**THE PERMIT BOARD CONSIDERED THE FOLLOWING
OFFICE OF POLLUTION CONTROL MATTERS:**

Waste Division

Mr. Mark Williams, Chief of MDEQ's Waste Division advised the Permit Board that Injection Disposal Services, LLC (IDS) had applied for a commercial Class I non-hazardous Underground Injection Control (UIC) Permit for three disposal wells located at 6074 Highway 584, Liberty, Amite County, Mississippi. Mr. Williams stated that the IDS has a Class II UIC permit (API 23-005-20742) from the Mississippi State Oil and Gas Board for Well 1 which is an existing well. As a Class II UIC well, Well 1 has been used for underground injection of oil and gas exploration and production liquid wastes into the Lower Wilcox Formation. IDS will maintain its Class II permit and continue to inject nonhazardous oil and gas exploration and production wastes into Well 1; however, IDS also seeks to inject leachate from area municipal solid waste landfills into Well I as well as rainwater collected from the IDS site. Thus, IDS applied to MDEQ for a permit allowing it to use the existing Well as a Class 1 non-Hazardous UIC disposal well. Mr. Williams stated that landfill leachate is typically discharged into publically owned treatment works; however, many POTWs will no longer accept this type of waste. Mr. Williams stated some landfills truck leachate to Texas for disposal because many of the local POTW's in Mississippi are becoming less receptive to accepting the landfill leachate for treatment and disposal.

The proposed permit would also include two new Class 1 disposal wells, Wells 2 and 3 which will allow IDS to inject these same nonhazardous wastes into the Lower Wilcox Formation and the Tuscaloosa Formation. These formations are saltwater bearing strata suitable for receiving and containing the proposed injected nonhazardous wastes. The shallowest depth of injection of the two proposed additional wells would be 7,866 feet and the deepest depth of injection would be approximately 13,000 feet. IDS also proposes short term storage, processing, de-watering, and blending of these non-hazardous wastes in preparation for the deep well injection disposal. Mr. Williams stated that IDS would only install Wells 2 and 3 if they were needed. IDS will also apply to the Oil and Gas Board for Class II well permits which would allow it to inject oil and gas exploration and production liquid wastes into these new wells.

MDEQ provided notice of a 30-day public comment period and of a public hearing held on January 2, 2018. MDEQ received public comments from eight persons during the public hearing many of which were addressed issues for IDS's operational decisions and not for the terms of the permit proposed by MDEQ. MDEQ sent an Issues and Responses document to the Permit Board prior to the Board's meeting summarizing the public comments received at the hearing. IDS representatives were present at the Permit Board meeting and answered the Permit Board's questions. No persons attending the Permit Board meeting voiced opposition to the issuance of the permit. Mr. Williams stated that the proposed permit included testing, reporting, integrity testing, financial assurance, and closure and post-closure requirements. IDS will also be required to develop and submit a plan to monitor ground water before it could begin accepting the wastes at the facility. Mr. Williams indicated that after a full review MDEQ had determined that IDS permit could operate under state and federal laws and regulations, and thus MDEQ staff recommended issuance of the permit.

Upon motion by Jim Hoffmann and seconded by Duncan Welch, the Permit Board voted to accept the staff's recommendation to issue the permit.

Air Division

Mr. Chad Lafontaine, Chief of MDEQ's Air Division advised the Permit Board that MDEQ staff is providing information on a public notice for comment on proposed amendments to the Permit Board's administrative procedure regulations, 11 Mississippi Administrative Code, Part 1, Chapter 5. The proposed amendments directly align requirements of the Mississippi Environmental Permit Board's makeup with requirements of the Federal Clean Air Act. This action, in conjunction with actions by the Mississippi Commission on Environmental Quality, will allow EPA to remedy partial-disapprovals of recent state plan submittals to address requirements for the National Ambient Air Quality Standards under the Clean Air Act. The 30-day public comment period began February 2, 2018, and will conclude with a public hearing to be held on March 5, 2018.
