Surface Mining Permits to Transfer

M & N Excavators, Inc. requested permit P16-012 (Lafayette County) be transferred to Pea Ridge Recycling, LLC. Pea Ridge Recycling, LLC has provided the proper bonding and transfer forms to MDEQ. If approved, the new permit number for Pea Ridge Recycling, LLC will be P16-012T. The staff recommended through Ron Porter approval of the transfer request.

Krystal Gravel, Inc. requested permit P19-001 (Copiah County) be transferred to WAG Sand & Gravel. WAG has provided the proper bonding and transfer forms to MDEQ. If approved, the new permit number for WAG will be P19-001T. The staff recommended, through Ron Porter, approval of the transfer request.

On motion by Dennis Riecke and seconded by Les Herrington, the Permit Board voted to approve the above surface mining permit transfers. David Dockery abstained.

**THE PERMIT BOARD CONSIDERED THE FOLLOWING
OFFICE OF POLLUTION CONTROL MATTER:**

ENVIRONMENTAL PERMITS DIVISION

WATER II BRANCH

**Reissuance of NPDES Permit
International Paper Company, Vicksburg Mill
MS0000191, Warren County**

Ms. Krystal Rudolph, Chief of MDEQ's Environmental Permits Division (EPD), advised the Permit Board that International Paper Company (IPC), Vicksburg Mill, applied for reissuance of its National Pollutant Discharge Elimination System Permit (NPDES) MS0000191 for the discharge of treated process wastewater, landfill leachate, and contact stormwater from existing Outfall 001 into the Yazoo River. The facility manufactures unbleached linerboard. The proposed permit contains regulatory limitations and constraints.

During the public comment period, EPA suggested that MDEQ clarify in the permit rationale that a specific regulation was not applicable to this facility. MDEQ also received one comment letter during the public comment period submitted on behalf of American Rivers, Audubon Mississippi, Healthy Gulf, and the Mississippi Sierra Club expressing concerns regarding the potential impact to the facility from the proposed Yazoo Pumps project. MDEQ determined that since the Yazoo Pumps project is still in the planning stages, it is inappropriate to consider impacts from the project. Ms. Rudolph stated the reopen condition in the permit and applicable regulations authorized MDEQ to modify the permit if new information, not available at the time of permit issuance, would have justified the application of different conditions at the time of issuance. The letter also expressed concerns regarding the lack of a technical basis or other rationale regarding the removal of minimum dissolved oxygen and aluminum limits from the permit. As stated in the draft permit rationale, MDEQ did not incorporate a minimum dissolved oxygen limit because the company reduced other parameters and demonstrated through modeling and mixing zone studies—which were reviewed and approved by MDEQ's Surface Water Division—that a dissolved oxygen limit was unnecessary. Aluminum limits were unnecessary because there was no reasonable potential to violate EPA's newly adopted aluminum criteria.

Mr. Andrew Whitehurst, speaking for the groups who submitted the comment letter, stated that the Yazoo pumps project was no longer speculative because EPA had removed its objection (veto) to the project. Thus, Mr. Whitehurst stated that the Permit Board should consider the impact the pumps project would have on Yazoo River water levels before reissuing the permit. Mr. Whitehurst speculated that those water levels could threaten the levee that contains the treated water at IPC's plant which is just downstream from the discharge point from the Yazoo pumps. Mr. Whitehurst stated a better look at the modeling was in order. Ms. Rudolph responded that state regulations require MDEQ to evaluate permit applications based on current conditions. She pointed out the permit is for a five-year term and that MDEQ would re-evaluate the discharge during the permit renewal process based on the stream conditions existing at the time of renewal.

In responding to a question by Permit Board member Dennis Riecke, IPC representative Ms. Rachel Davis stated that IPC conducted the stream model to demonstrate to MDEQ that the dissolved oxygen effluent limit, which was first imposed in the draft permit, was unnecessary. Mr. Shawn Clark, Chief of MDEQ's Surface Water Modeling and Total Maximum Daily Loads Branch, stated MDEQ staff had initially determined, based on a revised stream model, that a dissolved oxygen limit would be required to meet water quality standards. IPC proposed an alternative which was to significantly reduce the loading of oxygen-demanding substances and total nitrogen. Mr. Clark was satisfied that IPC's modeling results demonstrated the proposed reductions are protective of water quality standards in the stream.

Ms. Rudolph stated that MDEQ staff believes the technical requirements are such that the facility could operate within all state and federal environmental laws and regulations and recommended that the Permit Board reissue the permit.

On motion by Les Herrington and seconded by Chris McDonald, the Permit Board voted to accept the staff's recommendation to reissue the permit coverage.

OTHER BUSINESS

MDEQ's General Counsel, Roy Furrh, updated the Permit Board on the potential dates of the Evidentiary Hearing for the Port of Gulfport matter. Mr. Furrh stated that the hearing officer planned to make decision on the parties' motions *in limine* by the end of the week. Mr. Furrh stated the evidentiary hearing would most likely be held with an in-person meeting on February 9, 2021. Mr. Furrh also indicated that the hearing could be held on January 12, 2021, or March 9, 2021; however, he stated the February date was the most likely date for the hearing. Mr. Furrh informed the Permit Board that he would make them aware in advance when the date has been set so they could plan accordingly.

Mr. Furrh reminded the Permit Board that the notice for this month's telephonic meeting will be included in the minutes for this month's meeting and has been posted on MDEQ's website and at MDEQ's Amite and State Street offices.
