### DECISION JUSTIFICATION

**Basis of Decision** Data collected in the current data assessment window (1/1/2016-12/31/2020) indicate the water body is not impaired for pH. Using the binomial method according to CALM methodology, the calculated percentage of exceedances is less than the 10% required to violate the criteria or screening level for all relevant characteristics. Therefore, the water body is attaining the use and should be delisted. Future discharges and/or expansions will be evaluated through our WQBEL process to protect current water quality conditions.
