Subject: Joint Application and Notification – Ward-Gulfport Development Supplemental Materials

We are providing the following supplemental documents to support your review of the Joint Application and Notification Form for the Ward-Gulfport Development Project in Gulfport, Harrison County, Mississippi. These materials were compiled at the request of the U.S. Army Corps of Engineers, prior to issuing the Public Notice for the application.

1. Revised Figure A-15 (proposed project plan) to clearly identify both total and wetland acreages disturbed, by parcel. This table also clarifies wetland fill vs. wetland excavation areas.
2. A revised existing conditions graphic depicting the onsite ditches (Figure A-8).
3. A revised Figure C-7, Proposed Condition Drainage Basins - the legend has been modified so the terminology used to refer to the ditches is consistent with the text and other graphics.
4. Text characterizing the ditches in more detail, with references to revised Figures A-8 and Figure C-7.

We appreciate your continued participation in the planning process for the proposed project. If you would like to receive these documents in hard copy or on a CD, need additional information, or have any questions regarding this project, please feel free to contact Sherri McNulty at (228) 261-2917 or email [sherri@wardinvestment.com](mailto:sherri@wardinvestment.com).

Sincerely,

Jerard Ward  
Ward Investment
