New	Research	6012	8/27/2021 Mississippi Coast Model	The Mississippi Coast Model Railroad Museum Project (Tourism/Economic Development/Infrastructure) Requesting: \$1.5 M	Harrison	Ves	No	No	Ves	No	Ves	Ves	\$ 8,500,000,00	\$4,100,000,00
Additions	1	0012		The Mississippi Model Railroad Museum project is being developed at the intersection of Howes Avenue and Pass Road on a piece of property that was once plaits #8-18 in the neighborhood of Manhattan Addition, established in 1905. The project supports the		100		110	100	 .,,	1.65	100	5 0,500,000.00	\$1,100,000.00
Additions	and		Railroad	Tourism, Economic Development and Infrastructure categories of the RESTORE emphasis.										
	Education		Museum/Tourism/Economic	The current property at 615 Pass Road, sits mostly in the Pat Harrison Waterway in Harrison County on the corner of the first intersection guests typically stop at as they leave the Gulfport Airport going toward the beaches. Transforming the existing property into the										
			Development/Infrastructure	world-class model railroad museum it can become will attract tourists, build economic development in the area, and can also spark revitalization interest of the established businesses currently there.										
		Development/intrastructure	But this museum will not only stimulate economic development or attract tourists and locals, it will also educate guests that visit. In keeping with the mission of the museum, visitors will learn about the history of trains in Mississippi and in the United States, their value											
				in our past communities, and those in the present. Additionally, this museum will also provide an attraction that brings families together to laugh and learn: parents and children, grandparents and children, and teachers' students.										
				The museum, however, will not stop with those elements. Another element that will be strongly incorporated into the experiences throughout the museum will introduce Science, Technology, Engineering, and Math (STEM) activities to encourage guests to explore										
				STEM areas through modeling concepts.										
				The funding request from RESTORE would support the \$1.5M needed to design, fabricate, and install STEM interactive displays throughout the museum. Those displays would highlight STEM educational elements that build scientific knowledge grown through model	1									
				railroading.										
				Additionally, the museum will drive the creation of programming and activities that build workforce development skills also through STEM engagement concepts developed through building display models. These interactive displays will teach elements of electricity,										
				CAD design, architecture, engineering, design, geography, physics, and math which are heavily drawn upon when creating model displays. Throughout the museum, interactive displays will be designed and installed to allow guests hands-on experiences in all these										
				arcis.										
				If guests that want to create their own model railroad displays at home, they can also attend if-erRail Classesife in the museum's workshop. They may even visit the if-erRail Libraryife ito research rail history or modeling how-to's while at the museum.										
				Upon completion, the model railroad museum in Gulfport, Mississippi, will be recognized as the largest model railroad museum currently in the United States. That distinction alone will put the state of Mississippi out front of the model railroad competition. Hosting										
				the largest model railroad museum in the United States will attract visitors from around the state of Mississippi, but it could also draw tourists and model railroad enthusiasts from across the country, or even the world.										
				Currently this construction project has been privately underwritten by community donors, Richard Mueller and Glenn Mueller (founders of RPM Pizza on 5th Street, Gulfport, MS) to bring in intricate model railroad displays. One currently under production for the										
				museum will cost over \$1M alone. It will present landmarks that move, light up, or spin across the display found from Mobile Bay to Canal Street in New Orleans. The history of the coast will also be presented through train exhibits, so that if-exchildren of all ageside:										
				learn about the importance of the railroads and how that value continues today. Additional layouts already received total over \$2M in value (or a total of \$3M contributed) making these museum displays some of the most interactive, educational exhibits of model										
				railroads that can be found. No other funding sources have been secured to date.										
				Establishing a world-class model railroad museum will be a strong attraction site for tourists coming to the Coast of Mississippi. But the Mississippi Coast Model Railroad Museum will also impact economic development in South Mississippi when it opens in 2023.										
				The Museum projects hiring professionals to fill 5 1.0 FTE and 4 .5 FTE positions in guest services within 30 days of opening in January of 2023. Additionally, preferred enterers will be selected for group rentals and events along with others to enhance the										
				experience in areas such as birthday parties, party characters, balloon designers, florists, and bakeries that will expand the economic impact of the Museum. Through supporting other community professionals, the overall budget of the Museum is projected to send										
				almost \$700,000 back into the local economy during the first year of operation.										
				The Railroad Museum Project is designed to also serve as a catalyst for community revitalization of Pass Road, an area that has slipped more toward decay than inspiration. The staff is already working with the City of Gulfport to provide missing sidewalks around the										
1	1	1	1 1	museum property and improve intersections for pedestrians. The parking lot of the Maseum has been drawn to include green spaces while adding attractive outdoor lighting, and hardscapes that will include new sidewalks bordering it.	1									1
1	1	1	1	A member of the Pass Road Merchants' Association, the stuff will be collaboratively working with other merchant members to upgrade their own properties or storefronts. Once begun, the changes will also encourage new merchants to locate to Pass Road. Then as										
	1	1	1 1	new merchants move into Gulfport, property values should begin to increase the tax base in that area for the city.	1									1
	1			The far-reaching effects of completing the SS, 550,000 Missingspip Coast Model Railroad Museum project has the potential to create a premiere to correct a certain certain for the coast of South Mississippi that will being new tourists and revenue. The museum currently has \$4,100,000 invested receivable reflection for things the front the Coast of South Mississippi that will being new tourists and revenue. The museum currently has \$4,100,000 invested receivable reflection frontial the museum that has the file museum to a feed unmortal by any other is Mississippi.
