ACT0000000002 (WDLSP) Introduction:

Narrative Requirements:

Condition No.	Condition
---------------	-----------

T-1 Introduction:

The Wet Deck Log Spray with Recirculation General Permit (WDLSP) authorizes discharges from Wet Deck Log Spray (WDL) recirculation systems. Discharges from WDL facilities that enter state waters or conveyance systems leading to state waters are subject to regulation and compliance with the conditions set forth in this permit.

This permit also authorizes storm water discharges from other industrial activities, designated by the Executive Director based on the potential for contribution to an excursion of a water quality standard or for significant contribution of pollutants to state waters. This permit replaces the previous Wet Deck Log Spray with Recirculation General Permit that expired on December 31, 2010. [11 Miss. Admin. Code Pt. 6, Ch. 1.]

ACT0000000003 (WDLSP) Permit Applicability and Coverage:

Narrative Requirements:

Condition No.	Condition
T-1	<p>Permit Area:</p> <p>The Wet Deck Log Spray with Recirculation General Permit covers all areas of the State of Mississippi. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
T-2	<p>Eligibility:</p> <p>(1) Discharges from Wet Deck Log Spray (WDLSP) Recirculation pond, including water which is sprayed onto the timber, storm water run-off from the timber wet deck storage area, boiler blowdown**, and exterior equipment** and exterior vehicle** washwater where no internal washing or engine washing is occurring and where no detergents or chemicals are being used.</p> <p>** The WDLSP recirculation system coverage is only for systems that are operated in a no discharge manner and only discharge intermittently as a direct result of rainfall. As a result, facilities which discharge or will discharge boiler blowdown or washwater into the WDLSP system are only eligible for coverage if these discharges are small in volume and will not interfere with the no discharge operation of the system. Facilities with these operations will be reviewed on a case by case basis to determine if general permit coverage or an individual permit issuance is more appropriate.</p> <p>(2) Discharges composed entirely of storm water and allowable non-storm water discharges identified in ACT3, T-4.</p> <p>(3) A facility is eligible for coverage under this general permit for discharges of pollutants of concern to water bodies for which there is a Total Maximum Daily Load (TMDL) established or approved by the Environmental Protection Agency if measures and controls are incorporated that are consistent with the assumptions and requirements of such TMDL. To be eligible for coverage under this general permit, the facility must incorporate any conditions applicable to any discharge(s) necessary for consistency with the assumptions and requirements of such TMDL. If, after coverage issuance, a specific wasteload allocation is established that would apply to the facility's discharge, the facility must implement steps necessary to meet that allocation. [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>

T-3 Eligibility (continued):

(4) Discharges must not cause nor contribute to violations of State Water Quality Standards. If a discharge authorized under this permit is later determined to cause or have the reasonable potential to cause or contribute to the violation of an applicable water quality standard, MDEQ will notify the regulated entity of such water quality violation(s) in writing and will provide the information used by MDEQ to make this determination. The regulated entity must take all necessary actions required to ensure future discharges do not cause or contribute to the violation of a water quality standard. If such violations remain or re-occur, then additional measures, such as the addition of Best Management Practices (BMPs) or the requirement to obtain an individual permit, may be required by the Permit Board. Compliance with this requirement does not preclude any enforcement activity as provided by the Clean Water Act for the underlying violation.

(5) Coverage under this permit is available only if the regulated entity's discharges, allowable non-stormwater discharges, and discharge related activities are not likely to jeopardize the continued existence of any species that is listed as endangered or threatened ("listed") under the Endangered Species Act (ESA) or result in the adverse modification or destruction of habitat that is designated as critical under the ESA ("critical habitat"). T-4 Eligibility (continued):

(6) Allowable Non-Storm Water Discharges (listed below) provided they do not cause or contribute to a violation of water quality standards:

- Discharges from actual fire-fighting activities
- Fire hydrant flushings
- Water used to control dust
- Potable water sources including uncontaminated water line flushing
- Routine external building wash down that does not use detergents
- Pavement wash waters where spills or leaks of toxic or hazardous materials have not occurred (unless all spilled material has been removed) and where detergents are not used
- Uncontaminated air conditioning or compressor condensate
- Uncontaminated ground water or spring water
- Foundation or footing drains where flows are not contaminated with process materials such as solvents
- Uncontaminated excavation dewatering
- Landscape irrigation

The above non-stormwater discharges and those identified in ACT3, T-2 should be eliminated or reduced to the extent feasible. The Permit Board staff will review the above discharges on a case by case basis and may require the coverage recipient to apply for and obtain either an individual or an alternate general NPDES Permit.

Coverage under the State of Mississippi Baseline Storm Water General Permit is required for discharges of storm water from industrial activities that do not drain to the WDLS process. [11 Miss. Admin. Code Pt. 6, Ch. 1.]

S-1	<p>How to Obtain Authorization:</p> <p>(1) Owners and/or operators (see Definitions) must submit a Wet Deck Log Spray with Recirculation Notice of Intent (WDL NOI) and other required submittals in accordance with the requirements of this permit.</p> <p>The owner(s) of the property and the operator(s) associated with the regulated construction activity on the property have joint and severable responsibility for compliance with the permit. Notwithstanding any permit condition to the contrary, the coverage recipient and any person who causes pollution of waters of the state or places waste in a location where they are likely to cause pollution, shall remain responsible under applicable federal and state laws and regulations, and applicable permits.</p> <p>(2) Upon review of the WDL NOI and other required submittals, the MDEQ staff may require additional information, recommend that coverage not be granted and/or that an alternate permit would be more appropriate. The MDEQ staff recommendations may be brought before the Mississippi Environmental Quality Permit Board (Permit Board) for review and consideration at a regularly scheduled meeting, or at a special meeting at its discretion.</p> <p>(3) Coverage under this permit will not be granted until all other required MDEQ permits, certifications and approvals are satisfactorily addressed.</p> <p>(4) Owners or operators are authorized to discharge under the terms and conditions of this permit only upon receipt of written notification of approval of coverage by the Permit Board staff. Discharge without written notification of coverage or issuance of an individual National Pollutant Discharge Elimination System (NPDES) Storm Water Permit constitutes a violation of the Mississippi Air and Water Pollution Control Law 49-17-29(2)(b). [11 Miss. Admin. Code Pt. 6, Ch. 1.]</p>
S-2	<p>Contiguous Landowner Notification.</p> <p>For a new or expanding facility, the applicant must notify the contiguous landowners to the proposed facility utilizing Certified-Return Receipt Requested mail. Contiguous landowners shall be notified using the form provided in the Forms Package. A copy of the completed form shall be submitted to MDEQ for informational purposes. Copies of the signed receipts and notification forms shall be submitted with the WDL NOI. Failure to notify the contiguous landowners may be cause for denial or revocation of coverage. If the facility was in existence and operating prior to the issuance date of this permit and no expansion of the facility footprint or operating capacity is proposed, contiguous landowner notification is not required. S-4	<p>Requiring an Individual Permit or Alternative General Permit:</p> <p>(1) The Permit Board may require any coverage recipient to apply for and obtain either an individual or an alternative general NPDES permit. Any interested person may petition the Permit Board to take action under this paragraph. The Permit Board may require any coverage recipient to apply for an individual NPDES permit only if the coverage recipient has been notified in writing. Such notice shall include reasons for the Permit Board's decision, an application form and a filing deadline. The Permit Board may grant additional time at its discretion. If a coverage recipient fails to submit a requested application in a timely manner, coverage under this permit is automatically terminated at the end of the day specified for application submittal.</p> <p>(2) Any coverage recipient may request to be excluded from permit coverage by applying for an individual permit or coverage under another general permit. The applicant shall submit the appropriate individual application or Notice of Intent.</p> <p>(3) Coverage under this permit is automatically terminated on the issuance date of the respective alternative individual or general permit.
