## MDEQ Issues Water Contact Advisory in Biloxi

(JACKSON, Miss.) – The Mississippi Department of Environmental Quality (MDEQ), through its Beach Monitoring Program, issued a water contact advisory today for a sampling station in Biloxi. This segment of beach is not closed; however, there may be an increased risk of illness associated with swimming in this area.

MDEQ is working closely with local officials to advise residents that the water in the following location may have high bacteria levels:

► ***Station 12A – Biloxi West Central Beach – from Travia Street to Iberville Drive.***

When water samples show that levels are safe for human contact, the advisory will be lifted. Swimmers are reminded that the Beach Task Force has a standing recommendation that swimming not occur during or within 24 hours of a significant rainfall event.

More information about the Mississippi Beach Monitoring Program and the status of beach advisories is available at: <http://opcgis.deq.state.ms.us/beaches>.

To receive beach advisories directly, send an email to [rwilbur@deq.state.ms.us](mailto:rwilbur@deq.state.ms.us) for inclusion in a public group email list, text "MDEQbeach" to 95577, or follow MDEQ on Twitter: @MDEQ.
