**WASTE DISPOSAL INFORMATION**

1. List the total amount of waste disposed at the facility by source. It is assumed that most non-commercial rubbish sites in the state receive primarily in-state wastes; however state law requires rubbish to report the amount of out-of-state wastes disposed, if any.

SOURCE	In-State	Out-of-State	Total
<b>Tons of waste disposed</b>			

2. List the individual counties from which wastes originated with a clear indication of those wastes originating from out-of-state communities, if applicable, and the total amount of waste received from each county or state.

County	State	Tons

County	State	Tons

3. State law requires that each load of waste received for disposal be recorded and reported in units of tons. Check the box below that most accurately describes how the tonnage was determined. (Check all that apply)

- Weight Scales. The scales used are located  on-site  off-site.
- Converted each load from cubic yards using MDEQ conversion factors. (See number 4)
- Other; did not convert each load or used an alternate conversion factor(s). (See number 4)

4. For those facilities that did not use weight scales and calculated tonnage by conversion, please describe the manner in which tonnage was determined in the space below or on attached sheets. Sample calculations and an indication of each conversion factor used should be provided.

**REMAINING CAPACITY AND LIFE ESTIMATES**

5. Provide an estimate of the remaining unused, permitted disposal capacity of the rubbish site in acres and cubic yards.

<b>Remaining Capacity</b>	<b>Acres</b>	<b>Cubic Yards</b>
<b>Permitted</b>		
<b>Used</b>		
<b>Remaining (Permitted – Used)</b>		

6. Provide the estimated remaining life of the rubbish site in years.

**Estimated Remaining Life: \_\_\_\_\_ years**

In the space provided below describe how this remaining life estimate was determined:
