**Energy and Transportation Branch
Mississippi Power Company, Kemper County, IGCC Facility**

Bryan Collins of the Environmental Permits Division made a presentation regarding the proposed issuance of NPDES Permit No. MS0061751 to Mississippi Power Company, Kemper County, Mississippi. MDEQ published a public notice of the proposed permit on October 3, 2013. Mr. Andrew Whitehurst with the Gulf Restoration Network was present to address his concerns to the Permit Board. Mr. Whitehurst's concerns included the lack of monitoring of gray water, the alleged deficiency in the anti-degradation report submitted by Mississippi Power Company, and the lack of treatment of ash pond storm water runoff prior to discharge.

MDEQ also received a letter from the Sierra Club on November 4, 2013, with similar concerns and requesting that MDEQ perform further assessments. MDEQ staff informed the Permit Board that the parameters included in the draft permit were adequate and protective of the receiving streams and further informed the Board that the proposed permit complied with all regulatory requirements.

Leslie Royals moved to issue the NPDES Permit with an added monitoring requirement for fecal coliform for the first three storm events in addition to water quality monitoring. MDEQ would then evaluate whether further monitoring should continue. David Snodgrass seconded the motion and the Permit Board voted to issue the permit with the additional fecal coliform monitoring requirement.

Finally, Mr. Collins asked the Board to approve his request to revoke State Operating Permit for the ash pond runoff Permit No. MSU09005 issued March 9, 2010, upon approval and issuance of NPDES Permit No. MS0061751. On motion by Jan Boyd and seconded by Dennis Riecke, the Board voted to accept Mr. Collins request to revoke State Operating Permit No. MSU09005 upon issuance of NPDES Permit No. MS0061751.
