of the work requirements, with an update.

(2) Emissions testing data.

(3) Storage tank data forms.

As discussed in our phone conservation, when you receive this information packet please call me at your convenience to discuss if any additional information may be needed to complete this requirement.

Very truly yours,

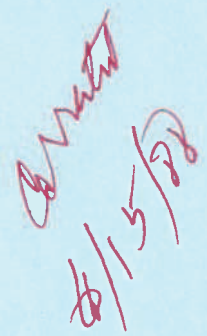

Charles S. Jordan

Charles S. Jordan
Environmental Supervisor

ITEM NO. FOR MOST RECENT CALENDAR YEAR (LOADING/UNLOADING INFORMATION)	
1. PRODUCT TRANSFERRED: CRUDE OIL, GASOLINE, ETC.	PEXOIL LT. ENDS
2. AMOUNT TRANSFERRED (LOADING), GALS/DAY	1
3. AMOUNT TRANSFERRED (UNLOADING), GALS/DAY	1
4. AMOUNT TRANSFERRED (PIPE LINE), GALS/DAY	-
5. BULK TEMPERATURE OF THE PRODUCT, °F	APP. 250°
6. TRUE VAPOR PRESSURE OF THE PRODUCT AT STORAGE TEMPERATURE, PSIA	.3MMHG/250
7. REID VAPOR PRESSURE OF THE PRODUCT, PSIA	NA
8. MOLECULAR WEIGHT OF THE PRODUCT, LB/LB MOLE	APP. 302
9. DENSITY OF THE PRODUCT AT BULK TEMPERATURE (LBS/GAL)	APP. 8.2
10. TYPE OF LOADING: VESSEL, BARGE, TRUCK, OTHER (SPECIFY)	VESSEL
11. TYPE OF FILLING: SUBMERGED, FILL PIPE SPLASH FILLING, BOTTOM FILLING, OTHER(SPECIFY)	TOP
11A. IF SUBMERGED FILL IS USED, WHAT APPROXIMATE PERCENT IS THE FILL PIPE SUBMERGED	-
12. TYPE OF SERVICE: DEDICATED SERVICE TO ONE PRODUCT, VAPOR BALANCE SERVICE, OTHER(SPECIFY)	CATCH TANK
13. IS LOADING/UNLOADING OPERATION EQUIPPED WITH VAPOR RECOVERY OR OTHER POLLUTION CONTROL SYSTEM(SPECIFY)	NO
14. EFFICIENCY OF VAPOR COLLECTION SYSTEM	-

FACILITY NAME HERCULES INCORPORATED

FACILITY ADDRESS W. 7TH STREET, HATTIESBURG

TANK IDENTIFICATION NO./NAME FL-10 M-1084

1. Product stored; e.g. crude oil, gasoline, etc.	Resin Foralax
2. True vapor pressure of product at storage temperature (PSIA/°F)	.5mmHg/350°
3. Reid vapor pressure of product at storage temperature (PSIA/°F)	NA
4. Density of product stored at storage temperature (lbs/gal)	app. 8.33
5. Molecular weight of product vapor at storage temperature lb/lb mole	greater 302
6. Throughput for the most recent calendar year (gals/year)	1,000,000
7. Tank Capacity (gals)	56,868
8. Tank Diameter (feet)	11
9. Tank Height (feet)	20
10. Average Vapor Space Height (feet)	10
11. Tank Construction: Riveted or Welded	insulated
12. Type of Tank: Fixed Roof, Floating, Variable, Pressure, Other	fixed roof
15. Tank paint color: White, Aluminum, Gray, Other	insulated
16. Tank paint condition: Good or Poor	insulated
17. Tank shell condition: Light rust, dense rust, gunite lined	insulated
18. Tank seal condition: Good or Poor	good
19. Date tank installed	NA
20. Tank modifications: Give date and describe	none
21. Is the tank equipped with a vapor recovery system?	no
22. Average wind velocity of the area (miles/hour)	5mph

MANUFACTURING PROCESS OPERATIONS

Page 1

1. Company Name and Address, plus year for which information is given (if existing facility) at top of page. Use data for must recent calendar year available.
2. Reference Number. Use an identifying number for each manufacturing process which emits matter to the air and use the same number on all three pages of this form to identify information for the same operation.
3. Process or Unit Operation Name. Identify the unit or process section for which information is given by name.
4. Rated Process Capacity. Give in tons per hour the maximum rated capacity of the process or unit identified, wet weight.
5. Feed Input. Process rate in wet tons per hour and wet tons per year of materials fed to the operation.
6. Number of Emission Points to Air. Number of stacks, vents, etc., which emit materials to air.
7. Product Output. Product rate in wet tons per hour and wet tons per year from the operation.

Page 2

8. Reference Number. Use same number as on Page 1 of form to identify information for same process or operation.
9. Stack Data (or outlet of air cleaning device).
   Stack Height in feet above ground.
   Stack Inside Diameter in Feet.
   Exit Gas Velocity in feet per second. (SCFM may be used if velocity is not known; specify units as SCFM if used).
   Exit Gas Temperature in degrees F.
10. Air Pollution Control Equipment.
    Manufacturer and Model Number. Nameplate Data.
    Type. Use Table 1, Page 16. If a wet scrubber, give water flow in GPM and water pressure.
    Collection efficiency. Design and actual collection efficiency if known.

Page 3

11. Reference Number. Use same number as on Pages 1 & 2 of form to identify information for same process or operation.
12. Process Emissions. Give in pounds per hour and tons per year the amount of emissions from the process or operation of each of the two pollutant categories so that process rates versus emission rates may be compared with Regulations. Identify the units of measure used.
    Give the basis of the estimates of pollutants emitted (stack tests, material balance, emission factors, etc.)

2. Reference Number. Use an identifying number for each manufacturing process which emits matter to the air and use the same number on all three pages of this form to identify information for the same operation.
3. Process or Unit Operation Name. Identify the unit or process section for which information is given by name.
4. Rated Process Capacity. Give in tons per hour the maximum rated capacity of the process or unit identified, wet weight.
5. Feed Input. Process rate in wet tons per hour and wet tons per year of materials fed to the operation.
6. Number of Emission Points to Air. Number of stacks, vents, etc., which emit materials to air.
7. Product Output. Product rate in wet tons per hour and wet tons per year from the operation.

Page 2

8. Reference Number. Use same number as on Page 1 of form to identify information for same process or operation.
9. Stack Data (or outlet of air cleaning device).
   Stack Height in feet above ground.
   Stack Inside Diameter in Feet.
   Exit Gas Velocity in feet per second. (SCFM may be used if velocity is not known; specify units as SCFM if used).
   Exit Gas Temperature in degrees F.
10. Air Pollution Control Equipment.
    Manufacturer and Model Number. Nameplate Data.
    Type. Use Table 1, Page 16. If a wet scrubber, give water flow in GPM and water pressure.
    Collection efficiency. Design and actual collection efficiency if known.

Page 3

11. Reference Number. Use same number as on Pages 1 & 2 of form to identify information for same process or operation.
12. Process Emissions. Give in pounds per hour and tons per year the amount of emissions from the process or operation of each of the two pollutant categories so that process rates versus emission rates may be compared with Regulations. Identify the units of measure used.
    Give the basis of the estimates of pollutants emitted (stack tests, material balance, emission factors, etc.)
