Analytical Report for Service Request No: K0803953

Richard Johnson  
Environmental Chemistry Consulting Services, Inc.  
2525 Advance Rd.  
Madison, WI 53718

**RE: Kuhlman Electric**

Dear Richard:

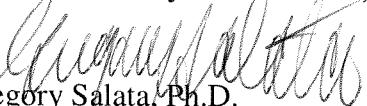

Enclosed are the results of the samples submitted to our laboratory on May 08, 2008. For your reference, these analyses have been assigned our service request number K0803953.

All analyses were performed according to our laboratory's quality assurance program. Where applicable, the methods cited conform to the Methods Update Rule (effective 4/11/2007), which relates to the use of analytical methods for the drinking water and waste water programs. The test results meet requirements of the NELAC standards. Exceptions are noted in the case narrative report where applicable. All results are intended to be considered in their entirety, and Columbia Analytical Services, Inc. (CAS) is not responsible for use of less than the complete report. Results apply only to the items submitted to the laboratory for analysis and individual items (samples) analyzed, as listed in the report.

Please call if you have any questions. My extension is 3376. You may also contact me via Email at GSalata@caslab.com.

Respectfully submitted,

**Columbia Analytical Services, Inc.**

Gregory Salata, Ph.D.  
Project Chemist

| TPH        | Total Petroleum Hydrocarbons   |
| tr         | Trace level is the concentration of an analyte that is less than the PQL but greater than or equal to the MDL.                           |

## Inorganic Data Qualifiers

- \* The result is an outlier. See case narrative.
- # The control limit criteria is not applicable. See case narrative.
- B The analyte was found in the associated method blank at a level that is significant relative to the sample result.
- E The result is an estimate amount because the value exceeded the instrument calibration range.
- J The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.
- U The compound was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL.
- i The MRL/MDL has been elevated due to a matrix interference.
- X See case narrative.

## Metals Data Qualifiers

- # The control limit criteria is not applicable. See case narrative.
- B The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.
- E The percent difference for the serial dilution was greater than 10%, indicating a possible matrix interference in the sample.
- M The duplicate injection precision was not met.
- N The Matrix Spike sample recovery is not within control limits. See case narrative.
- S The reported value was determined by the Method of Standard Additions (MSA).
- U The compound was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL.
- W The post-digestion spike for furnace AA analysis is out of control limits, while sample absorbance is less than 50% of spike absorbance.
- i The MRL/MDL has been elevated due to a matrix interference.
- X See case narrative.
- \* The duplicate analysis not within control limits. See case narrative.
- + The correlation coefficient for the MSA is less than 0.995.

## Organic Data Qualifiers

- \* The result is an outlier. See case narrative.
- # The control limit criteria is not applicable. See case narrative.
- A A tentatively identified compound, a suspected aldol-condensation product.
- B The analyte was found in the associated method blank at a level that is significant relative to the sample result.
- C The analyte was qualitatively confirmed using GC/MS techniques, pattern recognition, or by comparing to historical data.
- D The reported result is from a dilution.
- E The result is an estimate amount because the value exceeded the instrument calibration range.
- J The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.
- N The result is presumptive. The analyte was tentatively identified, but a confirmation analysis was not performed.
- P The GC or HPLC confirmation criteria was exceeded. The relative percent difference is greater than 40% between the two analytical results (25% for CLP Pesticides).
- U The compound was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL.
- i The MRL/MDL has been elevated due to a chromatographic interference.
- X See case narrative.

## Additional Petroleum Hydrocarbon Specific Qualifiers

- F The chromatographic fingerprint of the sample matches the elution pattern of the calibration standard.
- L The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of lighter molecular weight constituents than the calibration standard.
- H The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of heavier molecular weight constituents than the calibration standard.
- O The chromatographic fingerprint of the sample resembles an oil, but does not match the calibration standard.
- Y The chromatographic fingerprint of the sample resembles a petroleum product eluting in approximately the correct carbon range, but the elution pattern does not match the calibration standard.
- Z The chromatographic fingerprint does not resemble a petroleum product.

## **Case Narrative**

## COLUMBIA ANALYTICAL SERVICES, INC.

**Client:** Environmental Chemistry Consulting Services, Inc. **Service Request No.:** K0803953  
**Project:** Kuhlman Electric **Date Received:** 05/08/08  
**Sample Matrix:** Water

### CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of Columbia Analytical Services, Inc. (CAS). This report contains analytical results for samples designated for Tier II data deliverables. When appropriate to the method, method blank results have been reported with each analytical test. Surrogate recoveries have been reported for all applicable organic analyses. Additional quality control analyses reported herein include: Matrix/Duplicate Matrix Spike (MS/DMS), and Laboratory/Duplicate Laboratory Control Sample (LCS/DLCS).

#### **Sample Receipt**

Three water samples were received for analysis at Columbia Analytical Services on 05/08/08. The samples were received in good condition and consistent with the accompanying chain of custody form. The samples were stored in a refrigerator at 4°C upon receipt at the laboratory.

#### **Volatile Organic Compounds by EPA Method 8260B**

##### **Initial Calibration (ICAL) Exceptions:**

The primary evaluation criterion was exceeded for Bromomethane and Methylene Chloride in ICAL ID 7334. In accordance with CAS standard operating procedures, the alternative evaluation specified in the EPA method was performed using the mean Relative Standard Deviation (RSD) of all analytes in the calibration. The result of the mean RSD calculation was 7.3%. The calibration meets the alternative evaluation criteria. Note that CAS/Kelso policy does not allow the use of averaging if any analyte in the ICAL exceeds 30% RSD.

##### **Continuing Calibration Verification Exceptions:**

The CAS minimum relative response factor criterion for Bromomethane was not met in CCV J:\MS04\0514F003.D. In accordance with CAS standard operating procedures, a Method Reporting Limit (MRL) check standard containing the analyte of concern was analyzed each day of analysis. The MRL check standard verifies instrument sensitivity was adequate to detect the analyte at the MRL on the day of analysis. Because the sensitivity was shown to be adequate to detect the compound in question and the compound was not detected in the field sample, the data quality is not significantly affected. No further corrective action was appropriate.

No other anomalies associated with the analysis of these samples were observed.

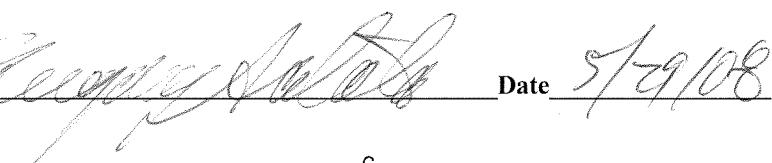

#### **1,4-Dioxane by EPA Method 8270C**

##### **Sample Notes and Discussion**

Insufficient sample volume was received to perform a Matrix Spike/Matrix Spike Duplicate (MS/MSD). A Laboratory Control Sample/Duplicate Laboratory Control Sample (LCS/DLCS) was analyzed and reported in lieu of the MS/MSD for these samples.

No other anomalies associated with the analysis of these samples were observed.

**Service Request:** K0803953**Surrogate Recovery Summary  
1,4-Dioxane by GC/MS**

**Extraction Method:** EPA 3510C  
**Analysis Method:** 8270C SIM

**Units:** PERCENT  
**Level:** Low

| <b>Sample Name</b>           | <b>Lab Code</b> | <b>Sur1</b> |
|------------------------------|-----------------|-------------|
| CSW-WA1-024                  | K0803953-001    | 85          |
| Duplicate                    | K0803953-002    | 89          |
| Method Blank                 | KWG0804444-3    | 82          |
| Lab Control Sample           | KWG0804444-1    | 87          |
| Duplicate Lab Control Sample | KWG0804444-2    | 76          |

**Surrogate Recovery Control Limits (%)**

---

Sur1 = 1,4-Dioxane-d8                    55-100

---

Results flagged with an asterisk (\*) indicate values outside control criteria.

Results flagged with a pound (#) indicate the control criteria is not applicable.

## QA/QC Report

**Client:** Environmental Chemistry Consulting Servi  
**Project:** Kuhlman Electric  
**Sample Matrix:** Water

**Service Request:** K0803953  
**Date Extracted:** 05/13/2008  
**Date Analyzed:** 05/27/2008

**Lab Control Spike/Duplicate Lab Control Spike Summary  
1,4-Dioxane by GC/MS**

**Extraction Method:** EPA 3510C  
**Analysis Method:** 8270C SIM

**Units:** ug/L

**Basis:** NA

**Level:** Low

**Extraction Lot:** KWG0804444

Results flagged with an asterisk (\*) indicate values outside control criteria.

Percent recoveries and relative percent differences (RPD) are determined by the software using values in the calculation which have not been rounded.
