Modification of Ready Mix Concrete General Permit (Coverage # MSG 110038)**

MMC Materials, Inc. (“MMC”) submitted a major modification form notifying MDEQ of its intent to expand its existing ready-mix concrete facility located in Horn Lake, Mississippi. Michael Griffith, of MDEQ’s Environmental Permits Division (“EPD”), informed the Permit Board that MMC already has a certificate of coverage under the Ready-Mix Concrete General Permit. Mr. Griffith stated that a facility seeking to modify its footprint from what it identified in its original Ready-Mix Concrete Notice of Intent, must submit a major modification form. MMC complied with the requirements by submitting a major modification form and a modified Storm Water Pollution Prevention Plan (“SWPPP”). MDEQ deemed the modification form completed and determined that the SWPPP would adequately address storm water discharges from the facility.

As part of the application process, MMC was required to notify contiguous land owners, via certified-return receipt requested mail, of the proposed modification. MDEQ received one letter from a contiguous land owner objecting to the modification. The land owner specifically stated health concerns and concerns with the proximity of the plant location to a residential development and zoning. MDEQ replied to this letter of concern on June 1, 2016.

MDEQ notified interested parties that the Permit Board would consider the modification process at this meeting. While the Permit Board invited opponents to address their concerns at the meeting, no one in attendance requested to speak in opposition to the proposed modification.

Mr. Griffith stated that, based upon staff’s review of the major modification form and the SWPPP, MMC’s application was complete and that MMC met all technical requirements allowing it to expand its facility. Mr. Griffith stated that MDEQ staff recommended issuance of the modification.

On motion by Dennis Riecke and seconded by Jim Hoffmann, the Permit Board voted to accept the staff’s recommendation to issue the permit.

Lankford plans to mine 25 acres to a total depth of 20 feet for borrow material. Lankford will control sediment and erosion from the mine by installing a settling pond. Reclamation will consist of 3 to 1 slopes, grass cover, and a pond. During the public notice process, the Mississippi Department of Archives and History ("MDAH") requested a cultural resources survey, which has now been completed and approved by MDAH. The applicant also sought a determination from the United States Army Corps of Engineers ("USACE"), whether the applicant would need to obtain a federal Clean Water Act Section 404 permit for the project. USACE did not require the applicant to obtain a Section 404 permit. Lankford obtained local zoning approval for the mine. No one spoke on behalf of or against this application at the Permit Board meeting.

On motion by Julie McLemore and seconded by Dennis Riecke, the Permit Board voted to accept the staff's recommendation to issue the following surface mining permit (Michael Bograd abstained):
