MDEQ ISSUES WATER CONTACT ADVISORY FOR ONE LOCATION

(JACKSON, Miss.) -- The Mississippi Department of Environmental Quality (MDEQ), through its Beach Monitoring Program, issued a water contact advisory today for one sampling station in Harrison County. This segment of beach is not closed; however, there may be an increased risk of illness associated with swimming in this area.

MDEQ is working closely with local officials to advise residents that the water in the following location may have high bacteria levels:

- Station 11 -- Gulfport East near Cowan Road -- extends from Anniston Avenue on the east to Teagarden Road on the west.

When water samples show that levels are safe for human contact, the advisory will be

lifted. The Gulf Coast Research Laboratory, which performs water sampling of the Mississippi Gulf Coast beaches for MDEQ, notifies the agency when an area has returned to acceptable levels.

Additionally, swimmers are reminded that the Beach Task Force has a standing recommendation that swimming not occur during or within 24 hours of a significant rainfall event.
