

# Mississippi Department of Environmental Quality

## Monthly Walkthrough Inspection Checklist

- This form maybe utilized to document UST monthly walkthrough inspections.
- Monthly walkthrough inspections are required to be implemented by 10/5/2021.
- Additional training may be obtained at MDEQ's Compliance Manager Course.

Facility Information		Name of Person (s) Conducting Inspection	Initials
Facility ID #:	Facility Name:		
Facility Address:			

### Generalized Inspection Procedure

- For each UST component listed, visually inspect it for damage and proper operation. Initial each column below the date of inspection when complete.
- For the facilities method of leak detection, visually inspect all records and / or leak detection equipment to ensure adequacy. Notify the current tank owner or responsible party in writing of any record that must be reported to MDEQ as a suspected release.
- For items not applicable for this facility, please indicate "NA" or cross out "X" the column instead of initialing.
- Log all issues observed, indicate the action taken and the date the issue was resolved.

Inspection (Required)		Inspection Results for Year												
Component	Ensure that:	Month:	Jan	Feb	Mar	Apr	May	Jun	July	Aug	Sept	Oct	Nov	Dec
		Date:												
Spill Bucket	All liquid or debris has been removed.													
	There is no visible sign of holes, cracks, or other damage that may cause the bucket to leak.													
	All clamps and rings that seal bucket around the fill riser are tight.													
	The interstitial space on double walled spill bucket is dry													
Fill Cap	Fill cap is in good condition and seals tightly onto the fill pipe.													
Fill Pipe	Drop tube device is present, installed, and there are no sticks or other obstructions visible in the fill pipe.													

### Inspection (Recommended)

No leaks observed under all the dispensers when pumps are turned on.														
No visible leaks observed at all the STPs when pumps are turned on.														
There have been no reports of unusual operating conditions such as dispensers operating at a slow flow or water intrusion into the tank.														
There are no unusual or unexplainable odors.														
All clerks present on site have been properly trained and signed the UST facility clerk log.														
Spill kit is properly stocked and adequate.

Inspection of Leak Detection Equipment and Documents (Required)														
Facility ID #:		Month:	Jan	Feb	Mar	Apr	May	Jun	July	Aug	Sept	Oct	Nov	Dec
All Methods		Date:												
I reviewed all applicable reports, tests, or equipment related to leak detection at this facility.														
I notified the current Tank Owner / Responsible Party in writing of any leak detection record that must be reported to MDEQ as a suspected release.														
Method Used	Ensure that:													
Monitoring Wells	All necessary monitoring wells were checked and observations properly recorded.													
Automatic Tank Gauging	The ATG is operating with no alarms or unusual operating conditions related to tank leak detection													
	All 0.2 gph tank leak tests show passing results													
	A passing 0.2 gph leak test was obtained (within 24 hrs) of all failing/inconclusive 0.2 gph leak tests.													
Electronic Line Leak Detectors	The ATG is operating with no alarms or unusual operating conditions related to pipe leak detection													
	All 0.2 gph pipe leak tests show passing results.													
	A passing 0.2 gph leak test was obtained (within 24 hrs) of all failing/inconclusive 0.2 gph leak tests.													
Visual Interstitial Monitoring	Report indicates that there is no liquid observed.													
	All water observed has been removed													
	All fuel observed has been removed (Need to Report to MDEQ)													
Electronic Interstitial Monitoring	Monthly sensor status report indicates all sensors are not in alarm and functioning properly.													
	All alarms have been reconciled and logged on the monthly Electronic Interstitial monitoring form.													
	All water observed has been removed													
	All fuel observed has been removed (Need to Report to MDEQ)													
Statistical Inventory Reconciliation	Tank checked for water, no water is present, and fuel levels are being properly recorded.													
	Fuel levels were submitted to a 3 <sup>rd</sup> party for analysis.													
	The previous month's record indicates passing results.
