OFFICE OF POLLUTION CONTROL MATTER:**

ENVIRONMENTAL PERMITS DIVISION

Nicholson Water and Sewer Association

Reissuance of NPDES Permit	Pearl River County	MS0033871
----------------------------	--------------------	-----------

Nicholson Water and Sewer Association permit reissuance was presented to the Permit Board on February 12, 2013. In a letter and telephone conversations with staff of MDEQ, Mr. Clifford Mitchell, a neighboring property owner, had expressed concerns about the facility being located in the 100 year flood base and the McCall River being polluted by the discharge. Also, Mr. Mitchell had concerns regarding the high water conditions and a violation of the 150 ft buffer zone to his property.

Staff explained to the Board that each of these concerns had been addressed in the application review and the development of the final draft NPDES permit. On motion by Jim Lipe and seconded by Dennis Riecke, the Permit Board unanimously voted to approve reissuance of NPDES Permit to Nicholson Water and Sewer Association located in Pearl River County, Permit No. MS0033871.

**Mississippi Power Company,
Plant Victor J. Daniel, Gypsum Storage Facility**

On February 12, 2013, Harry Wilson, Chief of the Environmental Permits Division, presented the matter of the proposal for issuance of three environmental permits for Mississippi Power Company, Plant Victor J. Daniels to the Permit Board. The permits specifically were Solid Waste Management Permit No. SW0300040559, Section 401 Water Quality Certification No. WQC2011047, and Underground Injection Control Permit No. MSI1006. Mr. Wilson explained that the draft permits went through a 30 day comment period and a public hearing was held on January 22, 2013. He further explained that there were no comments received during the 30 day comment period or at the public hearing. Mr. Wilson also noted some comment letters were received after the comment period and the hearing was conducted. In response to comments from Mr. John Ford, staff reviewed these comments and the UIC Permit staff recommended semiannual mercury monitoring of the injection fluid be added to the UIC Permit. The Permit Board asked questions about any requirements for mercury testing in the associated monitoring wells for the solid waste management permit. After a short recess, staff recommended that mercury monitoring be added to the monitoring well testing requirements of the Solid Waste Management Permit with mercury to be tested semiannually the first year and annually thereafter. No questions or additions were discussed with regard to the Section 401 Water Quality Certification. The Permit Board asked for final recommendations for all three environmental permits, and Staff recommended issuance of all three permits with the above additional mercury monitoring requirements in the UIC and Solid Waste Management Permits. The Permit Board voted on the three permits individually, and all three permits were issued with the additional recommended mercury monitoring requirements in the UIC and Solid Waste Management Permits.
