

## **General Permits Notice of Intent**

### Baseline Notice of Intent (BNOI)

For industries that that will have industrial material and conduct activities that will be exposed to rain, snow, snowmelt, and/or runoff. Industrial materials or activities include, but are not limited to, material handling equipment or activities, industrial machinery, raw materials, intermediate products, by-products, final products, or waste products. Material handling activities include the storage, loading and unloading, transportation, or conveyance of any raw material, intermediate product, final product, or waste product. A storm resistant shelter is not required for the following industrial materials and activities

- drums, barrels, tanks, and similar containers that are tightly sealed, provided those containers are not deteriorated and do not leak. “Sealed” means banded or otherwise secured and without operational taps or valves;
- adequately maintained vehicles used in material handling; and
- final products, other than products that would be mobilized in storm water discharges (e.g. rock salt).

### Construction Notice of Intent (CNOI)

For construction activities including clearing, grading, and excavation activities that result in the disturbance of five (5) or more acres.

### Land Disposal Notice of Intent (LNOI)

For industrial disposal activities, including but not limited to, Class I rubbish disposal sites that accept any type of industrial waste. “Industrial Waste” has been defined under the Industrial/Non-Municipal Solid Waste Landfill portion of the Solid Waste & Mining Permits section of Permit Types.

### Mining Notice of Intent (MNOI)

For surface mining activities, regardless of size as permitted by the Office of Geology, that discharge stormwater to surface waters of the State of Mississippi.

### No Exposure Certification

A condition of no exposure exists at an industrial facility when all industrial materials and activities are protected by a storm resistant shelter to prevent exposure to rain, snow, snowmelt, and/or runoff. See the above Baseline Notice of Intent for exclusions and definitions of industrial materials or activities and material handling activities. A No Exposure Certification must be provided for each facility qualifying for the no exposure exclusion. In addition, the exclusion from NPDES permitting is available on a facility-wide basis only, not for individual outfalls. If any industrial activities or materials are or will be exposed to precipitation, the facility is not eligible for the no exposure certification.
