**MDEQ Issues Water Contact Advisory for Location in
Waveland**
Advisory Issued for Ocean Springs Still in Effect

(JACKSON, Miss.) -- The Mississippi Department of Environmental Quality (MDEQ), through its Beach Monitoring Program, issued a water contact advisory Saturday for a sampling station in Waveland. This segment of beach is not closed; however, there may be an increased risk of illness associated with swimming in this area.

MDEQ is working closely with local officials to advise residents that the water in the following location may have high bacteria levels:

► ***Station 3 – Waveland Beach – from Oak Boulevard to Favre Street.***

An advisory issued for a sampling station in Ocean Springs on October 30 is still in effect:

► ***Station 15 – Shearwater Beach -- from Holcomb Boulevard to Ashley Place.***

When water samples show that levels are safe for human contact, the advisories will be lifted. Swimmers are reminded that the Beach Task Force has a standing recommendation that swimming not occur during or within 24 hours of a significant rainfall event.

To receive beach advisories directly, send an email to rwilbur@deq.state.ms.us for inclusion in a public group email list, text "MDEQbeach" to 95577, or follow MDEQ on Twitter: @MDEQ.
