**Mississippi Department of Environmental Quality (MDEQ)**

**MULTIMEDIA**  
**HOT MIX ASPHALT FACILITY GENERAL PERMIT**

**THIS CERTIFIES THAT**

Facilities issued a certificate of permit coverage under this permit are granted permission to:

- CONSTRUCT/OPERATE AIR EMISSIONS EQUIPMENT TO COMPLY WITH THE EMISSION LIMITATIONS, MONITORING REQUIREMENTS AND OTHER CONDITIONS SET FORTH HEREIN
- DISCHARGE STORM WATER ASSOCIATED WITH INDUSTRIAL AND CONSTRUCTION ACTIVITIES INTO STATE WATERS IN ACCORDANCE WITH THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM

in accordance with effluent limitations, inspection requirements and other conditions set forth in herein. This permit is issued in accordance with the provisions of the Mississippi Air and Water Pollution Control Law (Section 49-17-1 et seq., Mississippi Code of 1972), and the regulations and standards adopted and promulgated thereunder, and under authority granted pursuant to Section 402(b) of the Federal Water Pollution Control Act.

**ACT0000000001 (HMAGP - General) Introduction:**

**Narrative Requirements:**

Condition No.	Condition
T-1	<p>The Hot Mix Asphalt General Permit (HMAGP) authorizes permit coverage recipients to construct and operate air emissions equipment and to discharge storm water in accordance with limitations, monitoring requirements and other conditions set forth in this permit. Facilities requesting coverage under this permit must operate under Standard Industrial Classification (SIC) 2951. These are establishments primarily engaged in manufacturing asphalt and tar paving mixtures.</p> <p>Air emissions must be controlled via a baghouse or other device approved by MDEQ. Storm water includes discharges during construction and operation of the facility. Different sections or activities (ACTs) of this permit apply to these specific emissions and discharges. ACTs 1 through 4 and 21 through 24 of this permit apply to all covered emissions and discharges. The ACTs listed below are applicable to covered emissions and/or discharges and must be followed in addition to the requirements of ACTs 1 through 4 and 21 through 24 of this permit.</p> <p>ACTs 5 through 10    Air Emissions Associated with Operation and Construction</p> <p>ACTs 11 through 16    Storm Water Associated with Industrial Activity</p> <p>ACTs 17 through 20    Storm Water Associated with Construction Activity. No.

Condition

T-1

**PERMIT AREA:**

The permit covers the State of Mississippi.

**ELIGIBILITY:**

**COVERED EMISSIONS AND DISCHARGES:**

This permit may cover all new and existing hot mix asphalt producing facilities in the State of Mississippi which fall under Standard Industrial Classification (SIC) 2951 and have the following emissions or discharges:

- (1) Air emissions associated with the construction and operation of true minor, significant minor or synthetic minor hot mix asphalt facilities that are equipped with a baghouse (or other devices approved by MDEQ) for control of air emissions.
- (2) Fugitive air emissions from rock crushers and/or recycled asphalt pavement (RAP) crushers associated with hot mix asphalt facilities, which do not utilize capture or wet suppression systems to meet the emissions limits of this permit.
- (3) Storm water associated with industrial activity (facility operation).
- (4) Storm water associated with construction activity, including clearing, grading and excavation which disturbs one (1) or more acres, or less than one acre if part of a "larger common plan of development or sale", where the total acreage is based on cumulative planned disturbance (see Definitions contained in ACT24).

**ACT0000000002 (continued):**

**Narrative Requirements:**

Condition No.	Condition
T-2	<p>(5) Allowable non-storm water discharges (listed below) provided they do not cause or contribute to a violation of water quality standards.</p> <p>Discharges from actual fire-fighting activities Fire hydrant flushings Waters used to wash vehicles where detergents are not used Water used to control dust Potable water sources including water line flushings Routine external building wash down that does not use detergents Pavement wash waters where spills or leaks of toxic or hazardous materials have not occurred (unless all spilled material has been removed) and where detergents are not used Uncontaminated air conditioning or compressor condensate Uncontaminated ground water or spring water Foundation or footing drains where flows are not contaminated with process materials such as solvents Uncontaminated excavation dewatering</p> <p>As noted in ACT11, T-5 and ACT17, T-5, the above non-storm water discharges should be eliminated or reduced to the extent feasible. The Permit Board staff will review the above discharges on a case by case basis and may require the coverage recipient to apply for and obtain either an individual or an alternative general NPDES permit as provided in ACT3, S-2.</p> <p>(6) A facility is eligible for coverage under this general permit for discharges of pollutants of concern to water bodies for which there is an EPA-approved total maximum daily load (TMDL) if measures and controls are incorporated that are consistent with the assumptions and requirements of such TMDL. To be eligible for coverage under this general permit, the facility must incorporate in the SWPPP and/or effluent limitation any conditions applicable to any discharge(s) necessary for consistency with the assumptions and requirements of such TMDL. If a specific wasteload allocation has been established that would apply to the facility's discharge, subsequent to coverage issuance, the facility must implement steps necessary to meet that allocation. [WPC-1]</p>

Asphalt General Permit  
Facility Requirements

Activity ID No.: GNP20090001

Page 4 of 54

**ACT0000000002 (continued):**

**Narrative Requirements:**

Condition No.	Condition
T-3	<p><b>THIS PERMIT DOES NOT AUTHORIZE:</b></p> <p>(1) New or existing hot mix asphalt facilities using a diesel (fuel oil) fired generator for the purpose of power generation during the asphalt manufacturing process (other than temporary electric power outages). Such facilities are not eligible for coverage under this general permit and will be required to submit an application(s) for the appropriate individual permit(s) as described in ACT3.</p> <p>(2) Discharges which result in violation of State Water Quality Standards. If a discharge authorized under this permit is later determined to cause or have the reasonable potential to cause or contribute to the violation of an applicable water quality standard, MDEQ will notify the regulated entity of such water quality violation(s) in writing and will provide the information used by MDEQ to make this determination. The regulated entity must take all necessary actions required to ensure future discharges do not cause or contribute to the violation of a water quality standard. If such violations remain or re-occur, then additional measures, such as the addition of BMPs or the requirement to obtain an individual permit, may be required by the Permit Board. Compliance with this requirement does not preclude any enforcement activity as provided by the Clean Water Act for the underlying violation.</p> <p>(3) Activities that affect waters of the State, including wetlands, without obtaining the necessary U.S. Army Corps of Engineers (COE) individual Section 404 permit or coverage under a COE nationwide or general permit. Appropriate documentation must be submitted with the Hot Mix Asphalt Notice of Intent (HMANOI). [APC-S-2, WPC-1]</p>
T-4	<p>(4) Discharges or discharge-related activities that are likely to jeopardize the continued existence of any species that is listed as endangered or threatened under the Endangered Species Act (ESA) or result in the adverse modification or destruction of habitat that is designated as critical under the ESA. Coverage under this permit is available only if the regulated entity's storm water discharges, allowable non-storm water discharges, and discharge-related activities are not likely to jeopardize the continued existence of any species that is listed as endangered or threatened ("listed") under the ESA or result in the adverse modification or destruction of habitat that is designated as critical under the ESA ("critical habitat"). Submission of a signed NOI will be deemed to constitute the regulated entity's certification of eligibility. [WPC-1]</p>

**ACT0000000003 (HMAGP - General) Obtaining Coverage:**

**Submittal/Action Requirements:**

Condition No.	Condition
S-1	<p><b>OBTAINING AUTHORIZATION:</b></p> <p>(1) Owners and/or operators desiring coverage associated with hot mix asphalt activity under this permit must submit a Hot Mix Asphalt Notice of Intent (HMANOI) and required submittals in accordance with the requirements of this permit.</p> <p>(2) Upon review of a complete Hot Mix Asphalt Notice of Intent (HMANOI), MDEQ staff may require additional information, recommend that coverage not be granted and/or that an alternate permit would be more appropriate. The MDEQ staff recommendations may be brought before the Mississippi Environmental Quality Permit Board (Permit Board) for review and consideration at a regularly scheduled meeting or at a special meeting at its discretion.</p> <p>(3) Coverage under this permit will not be granted until all other required MDEQ permits, certifications and approvals are satisfactorily addressed.</p> <p>(4) Owners and/or operators are authorized to emit regulated air emissions and discharge storm water under the terms and conditions of this permit only upon receipt of written notification of approval of coverage by the Permit Board staff. Emissions or discharges without written notification of coverage under this permit, or issuance of the respective air and individual National Pollutant Discharge Elimination System (NPDES) permits constitute a violation of the Mississippi Air and Water Pollution Control Law (Miss. Code Ann. Section 49-17-29(2)(b)). [APC-S-2, WPC-1]</p>
S-2	<p><b>REQUIRING AN INDIVIDUAL PERMIT OR ALTERNATIVE GENERAL PERMIT:</b></p> <p>(1) The Permit Board may require any coverage recipient to apply for and obtain either an individual or an alternative general NPDES permit. Any interested person may petition the Permit Board to take action under this paragraph. The Permit Board may require any coverage recipient to apply for an individual NPDES permit only if the coverage recipient has been notified in writing. Such notice shall include reasons for the Permit Board's decision, an application form and a filing deadline. The Permit Board may grant additional time at its discretion, upon request. If a coverage recipient fails to submit a requested application in a timely manner, coverage under this permit will automatically terminate at the end of the day specified for application submittal.</p> <p>(2) Any coverage recipient may request to be excluded from permit coverage by applying for an individual permit or coverage under another general permit. The applicant shall submit an individual application (EPA Forms 1 and 2F for storm water discharges) or appropriate general permit Notice of Intent Form.</p> <p>(3) Coverage under this permit is automatically terminated on the issuance date of the respective alternative individual or general permit. When the request for an alternative individual or general permit is denied, coverage under this permit continues unless terminated by the Permit Board. [APC-S-2, WPC-1]</p>

------------------	-----------

S-3	HOW TO REQUEST SUBSEQUENT RE-COVERAGE OF REISSUED PERMIT:
-----	---

The submittal of the last Annual Comprehensive Site Inspection and SWPPP Evaluation Form before permit expiration (due no later than January 28, 2014) shall be deemed to be a notification of the coverage recipient's intent to be covered by the subsequently reissued Hot Mix Asphalt General Permit, provided the Annual Comprehensive Site Inspection and SWPPP Evaluation Form is signed by a responsible officer according to ACT23, T-5 of this permit. Resubmittal of the Storm Water Pollution Prevention Plan (SWPPP) is not required if the SWPPP is on-site, current and adequately addresses the sources of pollution at the facility.

If reissuance of this permit does not occur before its expiration date and the coverage recipient has submitted a timely and complete final Annual Comprehensive Site Inspection and SWPPP Evaluation Form, continued coverage under this permit will be allowed until the effective date of the reissued general permit coverage. Once the Hot Mix Asphalt General Permit is reissued, active coverage recipients will receive a recovery form with a letter of instruction. If a coverage recipient wishes to be covered by the renewed general permit, the recovery form must be completed and returned to MDEQ. [APC-S-2, WPC-1]

**ACT0000000004 (continued):**

**Submittal/Action Requirements:**

Condition No.	Condition
S-4	<p><b>PUBLIC NOTICE REQUIREMENTS</b></p> <p>The coverage recipient has 180 days to re-evaluate their emissions to determine a change in status (i.e. from true minor to synthetic minor or from synthetic minor to Title V) if federal limitations or emission factors are modified. The air emissions allowed by this general permit were calculated using federal limitations, emission factors, and production limitations.</p> <p>(1) For initial coverage or re-coverage, a facility that is classified as synthetic minor (see definition in ACT24) and not listed in the Appendix shall be required to submit proof of publication of the Public Notice in a daily or weekly newspaper of local distribution (an example of the public notice is contained in the Hot Mix Asphalt Forms Package) as part of the HMANOI. The owner or operator shall also send the public notice and a copy of this general permit to the local library. The owner or operator shall submit a completed Acknowledgement Library Form with the HMANOI (see Hot Mix Asphalt Forms Package).</p> <p>(2) Synthetic minor facilities that propose facility expansion and/or modifications that result in new, different, or increased emissions of air pollutants or move to a different site location shall submit proof of publication of the public notice in a daily or weekly newspaper of local distribution and shall also send the public notice and a copy of this general permit to the local library. The owner or operator shall submit a completed Acknowledgement Library Form with the HMANOI (see Hot Mix Asphalt Forms Package).</p> <p>(3) True minor facilities that propose facility expansion and/or modifications that would cause them to become a synthetic minor facility shall submit proof of publication of the public notice in a daily or weekly newspaper of local distribution. The public notice and a copy of this general permit shall be sent to the local library. The owner or operator shall submit a completed Acknowledgement Library Form with the HMANOI (see Hot Mix Asphalt Forms Package). [APC-S-2]</p>
S-5	<p><b>CONTIGUOUS LANDOWNER NOTIFICATION, PUBLIC PARTICIPATION, AND INFORMATION AVAILABILITY:</b></p> <p>For a facility that is new, or for an existing facility proposing activities requiring the submittal of a Major Modification Form (as described below), the owner/operator must notify the contiguous landowners of the proposed activity via Certified-Return Receipt Requested mail. The owner/operator shall utilize the Contiguous Landowner Notification of Hot Mix Asphalt Facility Form found in the Hot Mix Asphalt Forms Package to notify contiguous landowners. A copy of the completed form shall be submitted to MDEQ for informational purposes. Copies of the signed Return-Receipts and notification forms shall be submitted along with the HMANOI or Major Modification Form. Failure to notify the contiguous landowners may be cause for denial or revocation of coverage. If the facility was in existence and operating prior to the issuance date of this permit and no major modification is proposed, contiguous landowner notification is not required. ### ACT0000000008 (HMAGP - Air Emissions) Testing Requirements:

#### Submittal/Action Requirements:

Condition No.	Condition
S-1	(1) If the hot mix asphalt facility has not demonstrated initial compliance with air emission limitations prescribed in ACT10, L-2, then within 60 days after achieving the maximum production rate at which the facility will operate, but no later than 180 days after the initial startup, the coverage recipient shall demonstrate compliance with particulate limitations. Compliance shall be demonstrated by stack testing and submitting the written results to MDEQ. The stack testing shall be in accordance with EPA Reference Methods 1-5 and testing procedures in (40 CFR Chapter 1) §60.93 and shall continue biennial thereafter. In addition, the coverage recipient shall demonstrate compliance with the opacity limitation in accordance with EPA Reference Method 9 and testing procedures in §60.93 and §60.11. The stack test report shall be submitted by the date listed on the Certificate of Coverage and biennial thereafter. [APC-S-2]
S-2	<p>(2) If the asphalt facility has demonstrated initial compliance, but has relocated to a different site, the coverage recipient shall demonstrate compliance with particulate limitations within 180 days of startup. Compliance shall be demonstrated by stack testing and submitting the written results to MDEQ. The stack testing shall be in accordance with EPA Reference Methods 1-5 and testing procedures in (40 CFR Chapter 1) §60.93 and shall continue biennial thereafter.</p> <p>If the rock crusher, RAP crusher and/or associated affected fugitive emission sources have not demonstrated initial compliance with opacity limitations prescribed in ACT10, L-2, then within 60 days after achieving the maximum production rate at which the unit will operate, but no later than 180 days after the initial startup, the coverage recipient shall demonstrate compliance with opacity limitations. Compliance shall be demonstrated by testing as specified in §60.675 and submitting written results to MDEQ (see NSPS definition in ACT24).</p> <p>(3) MDEQ must be contacted at least (30) days prior to the scheduled test date to ensure all test methods and procedures are acceptable and, at MDEQ's discretion, schedule an observer to witness the test(s). **ACT0000000011 (HMAGP - Industrial Storm Water) Storm Water Pollution Prevention Plan (SWPPP) Development and Content:**

**Narrative Requirements:**

Condition No.	Condition
T-1	<p>A SWPPP shall be developed and implemented for each facility subject to this permit. A SWPPP shall be prepared in accordance with sound engineering practices and shall identify potential sources of pollution, which may reasonably be expected to affect the quality of storm water discharges associated with industrial activity from the facility. The SWPPP shall describe and ensure the implementation of best management practices which will reduce pollutants in storm water discharges and assure compliance with the terms and conditions of this permit. For assistance in developing a SWPPP, applicants are encouraged to reference the Mississippi Storm Water Pollution Prevention Plan (SWPPP) Guidance Manual for Industrial Facilities, which is available at <a href="http://www.deq.state.ms.us/MDEQ.nsf/pdf/epd_baseline_guidance">www.deq.state.ms.us/MDEQ.nsf/pdf/epd_baseline_guidance</a>. [WPC-1]</p>
T-2	<p><b>MINIMUM SWPPP COMPONENTS/DESCRIPTION OF POTENTIAL POLLUTANT SOURCES:</b></p> <p>Each plan shall identify all activities and significant materials which may potentially pollute storm water discharges, including:</p> <p>(1) A narrative description of significant materials that are exposed to storm water; method of on-site material treatment, storage or disposal; management practices employed to minimize contact of these materials with storm water; the location and a description of existing structural and nonstructural control measures to reduce pollutants in storm water runoff; and a description of any treatment the storm water receives;</p> <p>(2) A monthly updated list of significant spills and leaks of toxic or hazardous pollutants that have occurred at the facility. If no spills have occurred, indicate this in the SWPPP;</p> <p>(3) An updated summary of all storm water sampling data (if available);</p> <p>(4) A site map showing the drainage area of each storm water outfall identified by number, each existing structural pollutant control measure, and surface water bodies;</p> <p>(5) A topographic map extending at least 1/2 mile beyond the facility property boundaries. This may be part of the above required site map; and</p> <p>(6) A prediction of the direction of flow, and types of pollutants likely to be present for each area of the facility generating storm water discharges with a reasonable potential for containing significant amounts of pollutants. [WPC-1]</p>

Facility Requirements

Activity ID No.: GNP20090001

Page 22 of 54

**ACT0000000011 (continued):**

**Narrative Requirements:**

Condition No.	Condition
T-3	<p><b>MINIMUM SWPPP COMPONENTS/DESCRIPTION OF STORM WATER MANAGEMENT CONTROLS:</b></p> <p>The owner or operator shall describe appropriate storm water management controls addressing identified potential pollution sources and implement such controls. The description shall include a schedule for implementing the following minimum components:</p> <p>(1) Pollution Prevention Manager/Committee. The SWPPP shall specify individual(s) responsible for developing the SWPPP and assisting the facility manager in its implementation, maintenance, and revision.</p> <p>(2) Risk Identification and Assessment/Material Inventory. The SWPPP shall assess the pollution potential of various sources at the facility including loading and unloading operations; outdoor storage, manufacturing or processing activities; significant dust or particulate generating processes and on-site waste disposal practices. Factors to consider include the toxicity and quantity of chemicals used, produced, or discharged, the likelihood of contact with storm water and history of significant leaks or spills of toxic or hazardous pollutants. The plan shall include an inventory of materials handled. Based on the Risk Identification and Material Inventory, the plan shall specify management controls, and, if necessary, structural controls to reduce or eliminate the potential for pollutants in the storm water discharges.</p> <p>(3) Sediment and Erosion Prevention. The SWPPP shall identify areas with a high potential for soil erosion, and specify prevention measures to limit erosion.</p> <p>(4) Preventive Maintenance. A preventive maintenance program shall involve inspection and maintenance of storm water management devices (cleaning oil/water separators, catch basins, etc.) and the inspecting and testing of equipment to preclude breakdowns or failures that may cause pollution. [WPC-1]</p>

**New Application**  
Asphalt General Permit  
Facility Requirements

Activity ID No.: GNP20090001

Page 23 of 54

**ACT0000000011 (continued):**

**Narrative Requirements:**

Condition No.	Condition
T-4	<p>(5) Good Housekeeping. The owner or operator shall describe and list practices appropriate to prevent pollutants from entering storm water from industrial activities due to poor housekeeping. The owner or operator shall:</p> <ul style="list-style-type: none"><li>- Designate areas for equipment maintenance and repair;</li><li>- Provide waste receptacles at convenient locations;</li><li>- Provide regular collection of waste;</li><li>- Provide protected storage areas for chemicals, paints, solvents, fertilizers, and other potentially toxic materials;</li><li>- Provide adequately maintained sanitary facilities;</li><li>- Provide secondary containment around on-site fuel tanks; and</li><li>- Provide secondary containment for raw material stockpiles.</li></ul> <p>(6) Spill Prevention and Response Procedures. The SWPPP shall clearly identify potential spill areas and their drainage points. The plan should specify material handling procedures and storage requirements. Procedures for cleaning up spills shall be identified and made available to the appropriate personnel. The necessary clean up equipment should be available to personnel.</p> <p>(7) Illicit Connections-Testing and Certification. The owner or operator shall certify that storm water discharges have been evaluated for the presence of non-allowable, non-storm water discharges. The certification shall include date(s), observation point(s) and result(s). This certification may not be feasible if the owner or operator does not have access to the discharge before it enters the ultimate receiving conduit. In such cases, the SWPPP shall include why the certification required by this part was not feasible. [WPC-1]</p>
T-5	<p>(8) Routine Visual Site Inspections. The SWPPP shall describe the policy and procedures for routine visual site inspections, including frequencies and areas to be inspected. Areas to be inspected must include equipment and material handling areas and areas where spills have occurred in the past. These areas must be checked for evidence of pollutants entering the drainage system and also identify conditions which may give rise to contamination of storm water runoff. The frequency of inspections shall be performed as often as needed but no less than once monthly. The results of all inspections must be documented and kept with the SWPPP. In addition, the SWPPP shall provide for tracking or follow-up procedures for appropriate inspection responses.</p> <p>(9) Non-Storm Water Discharge Management. The SWPPP must identify any allowable non-storm water discharges, identified in ACT 2, T-2, except for flows from actual fire fighting activities, which are combined with storm water discharges associated with industrial activity at the site. Non-storm water discharges should be eliminated or reduced to the extent feasible. The SWPPP must identify and ensure the implementation of appropriate Best Management Practices (BMPs) for the non-storm water component of the discharge. [WPC-1]</p>

**ACT0000000012 (HMAGP - Industrial Storm Water) SWPPP Implementation Requirements:**

**Submittal/Action Requirements:**

Condition No.	Condition
S-1	<p>The coverage recipient shall:</p> <p>(1) Implement the SWPPP and retain a copy of the SWPPP at the permitted site. Failure to implement the SWPPP is a violation of permit requirements. A copy of the SWPPP must be made available to the MDEQ inspectors for review at the time of an on-site inspection.</p> <p>(2) Comply with the terms of the SWPPP upon commencement of the regulated activity.</p> <p>(3) If notified at any time by the Executive Director of the MDEQ that the SWPPP does not meet the minimum requirements, amend the SWPPP and certify in writing to the Executive Director that the requested changes have been made. Unless otherwise provided, the coverage recipient shall have 30 days to make the requested changes.</p> <p>(4) Amend the SWPPP whenever there is a change in design, construction, operation, or maintenance, which may increase the discharge of pollutants to waters of the State or the SWPPP proves to be ineffective in controlling storm water pollutants. The coverage recipient shall submit it to the MDEQ within 30 days of amendment.</p> <p>(5) If after coverage issuance, a specific wasteload allocation is established that would apply to the facility's discharge, the facility must implement steps necessary to meet that allocation.</p> <p>(6) Submit any new storm water sampling data within 90 days of sampling. [WPC-1]</p>
S-2	<p><b>SWPPP COMPLIANCE WITH LOCAL STORM WATER ORDINANCES:</b></p> <p>(1) The SWPPP shall be in compliance with all local storm water ordinances.</p> <p>(2) When storm water discharges into a Municipal Separate Storm Sewer System (MS4), the coverage recipient shall make the SWPPP available to the local authority upon request. **ACT0000000013 (HMAGP - Industrial Storm Water) Site Inspections and SWPPP Evaluation:**

**Submittal/Action Requirements:**

Condition No.	Condition
S-1	<p>During coverage under this permit, all areas contributing to storm water discharges associated with industrial activity (including, but not limited to, ground storage piles, tanks, hoppers, silos, dust containment/collection systems, cleaning and maintenance areas) must be visually inspected as often as needed but no less than once monthly. The inspection must evaluate whether the SWPPP adequately minimizes pollutant loadings and is properly implemented in accordance with the terms of this permit or whether additional control measures are needed. This includes observing storm water discharges for obvious industrial storm water pollution such as color, lack of clarity, floating solids, settled solids, suspended solids, foam, and oil sheens.</p> <p>The results of all inspections must be documented on the Annual Comprehensive Site Inspection and SWPPP Evaluation Report Form and kept with the SWPPP. In addition, the SWPPP shall provide for tracking or follow-up procedures for appropriate inspection responses. The Annual Comprehensive Site Inspection and SWPPP Evaluation Report Form is provided in the Hot Mix Asphalt Forms Package, which can be found on the MDEQ website at <a href="http://www.deq.state.ms.us">www.deq.state.ms.us</a>. **ACT0000000014 (HMAGP - Industrial Storm Water) Monitoring Requirements:**

**Monitoring Requirements:**

Condition No.	Parameter	Condition
M-1		<p>MONITORING REQUIREMENTS FOR FACILITIES DISCHARGING INTO A 303(d) LISTED IMPAIRED WATERBODY:</p> <p>Monitoring shall be required if:</p> <p>(1) The waterbody has a wasteload allocation for a specific parameter(s) established by a Total Maximum Daily Load (TMDL); and</p> <p>(2) MDEQ has reason to believe the specific parameter(s) is present at the facility and not subject to controls consistent with the implementation plan of the TMDL.</p> <p>Monitoring is required so that appropriate changes to the existing Storm Water Pollution Prevention Plan (SWPPP) may be implemented so that storm water discharges will not adversely impact impaired waters. If required, sampling shall be conducted at least quarterly as outlined below. [WPC-1]</p>
M-2		<p>SAMPLE TYPE (IF SAMPLING IS REQUIRED):</p> <p>For discharges from impoundments with a retention period greater than 24 hours (estimated by dividing the volume of the impoundment by the estimated volume of water discharged during the 24 hours prior to sampling), only one grab sample need be taken. For other discharges, a grab sample during the first 30 minutes (or as soon thereafter as practicable) and a composite sample shall be taken. pH and other parameters requiring a grab sample should only be measured in the grab sample. When a grab sample during the first 30 minutes is impracticable an explanation shall be included with the Discharge Monitoring Report. The composite sample shall either be flow-weighted or time-weighted. Composite samples may be taken with a continuous sampler or as a combination of a minimum of 3 sample aliquots taken in each hour for the first 3 hours or entire discharge, with each aliquot being separated by a minimum period of 15 minutes. The sampled discharge must result from a storm greater than 0.1 inches in magnitude and occurring at least 72 hours from the previously measurable (greater than 0.1 inch rainfall) storm. Sampling test procedures shall be in accordance with the methods set forth in 40 CFR Part 136. [WPC-1]</p>

Page 31 of 54

**ACT0000000017 (continued):**

**Narrative Requirements:**

Condition No.	Condition
T-3	<p>As a minimum, the controls must be in accordance with the standards set forth in the most current edition of the " Planning and Design Manual for the Control of Erosion, Sediment &amp; Stormwater" or other recognized manual of design. The SWPPP shall address the following minimum components.</p> <p>(1) Vegetative practices shall be designed to preserve existing vegetation where possible and re-vegetate disturbed areas as soon as practicable after grading or construction. Such practices may include, but are not limited to, surface roughening, temporary seeding, permanent seeding, mulching, sod stabilization, vegetative buffer strips, and protection of trees. When a disturbed area will be left undisturbed for 30 days or more, the appropriate temporary or permanent vegetative practices shall be implemented within 7 calendar days.</p> <p>(2) Structural practices shall divert flows from exposed soils, store flows or otherwise limit runoff from exposed areas. Such practices may include, but are not limited to, construction entrance/exit, silt fences, earth dikes, brush barriers, drainage swales, check dams, subsurface drains, pipe slope drains, level spreaders, drain inlet protection, outlet protection, detention/retention basins, sediment traps, temporary sediment basins or equivalent sediment controls. [WPC-1]</p>
T-4	<p>(3) For drainage locations (a drainage point at boundary of land disturbing activity) that serve an area with 10 or more disturbed acres at one time, a temporary (or permanent) sediment basin providing at least 3600 cubic feet (133 cubic yards) of storage per acre drained shall be provided until final stabilization of the site. Sediment basins must be installed before major site grading.</p> <p>(4) A description of any post-construction control measures. Post-construction control measures should be installed to control pollutants in storm water after construction is complete. These controls include, but are not limited to, one or more of the following: on-site infiltration of runoff, flow attenuation using open vegetated swales, exfiltration trenches and natural depressions, constructed wetlands and retention/detention structures. Where needed, velocity dissipation devices shall be placed at detention or retention pond outfalls and along the outfall channel to provide for a non-erosive flow. [WPC-1]</p>
T-5	<p>Non-Storm Water Discharge Management:</p> <p>The SWPPP must identify any allowable non-storm water discharges, listed in ACT 2, T-2, except for flows from actual fire fighting, which are combined with storm water discharges associated with hot mix asphalt activity at the site. Non-storm water discharges should be eliminated or reduced to the extent feasible. The SWPPP must identify and ensure the implementation of appropriate Best Management Practices (BMPs) for the non-storm water component of the discharge. [WPC-1]</p>

**Submittal/Action Requirements:**

Condition No.	Condition
S-1	<p>The coverage recipient shall:</p> <p>(1) Implement the SWPPP and retain a copy of the SWPPP at the permitted site. Failure to implement the SWPPP is a violation of permit requirements. A copy of the SWPPP must be made available to the MDEQ inspectors for review at the time of an on-site inspection.</p> <p>(2) Ensure that appropriate Best Management Practices (BMPs) are in place upon commencement of construction.</p> <p>(3) Amend the SWPPP if notified at any time by the Executive Director of the MDEQ that the SWPPP does not meet the minimum requirements. Coverage recipient shall certify in writing to the Executive Director that the requested changes have been made. Unless otherwise provided, the requested changes shall be made within 15 days.</p> <p>(4) Amend the SWPPP whenever there is a change in design, construction, operation, or maintenance which may potentially affect the discharge of pollutants to waters of the State; or the SWPPP proves to be ineffective in controlling storm water pollutants. The amended SWPPP shall be submitted to MDEQ within 30 days of amendment. Coverage recipients shall submit to MDEQ the Major Modification Form (see Hot Mix Asphalt Forms Package) for expansion of the identified footprint in the original SWPPP.</p> <p>(5) Install needed erosion controls even if they may be located in the way of subsequent activities, such as utility installation, grading or construction. It shall not be an acceptable defense that controls were not installed because subsequent activities would require their replacement or cause their destruction. [WPC-1]</p>
S-2	<p>(6) Install additional and/or alternative erosion and sediment controls when existing controls prove to be ineffective in preventing sediment from leaving the site.</p> <p>(7) Minimize off-site vehicle tracking of sediments.</p> <p>(8) Comply with applicable State or local waste disposal, sanitary sewer or septic system regulations.</p> <p>(9) Maintain all erosion controls. Except for sediment basins, all accumulated sediment shall be removed from structural controls when sediment deposits reach one-third to one-half the height of the control. For sediment basins, accumulated sediment shall be removed when the capacity has been reduced by 50%. All removed sediment deposits shall be properly disposed. Non-functioning controls shall be repaired, replaced or supplemented with functional controls within 24 hours of discovery or as soon as field conditions allow.</p> <p>(10) Implement steps necessary to meet a specific wasteload allocation established subsequent to the beginning of construction. [WPC-1]</p>

**Submittal/Action Requirements:**

Condition No.	Condition
S-3	<p><b>SWPPP COMPLIANCE WITH LOCAL STORM WATER ORDINANCES:</b></p> <p>(1) In addition to the requirements of this permit, the SWPPP shall be in compliance with all local storm water ordinances.</p> <p>(2) When storm water discharges into a Municipal Separate Storm Sewer System (MS4), the coverage recipient must make the SWPPP available to the municipal authority upon request. [WPC-1]</p>
S-4	<p><b>INSPECTION REQUIREMENTS:</b></p> <p>Inspection of all erosion controls and other SWPPP requirements shall be performed during permit coverage using a copy of the form provided in the Hot Mix Asphalt Forms Package. Inspections shall be performed as follows:</p> <p>(1) At least weekly for a minimum of four inspections per month;</p> <p>(2) As often as is necessary to ensure that appropriate erosion and sediment controls have been properly constructed and maintained and to determine if additional or alternative control measures are required. The MDEQ strongly recommends that coverage recipients perform a "walk through" inspection of the construction site before anticipated storm events. [WPC-1]</p>

**ACT0000000019 (HMAGP - Construction Storm Water) Reporting and Recordkeeping Requirements:**

**Record-Keeping Requirements:**

Condition No.	Condition
R-1	<b>RETENTION OF RECORDS:</b> All records, reports and information resulting from activities required by this permit shall be retained by the coverage recipient on-site for a period of at least three years from the date of generation. [WPC-1]
R-2	<b>DOCUMENTATION OF INSPECTIONS:</b>  All inspections required by ACT18 of this permit must be documented on the Inspection and Certification Form provided in the Hot Mix Asphalt Forms Package. The form must be certified according to the signatory requirements outlined in ACT23, T-5 and T-6 of this permit. Documentation must include the day and time the inspection was performed, who performed the inspection, any deficiencies noted, and corrective action needed. Documentation of all inspections must be kept with the SWPPP. Inspections must continue until such time that planned construction activities have been completed, land disturbing activities have ceased and disturbed areas have been stabilized with no significant erosion occurring. [WPC-1]

**Submittal/Action Requirements:**

Condition No.	Condition
S-1	<b>REQUEST FOR TERMINATION OF THE WEEKLY CONSTRUCTION EROSION AND SEDIMENT CONTROL INSPECTIONS AND MONTHLY RECORD KEEPING:</b>  Upon successful completion of all permanent erosion and sediment controls for a covered project, a completed Request for Termination of the Weekly Construction Erosion and Sediment Control Inspections Form (provided in the Hot Mix Asphalt Forms Package) shall be submitted to MDEQ. Upon receiving the completed form, MDEQ staff will inspect the site. If no sediment and erosion control problems are identified and adequate permanent controls are established, the coverage recipient will receive a letter from MDEQ verifying termination of inspection requirements. The obligation to conduct weekly inspections is not terminated until written confirmation is received from MDEQ. [WPC-1]

**ACT0000000024 (HMAGP - General) Definitions:**

**Narrative Requirements:**

Condition No.	Condition
T-1	AIR EMISSIONS as used in this permit, include both point and fugitive sources of particulate emissions from hot mix asphalt facilities. These emissions consist primarily of cement and mineral additive dust, but also include some aggregate and sand dust emissions. Fugitive sources include the transfer of sand and aggregate, truck loading, mixer loading, vehicle traffic, wind erosion from sand and aggregate storage piles and short duration material crushing operations from temporary material crushers with a rated capacity less than 150 tons per hour. [APC-S-2]
T-2	APC-S-1 means the Mississippi Commission of Environmental Quality Regulation APC-S-1 Air Emission Regulations for the Prevention, Abatement and Control of Air Contaminants. [APC-S-1]
T-3	APC-S-2 means the Mississippi Commission of Environmental Quality Regulation APC-S-2 Permit Regulation for the Construction and/or Operation of Air Emissions Equipment. [APC-S-2]
T-4	BAGHOUSE means a non-disposable fabric filter system consisting of a filter medium and support, a filter cleaning device, a collection hopper, a shell, and a fan. [APC-S-2]
T-5	BATCH MIX ASPHALT PLANTS are facilities that heat and dry aggregate, then separate the aggregate and mix it with asphalt cement in separate batches. [APC-S-2, WPC-1]
T-6	BEST MANAGEMENT PRACTICES (BMPs) means schedules of activities, prohibitions of practices, maintenance procedures, and other management practices to prevent or reduce the discharge of pollutants to waters of the United States. BMPs also include treatment requirements, operating procedures, and practice to control plant site runoff, spillage or leaks, sludge or waste disposal, or drainage from raw material storage. [WPC-1]
T-7	BIO-DERIVED FUEL means fuel derived from biological material, different from fossil fuels. Biological material includes, but is not limited to plant material, vegetable oils and animal fats. [APC-S-2]
T-8	CFR means the Code of Federal Regulations. [APC-S-2, WPC-1]
T-9	CLEAN WATER ACT "CWA" refers to the Federal Water Pollution Control Act, 33 U.S.C. section 1251 et seq. [WPC-1]
T-10	COMMENCEMENT OF CONSTRUCTION ACTIVITIES means the initial disturbance of soils associated with clearing, grading, or excavating activities or other construction-related activities. [WPC-1]
T-11	COMMISSION means the Mississippi Commission on Environmental Quality. [APC-S-1, APC-S-2, WPC-1]

**ACT0000000024 (continued):**

**Narrative Requirements:**

Condition No.	Condition
T-12	CONSTRUCTION ACTIVITY as used in this permit, includes construction activity disturbing one (1) or more acres, or less than one acre if part of a "larger common plan of development or sale", where the total acreage is based on cumulative planned disturbance. This includes a disturbance to the land that results in the change in topography, existing soil cover (both vegetative and non-vegetative), or the existing topography that may result in accelerated storm water runoff, leading to soil erosion and movement of sediment into surface waters or drainage systems. Examples of construction activity may include clearing, grading, filling and excavating. Construction activity does not include routine maintenance that is performed to maintain the original line and grade, hydraulic capacity, or original purpose of the site. [WPC-1]
T-13	CONTIGUOUS (PROPERTY) LANDOWNER means a landowner/property adjacent to (touching) another person's property. Land divided by public access roads is considered contiguous. [WPC-1]
T-14	CONTROL MEASURE as used in this permit, refers to any Best Management Practice or other method used to prevent or reduce the discharge of pollutants to waters of the United States. [WPC-1]
T-15	DRUM MIX ASPHALT PLANTS are facilities that heat, and mix the aggregate with asphalt cement in a rotating drum. [APC-S-2, WPC-1]
T-16	EXECUTIVE DIRECTOR means the Executive Director of the Department of Environmental Quality. [APC-S-1, WPC-1]
T-17	FACILITY OR ACTIVITY means any NPDES "point source" or any other facility or activity (including land or appurtenances thereto) that is subject to regulation under the NPDES program. [WPC-1]
T-18	FINAL STABILIZATION means that all soil disturbing activities at the site have been completed, and that a uniform perennial vegetative cover with a density of at least 70% for the area has been established or equivalent measures have been employed. [WPC-1]
T-19	HOT MIX ASPHALT PLANTS are facilities that manufacture asphalt by heating and drying aggregate and mixing it with asphalt cement. A hot mix asphalt facility may be comprised of a combination of the following: dryers; systems for screening, handling, storing, and weighing hot aggregate; systems for loading, transferring, and storing mineral filler, systems for mixing hot mix asphalt; hot oil heaters, storage silos, storage tanks, RAP and rock crushers, and the loading, transfer and storage systems associated with emission control systems. [APC-S-2, WPC-1]
T-20	INITIAL START-UP means the setting into operation an affected facility for any purpose for the first time. [APC-S-1]

#### Narrative Requirements:

Condition No.	Condition
T-21	LARGER COMMON PLAN OF DEVELOPMENT OR SALE means a contiguous area where multiple separate and distinct construction activities are occurring under one plan. The plan in a common plan of development or sale is broadly defined as any announcement or piece of documentation (including a sign, public notice or hearing, sales pitch, advertisement, drawing, permit application, zoning request, computer design, etc.) or physical demarcation (including boundary signs, lot stakes, surveyor markings, etc.) indicating that construction activities may occur on a specific plot. [WPC-1]
T-22	LIGHT COMMERCIAL AREA means an area zoned for commercial use, or, in the absence of any local zoning ordinances, an area predominantly used for wholesale and retail trade in goods and services. [APC-S-2]
T-23	MUNICIPAL SEPARATE STORM SEWER SYSTEM (MS4) means a conveyance or system of conveyances (including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, man-made channels, or storm drains): (i) Owned or operated by a State, city, town, borough, county, parish, district, association, or other public body (created by or pursuant to State law) having jurisdiction over disposal of sewage, industrial wastes, storm water, or other wastes, including special districts under State law such as a sewer district, flood control district or drainage district, or similar entity, or an Indian tribe or an authorized Indian tribal organization, or a designated and approved management agency under section 208 of the CWA that discharges to waters of the United States, (ii) Designed or used for collecting or conveying storm water, (iii) Which is not a combined sewer, and (iv) Which is not part of a Publicly Owned Treatment Works (POTW). [WPC-1]
T-24	NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) means the regulations under the Clean Water Act which prohibits discharge of pollutants into waters of the United States unless a special permit is issued. [WPC-1]
T-25	NEW SOURCE PERFORMANCE STANDARDS (NSPS) are uniform national EPA air emission standards, which limit the amount of pollution allowed from new sources or from existing sources that have been modified or reconstructed. These standards of performance can be found in Part 60 of Title 40 of the Code of Federal Regulations (40 CFR 60). [APC-S-1]
T-26	NOI is an acronym for "Notice of Intent" to be covered by this permit and is the mechanism used to apply for coverage under a general permit. [APC-S-2, WPC-1]
T-27	OPACITY means the degree to which emissions reduce the transmission of light and obscure the background. [APC-S-1]

**Narrative Requirements:**

Condition No.	Condition
T-28	<p>OPERATOR for the purpose of this permit and in the context of storm water associated with construction activity, means any party associated with a construction project that meets either of the following two criteria:</p> <ol style="list-style-type: none"><li>1. The party has operational control over construction plans and specifications, including the ability to make modifications to those plans and specifications; or</li><li>2. The party has day to day operational control of those activities at a project which are necessary to ensure compliance with a storm water pollution prevention plan for the site or other permit conditions (e.g., they are authorized to direct workers at a site to carry out activities required by the SWPPP or comply with other permit conditions). This definition is provided to inform permittees of MDEQ's interpretation of how the regulatory definitions of "owner or operator" and "facility or activity" are applied to discharges of storm water associated with construction activity. [WPC-1]</li></ol>
T-29	<p>OWNER OR OPERATOR means the owner or operator of any "facility or activity" subject to regulation under the NPDES program. [WPC-1]</p>
T-30	<p>PARTICULATE MATTER means any airborne finely divided solid or liquid material with an aerodynamic diameter smaller than 100 micrometers. [APC-S-1]</p>
T-31	<p>PERMIT BOARD means the Mississippi Environmental Quality Permit Board established pursuant to Miss. Code Ann. § 49-17-28. [APC-S-2, WPC-1]</p>
T-32	<p>POLLUTANT is defined at 40 CFR 122.2. A partial listing from this definition includes: dredged spoil, solid waste, sewage, garbage, sewage sludge, chemical wastes, biological materials, heat, wrecked or discarded equipment, rock, sand, sediment, silt, cellar dirt, and industrial or municipal waste. [WPC-1]</p>
T-33	<p>RECREATIONAL AREA means a national, state, county, or city park; or an outdoor recreational area, such as a golf course or swimming pool, owned by a city, county, state, or other public agency. [APC-S-1, APC-S-2]</p>
T-34	<p>REGULATED AIR EMISSIONS means dust, fumes, mist, smoke, or other particulate matter, vapor, gas, or any combination thereof subject to regulation under the Federal Act, or for which there is a duly adopted state ambient air quality standard. [APC-S-2]</p>
T-35	<p>RESIDENTIAL AREA means a group of 20 or more single family dwelling units on contiguous property and having an average density of two or more units per acre, or a group of 40 or more single family dwelling units on contiguous property and having an average density of one or more units per acre, or a subdivision containing at least 20 constructed houses, in which the subdivision plat is recorded in the chancery clerk's office of the appropriate county. [APC-S-1, APC-S-2]</p>

**ACT0000000024 (continued):**

**Narrative Requirements:**

Condition No.	Condition
T-36	SIGNIFICANT MATERIALS includes, but is not limited to: raw materials; fuels; materials such as solvents, detergents, and plastic pellets; finished materials such as metallic products; raw materials used in food processing or production; hazardous substances designated under section 101(14) of CERCLA; any chemical the facility is required to report pursuant to Section 313 of Title III of SARA; fertilizers; pesticides; and waste products such as ashes, slag and sludge that have the potential to be released with storm water discharges. [WPC-1]
T-37	SIGNIFICANT MINOR SOURCE means a stationary source that is (a) not a synthetic minor source; (b) is not a major Title V source and is not otherwise required to obtain a Title V Permit to Operate; and (c) is one of the following categories of sources: (a) Hot-mix asphalt plants, (b) Cotton gins, (c) Medical waste incinerators, not subject to the requirements of Section 12 of Regulation APC-S-1, "Air Emission Regulations for the Prevention, Abatement, and Control of Air Pollutants". (d) Rendering plants, or (e) Any other new stationary source deemed by the Permit Board to be a significant minor source due to (i) the source's potential to require significant air pollution control operations in order to avoid a violation of the Mississippi Air and Water Pollution Control Law or any regulation promulgated thereunder, (ii) the source's potential to require significant compliance demonstration or testing requirements, (iii) the source's potential to cause a substantial threat to public health, welfare, or the environment, or (iv) the source's potential to cause or substantially contribute to a violation of any applicable ambient air quality standard. [APC-S-2]
T-38	SIGNIFICANT SPILL OR LEAK is defined by EPA to include releases within a 24-hour period of hazardous substances in excess of reportable quantities under Section 311 of the Clean Water Act and Section 102 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). Reportable quantities are set amounts of substances in pounds, gallons, or other units and are listed in 40 CFR Part 117 and 40 CFR Part 302. Releases are defined to include any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment. [WPC-1]
T-39	STATE LAW means The Mississippi Air and Water Pollution Control Law, specifically, Miss. Code Ann 49-17-1 through 49-17-43, and any subsequent amendments. [APC-S-2, WPC-1]
T-40	STORM WATER means rainfall runoff, snowmelt runoff, and surface runoff. [WPC-1]
T-41	STORM WATER DISCHARGE ASSOCIATED WITH INDUSTRIAL ACTIVITY means the discharge from any conveyance which is used for collecting and conveying storm water and which has come in contact with material handling equipment or activities, raw materials, intermediate products, final products, waste materials, by-products or industrial machinery. The categories considered to be engaging in "industrial activity" are in 40 CFR 122.26 (b) (14) (i - xi). [WPC-1]

**ACT0000000024 (continued):**

**Narrative Requirements:**

Condition No.	Condition
T-42	STORM WATER POLLUTION PREVENTION PLAN "SWPPP" means a plan that includes site map(s), an identification of construction/industrial activities that could cause pollutants in the storm water, and a description of measures or practices to control these pollutants. [WPC-1]
T-43	SUCCESSFUL COMPLETION OF ALL PERMANENT EROSION AND SEDIMENT CONTROLS means when land disturbing construction activities have been completed and disturbed areas have been stabilized with no significant erosion occurring. [WPC-1]
T-44	SYNTHETIC MINOR SOURCE would otherwise constitute a major source except that the facility has opted for federally enforceable emissions limitations which may include permit conditions restricting hours of operation, or type or amount of material stored, combusted or processed, or establishing more stringent air pollution control efficiency requirements to lower allowable air emissions below Title V major source thresholds. [APC-S-2]
T-45	TITLE V MAJOR SOURCE emits or has the potential to emit 100 tons per year (tpy) or more of any air pollutant or 10 tpy or more of any hazardous air pollutant or 25 tpy or more of any combination of such hazardous air pollutants. [APC-S-2]
T-46	TOTAL MAXIMUM DAILY LOAD (TMDL) means the maximum daily amount of a pollutant that can enter a water body so that the water body will meet and continue to meet state water quality standards. [WPC-1]
T-47	TRUE MINOR FACILITY is based on potential uncontrolled emissions, has emissions less than 100 tons per year of any criteria pollutant. [APC-S-2]
T-48	UPSET means an exceptional incident in which there is unintentional and temporary noncompliance with technology based permit effluent limitations because of factors beyond the reasonable control of the permittee. An upset does not include noncompliance to the extent caused by operational error, improperly designed treatment facilities, inadequate treatment facilities, lack of preventive maintenance, or careless or improper operation. [WPC-1]
T-49	WATERS OF THE STATE means all waters within the jurisdiction of this State, including all streams, lakes, ponds, wetlands, impounding reservoirs, marshes, watercourses, waterways, wells, springs, irrigation systems, drainage systems, and all other bodies or accumulations of water, surface and underground, natural or artificial, situated wholly or partly within or bordering upon the State, and such coastal waters as are within the jurisdiction of the State, except lakes, ponds, or other surface waters which are wholly landlocked and privately owned, and which are not regulated under the Federal Clean Water Act (33 U.S.C. Section 1251 et seq.). [WPC-1]
T-50	WPC-1 means the State of Mississippi's Wastewater Regulations for National Pollutant Discharge Elimination System (NPDES) Permits, Underground Injection Control (UIC) Permits, State Permits, Water Quality Based Effluent Limitations and Water Quality Certifications. [WPC-1]
