Permitting, Certification, and Compliance

MRVA-004

Revision of the General Permit for Groundwater Withdrawal Renewals for the uses for Irrigation, Aquaculture, and Wildlife Habitat Enhancement from the Mississippi River Valley Alluvial Aquifer (MRVA) in the Mississippi Delta.

Groundwater from the Mississippi River Valley Alluvial Aquifer, or MRVA, is a critical resource for irrigation, aquaculture, and wildlife habitat throughout the Delta. However, since the early 1980s, water levels in the MRVA have declined significantly, in some areas by nearly a foot per year, while groundwater demand has continued to increase.

Under Mississippi law, all water belongs to the citizens of the state, and the Permit Board, MDEQ, and the Commission on Environmental Quality are responsible for ensuring the maximum sustainable and beneficial use of that resource and for preventing waste or unreasonable use. Groundwater permits are a key tool used to meet that responsibility.

Historically, groundwater withdrawal permits were issued for ten years. Beginning in 2011, due to declining MRVA water levels, the Permit Board approved five-year general permits for MRVA wells to allow more frequent review and adjustment of permit conditions. Since that time, the Board has renewed and revised these general permits in 2011, 2016, and 2021, each time strengthening water conservation requirements based on new data and stakeholder input.

MDEQ has led these efforts in coordination with the Delta Sustainable Water Resources Task Force, which includes agricultural, conservation, and state and federal partners. This collaborative process has guided the development of practical, science-based conservation measures while recognizing the economic importance of water use in the Delta.

The proposed 2026 general permit, MRVA-004, is the result of that ongoing process. The only substantive change from the 2021 permit is the addition of a third approved water-efficiency practice for row crops. This new option allows permittees to meet conservation requirements by completing Mississippi State University's Master Irrigator Certification Program and applying that training to their permitted acreage. Permittees choosing this option must submit proof of certification to MDEQ.

This revision was shared with the Task Force, presented publicly, and went through formal public notice and comment. MDEQ reviewed all comments received and determined that no changes to the proposed draft were warranted.

In summary, MRVA-004 maintains existing conservation requirements while adding flexibility through an education-based efficiency option. Staff believe the proposed permit supports continued groundwater conservation while providing permittees with an additional practical compliance pathway.

On Motion by Lester Herrington and second by Brian Perry the Permit Board voted to approve the revision of General Permit MRVA-004.

OTHER BUSINESS

Chair, Chris Hawkins, announced that he will be retiring at the end of the month.

General Counsel, Tad Campbell, reminded Permit Board members to submit their Statements of Economic Interest and EPA Compliance forms by the May 1, 2026 deadline.

CONFIRMATION OF THE NEXT REGULAR PERMIT BOARD MEETING

Chair Chris Hawkins confirmed the next regular meeting of the Permit Board was scheduled for Tuesday, February 10, 2026.

MEETING ADJOURNED

There being no further business to come before the Permit Board, on motion by Lester Herrington and second by William Watkins, the Permit Board voted to adjourn the meeting. Chair Chris Hawkins then adjourned the meeting.

DATED at Jackson, Mississippi, this the 13th day of January 2026.
