Surface Mining Permit Applications

**Lanes Dozer Services, LLC,
Lamar County
Storm Water Coverage**

**Surface Mining Permit Application A2009
Smith Mine
MSR322781**

Mr. James Matheny, Director of the Mining and Reclamation Division of MDEQ's Office of Geology, presented Lanes Dozer Services, LLC's, Smith Mine, surface mining permit application (No. A2009)

to the Permit Board. The operator proposed to open pit mine 19-acres to a total depth of 13 feet for borrow material. Reclamation was scheduled to be completed in 2024. The site is located approximately one mile Southeast of Richburg. A \$1,000 per acre bond was posted by the applicant. The Office of Geology received several letters of objection regarding this application during the public notice period.

During the Geology public notice review period for the surface mining permit, the Department received several letters of objection with one particular letter signed by multiple neighbors. The major concerns outlined in the letter requested a 15 foot (or higher) berm at the roadside; requested the operator be more aggressive about reducing dust from the work site; an annual pressure wash of the residences facing the operation on Carter Circle; and restriction of operation to daylight hours. Ms. Marianne Hartfield's letter expressed concerns the mine would endanger wildlife species. After trees had been removed and the site had been cleared, Mr. Ron Porter with the Office of Geology's, Mining and Reclamation Division, and Ms. Tamara Campbell with the U.S. Fish and Wildlife Service conducted a joint inspection of the site. Mr. Porter stated he and Ms. Campbell walked the entire site and Ms. Campbell intentionally

looked for threatened and endangered species and was unable to find any. Ms. Campbell then wrote a letter giving clearance of the site.

Florance Bass, Manager of MDEQ's Permitting 401/Storm Water Branch, informed the Permit Board that Lanes Dozer Services, LLC's, Smith Mine, had also applied for coverage under a Mining Storm Water, Dewatering, No Discharge General NPDES Permit for authorization to discharge storm water associated with mining. The Department received the permit application on June 20, 2018. The storm water permit would allow approximately 19 acres of disturbance for the operation of the mine. The receiving stream for the project is Camerons Reed Brake which is also located at 1113 Carter Circle in Purvis, Mississippi.

The application submitted a Storm Water Pollution Prevention Plan (SWPPP) which includes erosion and sediment controls to minimize sediment from leaving the site. Prior to establishing permanent vegetation on reclaimed areas, the applicant will establish and maintain temporary controls during mining operations. The structural controls will include silt fencing, brush barriers, and sediment basins. The applicant will also implement housekeeping practices. The applicant will inspect all erosion and sediment controls and other SWPPP requirements in accordance with the Mining Storm Water, Dewatering, No Discharge General NPDES Permit.

Permit Board member Chair James Hoffmann invited comments from anyone who wanted to speak in opposition or favor of the permit issuances. Mr. John Anglin, with Clear Point Engineers, spoke on behalf of the applicant and addressed the concerns stated in the letters of objection. Mr. Anglin informed the Permit Board that they had talked with the water company and were going to get a water meter with an irrigation line with half-head "timed" irrigation sprinklers to keep the road as dust free as possible. He also stated that the applicant will use a water truck as needed in addition to the sprinkler systems to limit the dust. Mr. Anglin stated the berm is part of the Lamar County rezoning process and the Lamar County supervisors had indicated they wanted a berm installed adjacent to Carter Circle Road outside the permitted acreage but had not specified a height requirement. The applicant intends to install a berm with hedges on top of it to provide additional height from an aesthetic point. Mr. Anglin stated the applicant could not agree to the operating hours of 8-5, however, he had no plans to operate the mine at night.

There were no further comments from visitors regarding the proposed permits.

Upon motion by Dennis Riecke and seconded by Jennifer Wittmann, the Permit Board voted to approve the surface mining permit and storm water coverage. (David Dockery abstained). The surface mining permit number will be A2009 while the storm water coverage permit number will be MSR 322781.

**Krystal Gravel, Inc.,
Copiah County
Storm Water Coverage**

**Surface Mining Permit Application A2016
Scooter Mine
MSR322754**

Mr. James Matheny, Director of the Mining and Reclamation Division of MDEQ's Office of Geology, presented Krystal Gravel, Inc.'s, Scooter Mine, surface mining application (No. A2016) to the Permit Board. The operator proposed to open pit mine 75-acres to a total depth of 50 feet for sand and gravel. The site is located approximately 5 miles Southeast of Crystal Springs. Reclamation is scheduled to be completed in 2025. A \$1,000 per acre bond has been posted by the applicant. The Office of Geology heard concerns from adjacent landowners, during the public notice period, regarding potential impact to Turkey Creek.

During the Geology public notice review period for the surface mining permit, the Department received letters of objection from landowners located downstream of the proposed project area. The major concerns outlined in these letters pertained to disruption of the water flow into Turkey Creek; disruption of the water source or reservoir that feeds Turkey Creek; and pollution hindering the clarity of the water, that would affect Turkey Creek.

Florance Bass, Manager of MDEQ's Permitting 401/Storm Water Branch, informed the Permit Board that the applicant had also applied for coverage under the Mining Storm Water, Dewatering, No Discharge General NPDES Permit. The Department received the permit application on August 10, 2018. The receiving stream for the project is Turkey Creek.

The applicant developed a Storm Water Pollution Prevention Plan (SWPPP) which includes erosion and sediment controls to minimize sediment from leaving the site. The structural controls will include silt fencing, and berm barriers. Erosion controls will be installed prior to soil disturbance. Housekeeping practices will also be implemented, and are intended to keep the project area clean and orderly, in order to minimize the potential for contribution to storm water run-off. The applicant will inspect all erosion and sediment controls and other SWPPP requirements in accordance with the Mining Storm Water, Dewatering, No Discharge General NPDES Permit.

Permit Board member Chair James Hoffmann invited comments from anyone who opposed or favored the permit issuances. Mr. Michael Morris with Krystal Gravel, Inc. stated that there would be no water flow from the mine into Turkey Creek and further stated the company would install silt fencing, brush barriers, and other necessary controls to ensure there would be no disturbance to Turkey Creek or to the reservoir that feeds Turkey Creek. Mr. Morris stated that there would be no pollution hindering the clarity of Turkey Creek.

There were no other comments from visitors regarding the proposals.

Upon conclusion, staff recommended issuance of the permits.

Upon motion by Duncan Welch and seconded by Chris McDonald, the Permit Board voted to approve the surface mining permit and storm water coverage. (David Dockery abstained). The surface mining permit number will be A2016 while the storm water coverage permit number will be MSR 322754.
