

**STATE OF MISSISSIPPI**

TATE REEVES  
GOVERNOR

**MISSISSIPPI DEPARTMENT OF ENVIRONMENTAL QUALITY**  
CHRIS WELLS, EXECUTIVE DIRECTOR

**MEMORANDUM**

TO: Owners/Operators of Commercial Solid Waste Landfills  
FROM: MDEQ Waste Division  
SUBJECT: Annual Report for the Calendar Year 2021  
DATE: January 10, 2022

---

An annual report on the solid waste disposal activities and other relevant facility operations conducted during Calendar Year 2021 is due to the Mississippi Department of Environmental Quality (MDEQ) from the owners and/or operators of all municipal solid waste landfills and other commercial solid waste landfills **no later than Friday, February 28, 2022**. This annual report is required pursuant to Mississippi Code Annotated §17-17-219 and Rule 1.4.B(15) of the Mississippi Nonhazardous Solid Waste Management Regulations.

All owners/operators of municipal solid waste landfills and other commercial solid waste landfills shall electronically submit their annual report using the Mississippi DEQ Solid Waste Facility Reporting Program via the Re-TRAC Connect (Re-TRAC) software platform for Calendar Year 2021 activities. CY2021 reporting forms will be available through the online system beginning January 01, 2022. Links to register for and log into this program are available on the MDEQ Solid Waste Facilities Reporting Program page ([www.mdeq.ms.gov/solid-waste-reporting](http://www.mdeq.ms.gov/solid-waste-reporting)) along with a guidance document on navigating the online reporting system. For those that have not yet registered for the online reporting program, registration can be accomplished using one of the two below methods:

**Method 1: Direct Registration (suggested for users responsible for reporting for a single facility)**

Users can use the following link to join the Mississippi DEQ Solid Waste Facility Reporting Program in Re-TRAC. The link will guide you through the registration process. After you have registered, MDEQ will review the information entered and assign the appropriate reporting forms to you in the system.

<https://connect.re-trac.com/registration/mdeq>

**Method 2: Request Program Access from MDEQ (suggested for users responsible for reporting for multiple facilities)**

To assist MDEQ with setting up a user account with all the associated facilities for a single user, the following information must be submitted via email to Charlie Bock at [cbock@mdeq.ms.gov](mailto:cbock@mdeq.ms.gov):

- Name and email address for each person responsible for completion/submittal of the annual report(s)
- Name and type of each facility for which the user(s) is responsible for reporting
- Permit/authorization number for each facility for which the user is responsible

Upon receipt of this information, MDEQ will create the account(s), assign the facilities and associated reporting forms, and provide the user(s) with the login credentials to access the program.

**If you have a consultant or 3<sup>rd</sup> party representative that needs access to your electronic reporting form to help input or prepare the electronic submittal, you will need to provide a written request to MDEQ to grant access to that person(s). However, an authorized signatory for the facility in accordance with Rule 1.2.G of the MS Nonhazardous Solid Waste Management Regulations must also register for the Re-TRAC program for the purposes of reviewing and signing the draft report prior to electronic submittal.**

Once you have registered and have been assigned the appropriate forms to complete, please provide the information as the electronic form requests for the activities conducted at each facility you owned and/or operated during Calendar Year 2021. The electronic reporting form allows you to stop and save drafts of the report that can be taken up at a later time if necessary. Once you have completed entry of all the information on the reporting form, save the document and select the option to “Mark Complete” to lock your report and signify your official submittal of the annual report. **Note that your report will not be considered submitted by MDEQ if the “Mark Complete” option has not been selected.**

The form should be completed and submitted even if the facility was inactive during the calendar year. Once the form has been electronically submitted for MDEQ verification, the submitted form will become “read-only,” and you will only be able to print or save a copy of the completed form for your records at this point. If the form requires editing after electronic submittal, please contact MDEQ and we will work with you to make the necessary changes.

If you are for any reason unable to complete the annual report in this required electronic format by the methods described in this memorandum, you should contact MDEQ as soon as possible to discuss arrangements to accomplish the electronic report development and submittal.

## **ANNUAL REPORT CONTENT**

The annual report for commercial municipal solid waste landfills and other commercial landfills should contain the following information as well as any supporting information and examples on how each quantity and/or capacity was determined. The electronic form will prompt you to either enter the following information or to attach additional documents in the system that contains the appropriate information.

1. List the amounts of waste disposed by type (residential vs. nonresidential) and source (in-state vs. out-of-state) in units of tons. For those facilities that do not have access to weight scales, the amount of waste disposed should be reported in cubic yards and also in tons converted from cubic yards by using an appropriate conversion rate approved by MDEQ.
2. Indicate the year the facility began receiving waste and provide the total waste in place since the facility opened.
3. List the sources of waste by the individual counties of origin with a clear indication of those wastes originating from out-of-state. Please note that if your landfill received wastes from a transfer station, the source of that waste should be reported as the originating community and not the location of the transfer station.
4. List the total amount of material that was segregated at the facility for recycling, re-use or other management purposes. These are materials brought to the facility that were *not* disposed in the landfill.
5. Indicate the types of materials that were segregated and if known, provide an estimate of the amount of

each material segregated in tons.

6. Provide the estimated remaining capacity of the landfill in terms of airspace (cubic yards).
7. Provide an estimate of the remaining life of the landfill in years and indicate how this remaining life was calculated.
8. Attach an updated contour drawing of the landfill depicting areas filled during the reporting year and total cumulative areas filled from the initial date of waste receipt through December 31<sup>st</sup>.
9. Indicate whether the facility has a landfill gas collection system in place.
10. If available, provide the amount of landfill gas collected or generated during the Calendar Year.
11. If the owner *or* contract operator of the landfill is a private concern, an updated disclosure statement should be submitted separately from the electronic reporting form. The updated disclosure information must be provided on the [MDEQ Disclosure Form](#) (available on the solid waste permitting webpage). Only those pages that are modified or added must be submitted. If no changes have been made to the disclosure statement already on file with MDEQ, then checking the appropriate box on the annual reporting form will be accepted in lieu of submitting an updated form. Public agencies such as cities and counties are not required to submit disclosure statements unless a contract operator is employed to manage the landfill, in which case an updated disclosure statement on the contract operator is required.
12. Include the following information on financial assurance as scanned attachments
  - a. An updated/adjusted closure and post-closure cost estimate;
  - b. An audit of the financial assurance document and the end-of-year value of the financial assurance mechanism; and
  - c. An updated financial assurance document should be provided separately, where necessary.
13. Attach any other information that may be required by the conditions of the facility permit.

Should you have any questions concerning this memo, please contact MDEQ Waste Division's Policy, Planning, & Special Programs Branch at (601) 961-5171.
