# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116358-1

Client Sample ID: MW-13

Lab Sample ID: 860-116358-4

Date Collected: 11/12/25 11:44

Matrix: Water

Date Received: 11/13/25 09:32

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116358-1

Client Sample ID: DUPE-01

Lab Sample ID: 860-116358-5

Date Collected: 11/12/25 00:00

Matrix: Water

Date Received: 11/13/25 09:32

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116358-1

Client Sample ID: MW-08

Lab Sample ID: 860-116358-6

Date Collected: 11/12/25 13:39

Matrix: Water

Date Received: 11/13/25 09:32

## Method: SW846 8260D - Volatile Organic Compounds by GC/MS (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116358-1

Client Sample ID: MW-08

Lab Sample ID: 860-116358-6

Date Collected: 11/12/25 13:39

Matrix: Water

Date Received: 11/13/25 09:32

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116358-1

Client Sample ID: MW-14

Lab Sample ID: 860-116358-8

Date Collected: 11/12/25 08:14

Matrix: Water

Date Received: 11/13/25 09:32

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116358-1

Client Sample ID: MW-14

Lab Sample ID: 860-116358-8

Date Collected: 11/12/25 08:14

Matrix: Water

Date Received: 11/13/25 09:32

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) - RE (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116358-1

Client Sample ID: MW-15

Lab Sample ID: 860-116358-9

Date Collected: 11/12/25 08:59

Matrix: Water

Date Received: 11/13/25 09:32

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) - RE (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116358-1

Client Sample ID: MW-23

Lab Sample ID: 860-116358-11

Date Collected: 11/12/25 11:45

Matrix: Water

Date Received: 11/13/25 09:32

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS)

### Surrogate Legend

TBP = 2,4,6-Tribromophenol (Surr)

FBP = 2-Fluorobiphenyl

Eurofins Houston

## Surrogate Summary

Client: Arcadis US Inc.

Project/Site: Hercules Hattiesburg, MS

2FP = 2-Fluorophenol (Surr)

NBZ = Nitrobenzene-d5 (Surr)

PHL = Phenol-d5 (Surr)

TPHd14 = p-Terphenyl-d14

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116358-1

## Method: 8260D - Volatile Organic Compounds by GC/MS

Lab Sample ID: MB 860-276492/9

Matrix: Water

Analysis Batch: 276492

Client Sample ID: Method Blank

Prep Type: Total/NA

| Analyte                               | MB Result | MB Qualifier | RL   | MDL   | Unit | D | Prepared | Analyzed       | Dil Fac |

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116358-1

## Method: 8260D - Volatile Organic Compounds by GC/MS (Continued)

Lab Sample ID: 880-65015-L-1 MS

Matrix: Water

Analysis Batch: 276492

Client Sample ID: Matrix Spike

Prep Type: Total/NA

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116358-1

## Method: 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

Lab Sample ID: LCSD 860-275669/3-A

Matrix: Water

Analysis Batch: 275886

Client Sample ID: Lab Control Sample Dup

Prep Type: Total/NA

Prep Batch: 275669

Eurofins Houston

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116358-1

## Method: 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

Lab Sample ID: MB 860-276655/1-A

Matrix: Water

Analysis Batch: 276932

Client Sample ID: Method Blank

Prep Type: Total/NA

Prep Batch: 276655

| Note: Since laboratory accreditations are subject to change, Eurofins Environment Testing South Central, LLC places the ownership of method, analyte & accreditation compliance upon our subcontract laboratories. This sample shipment is forwarded under chain-of-custody. If the laboratory does not currently maintain accreditation in the State of Origin listed above for analysis/test/matrix being analyzed, the samples must be shipped back to the Eurofins Environment Testing South Central, LLC laboratory or other instructions will be provided. Any changes to accreditation status should be brought to Eurofins Environment Testing South Central, LLC attention immediately. If all requested accreditations are current to date, return the signed Chain of Custody attesting to said compliance to Eurofins Environment Testing South Central, LLC. |  |                               |  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |                                                                                                                                      |  |                                                          |  |                     |  |                            |  |

| Question                                                                                 | Answer | Comment |
|------------------------------------------------------------------------------------------|--------|---------|
| Radioactivity wasn't checked or is $\leq$ background as measured by a survey meter.      | True   |         |
| The cooler's custody seal, if present, is intact.                                        | N/A    |         |
| Sample custody seals, if present, are intact.                                            | True   |         |
| The cooler or samples do not appear to have been compromised or tampered with.           | True   |         |
| Samples were received on ice.                                                            | True   |         |
| Cooler Temperature is acceptable.                                                        | True   |         |
| Cooler Temperature is recorded.                                                          | True   |         |
| COC is present.                                                                          | True   |         |
| COC is filled out in ink and legible.                                                    | True   |         |
| COC is filled out with all pertinent information.                                        | True   |         |
| Is the Field Sampler's name present on COC?                                              | True   |         |
| There are no discrepancies between the containers received and the COC.                  | True   |         |
| Samples are received within Holding Time (excluding tests with immediate HTs)            | True   |         |
| Sample containers have legible labels.                                                   | True   |         |
| Containers are not broken or leaking.                                                    | True   |         |
| Sample collection date/times are provided.                                               | True   |         |
| Appropriate sample containers are used.                                                  | True   |         |
| Sample bottles are completely filled.                                                    | True   |         |
| Sample Preservation Verified.                                                            | True   |         |
| There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs         | True   |         |
| Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4"). | True   |         |
| Multiphasic samples are not present.                                                     | True   |         |
| Samples do not require splitting or compositing.                                         | True   |         |
| Residual Chlorine Checked.                                                               | True   |         |

| Sample collection date/times are provided.                                       | True   |                                    |
| Appropriate sample containers are used.                                          | True   |                                    |
| Sample bottles are completely filled.                                            | True   |                                    |
| There is sufficient vol. for all requested analyses.                             | True   |                                    |
| Is the Field Sampler's name present on COC?                                      | False  | Received project as a subcontract. |
| Sample custody seals are intact.                                                 | N/A    |                                    |
| VOA sample vials do not have headspace >6mm in diameter (none, if from WV)?      | True   |                                    |

# ANALYTICAL REPORT

## PREPARED FOR

Attn: Mr. Antonio Cardoso  
Arcadis US Inc.  
4300 West Cypress Street  
Suite 450  
Tampa, Florida 33607

Generated 12/3/2025 2:41:49 PM

## JOB DESCRIPTION

Hercules Hattiesburg, MS

## JOB NUMBER

860-116515-1

# Eurofins Houston

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.

## Authorization

### Qualifiers

#### GC/MS VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| F1        | MS and/or MSD recovery exceeds control limits.                                                                 |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U         | Indicates the analyte was analyzed for but not detected.                                                       |

#### GC/MS Semi VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *+        | LCS and/or LCSD is outside acceptance limits, high biased.                                                     |
| *1        | LCS/LCSD RPD exceeds control limits.                                                                           |
| *3        | ISTD response or retention time outside acceptable limits.                                                     |
| I         | Value is EMPC (estimated maximum possible concentration).                                                      |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| S1-       | Surrogate recovery exceeds control limits, low biased.                                                         |
| S1+       | Surrogate recovery exceeds control limits, high biased.                                                        |
| U         | Indicates the analyte was analyzed for but not detected.                                                       |

### Glossary

| Abbreviation   | These commonly used abbreviations may or may not be present in this report.                                 |
|----------------|-------------------------------------------------------------------------------------------------------------|
| ☼              | Listed under the "D" column to designate that the result is reported on a dry weight basis                  |
| %R             | Percent Recovery                                                                                            |
| CFL            | Contains Free Liquid                                                                                        |
| CFU            | Colony Forming Unit                                                                                         |
| CNF            | Contains No Free Liquid                                                                                     |
| DER            | Duplicate Error Ratio (normalized absolute difference)                                                      |
| Dil Fac        | Dilution Factor                                                                                             |
| DL             | Detection Limit (DoD/DOE)                                                                                   |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC            | Decision Level Concentration (Radiochemistry)                                                               |
| EDL            | Estimated Detection Limit (Dioxin)                                                                          |
| LOD            | Limit of Detection (DoD/DOE)                                                                                |
| LOQ            | Limit of Quantitation (DoD/DOE)                                                                             |
| MCL            | EPA recommended "Maximum Contaminant Level"                                                                 |
| MDA            | Minimum Detectable Activity (Radiochemistry)                                                                |
| MDC            | Minimum Detectable Concentration (Radiochemistry)                                                           |
| MDL            | Method Detection Limit                                                                                      |
| ML             | Minimum Level (Dioxin)                                                                                      |
| MPN            | Most Probable Number                                                                                        |
| MQL            | Method Quantitation Limit                                                                                   |
| NC             | Not Calculated                                                                                              |
| ND             | Not Detected at the reporting limit (or MDL or EDL if shown)                                                |
| NEG            | Negative / Absent                                                                                           |
| POS            | Positive / Present                                                                                          |
| PQL            | Practical Quantitation Limit                                                                                |
| PRES           | Presumptive                                                                                                 |
| QC             | Quality Control                                                                                             |
| RER            | Relative Error Ratio (Radiochemistry)                                                                       |
| RL             | Reporting Limit or Requested Limit (Radiochemistry)                                                         |
| RPD            | Relative Percent Difference, a measure of the relative difference between two points                        |
| TEF            | Toxicity Equivalent Factor (Dioxin)                                                                         |
| TEQ            | Toxicity Equivalent Quotient (Dioxin)                                                                       |
| TNTC           | Too Numerous To Count                                                                                       |

# Case Narrative

Client: Arcadis US Inc.  
Project: Hercules Hattiesburg, MS

**Job ID: 860-116515-1**

**Eurofins Houston**

## Job Narrative 860-116515-1

The analytical test results presented in this report meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page, unless otherwise noted. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable. Regulated compliance samples (e.g. SDWA, NPDES) must comply with associated agency requirements/permits.

- Matrix-specific batch QC (e.g., MS, MSD, SD) may not be reported when insufficient sample volume is available or when site-specific QC samples are not submitted. In such cases, a Laboratory Control Sample Duplicate (LCSD) may be analyzed to provide precision data for the batch.
- For samples analyzed using surrogate and/or isotope dilution analytes, any recoveries falling outside of established acceptance criteria are re-prepared and/or re-analyzed to confirm results, unless the deviation is due to sample dilution or otherwise explained in the case narrative.

### Receipt

The samples were received on 11/14/2025 9:34 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 1.9°C.

### GC/MS VOA

Method 8260D: The RPD of the laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for analytical batch 860-276788 recovered outside control limits for the following analytes: 1,4-Dioxane.

Method 8260D: The following samples were diluted to bring the concentration of target analytes within the calibration range: MW-73 (860-116515-7), DUPE-04 (860-116515-8) and MW-50 (860-116515-10). Elevated reporting limits (RLs) are provided.

Method 8260D: The matrix spike (MS) recoveries for analytical batch 860-276979 were outside control limits. Sample matrix interference is suspected.

Method 8260D: The following sample was diluted to bring the concentration of target analytes within the calibration range: (860-116574-C-13 MS). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

### GC/MS Semi VOA

Method 8270E\_QQQ: The laboratory control sample and/or the laboratory control sample duplicate (LCS/LCSD) for preparation batch 860-276379 and analytical batch 860-276617 recovered outside control limits for the following analyte(s): alpha,alpha-Dimethyl phenethylamine. alpha,alpha-Dimethyl phenethylamine have been identified as a poor performing analyte when analyzed using this method; therefore, re-extraction/re-analysis was not performed. Batch precision also exceeded control limits for these analyte(s). These results have been reported and qualified.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276617 recovered above the upper control limit for 2,4,5-Trichlorophenol, Butyl benzyl phthalate and Di-n-octyl phthalate. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are:CCVIS 860-276617/2.

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-277923 recovered above the upper control limit for multiple Analytes. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-277923/3).

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for preparation batch 860-276379 and analytical batch 860-278194 recovered outside control limits for the following analytes: Ethyl Parathion, Methyl

Eurofins Houston

## Case Narrative

Client: Arcadis US Inc.

Job ID: 860-116515-1

### Job ID: 860-116515-1 (Continued)

Eurofins Houston

parathion, Dinoseb, Dimethoate, Phorate, Disulfoton and Sulfotepp. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-278194 recovered above the upper control limit for 2-Acetylaminofluorene, Pentachloronitrobenzene, N-Nitrosodi-n-butylamine, Butyl benzyl phthalate, Di-n-octyl phthalate and 2,4,5-Trichlorophenol. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-278194/2).

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-278194 recovered above the upper control limit for Ethyl Parathion, Methyl parathion, Dinoseb, Famphur, Dimethoate, Phorate, Disulfoton and Thionazin. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-278194/3).

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276617 recovered above the upper control limit for Thionazin, Sulfotepp, Disulfoton, Phorate Famphur, Methyl parathion, Ethyl Parathion, Dinoseb and Dimethoate. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-276617/3).

Method 8270E\_QQQ: The RPD of the laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for preparation batch 860-276379 and analytical batch 860-276617 recovered outside control limits for the following analytes: alpha,alpha-Dimethyl phenethylamine.

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 10% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: Six surrogates are used for this analysis. The laboratory's SOP allows one acid and one base of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following samples contained an allowable number of surrogate compounds outside limits: MW-73 (860-116515-7), DUPE-04 (860-116515-8) and MW-50 (860-116515-10). These results have been reported and qualified.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-278469 recovered above the upper control limit for 2,4,6-Tribromophenol (Surr). The associated sample is:(CCVIS 860-278469/2).

Method 8270E\_QQQ: The following samples were diluted to bring the concentration of target analytes within the calibration range: MW-73 (860-116515-7) and DUPE-04 (860-116515-8). Elevated reporting limits (RLs) are provided.

Method 8270E\_QQQ: Internal standard (ISTD) response for Perylene-d12 for the following samples in analytical batch 860-278944 was outside acceptance criteria: MW-52-S (860-116515-5) and DUPE-04 (860-116515-8). This ISTD does not correspond to any of the requested target compounds reported from this analytical batch; therefore, the data have been reported.

Method 8270E\_QQQ: The following samples required a dilution due to the nature of the sample matrix: MW-52-S (860-116515-5), MW-73 (860-116515-7), DUPE-04 (860-116515-8) and MW-50 (860-116515-10). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

Method 8270E\_QQQ: Internal standard (ISTD) response for 1,4-Dichlorobenzene-d4 and Perylene-d12 for the following sample in analytical batch 860-278944 was outside acceptance criteria: MW-73 (860-116515-7). This ISTD does not correspond to any of the requested target compounds reported from this analytical batch; therefore, the data have been reported.

Method 8270E\_QQQ: Internal standard (ISTD) response for 1,4-Dichlorobenzene-d4 for the following samples in analytical batch 860-278944 was outside acceptance criteria: MW-52-D (860-116515-9) and MW-50 (860-116515-10). This ISTD does not correspond to any of the requested target compounds reported from this analytical batch; therefore, the data have been reported.

Method 8270E\_QQQ: The following samples were diluted to bring the concentration of target analytes within the calibration range: MW-52-S (860-116515-5), MW-73 (860-116515-7), DUPE-04 (860-116515-8), MW-52-D (860-116515-9) and MW-50 (860-116515-10). Elevated reporting limits (RLs) are provided.

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116515-1

Client Sample ID: MW-54

Lab Sample ID: 860-116515-3

Date Collected: 11/13/25 08:45

Matrix: Water

Date Received: 11/14/25 09:34

## Method: SW846 8260D - Volatile Organic Compounds by GC/MS (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116515-1

Client Sample ID: MW-52-S

Lab Sample ID: 860-116515-5

Date Collected: 11/13/25 09:30

Matrix: Water

Date Received: 11/14/25 09:34

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116515-1

Client Sample ID: MW-73

Lab Sample ID: 860-116515-7

Date Collected: 11/13/25 10:02

Matrix: Water

Date Received: 11/14/25 09:34

## Method: SW846 8260D - Volatile Organic Compounds by GC/MS (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116515-1

Client Sample ID: MW-50

Lab Sample ID: 860-116515-10

Date Collected: 11/13/25 11:04

Matrix: Water

Date Received: 11/14/25 09:34

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

Eurofins Houston

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116515-1

## Method: 8260D - Volatile Organic Compounds by GC/MS (Continued)

Lab Sample ID: LCSD 860-276979/4

Matrix: Water

Analysis Batch: 276979

Client Sample ID: Lab Control Sample Dup

Prep Type: Total/NA

| Analyte  | Spike Added | LCSD Result | LCSD Qualifier | Unit | D | %Rec | %Rec Limits | RPD | RPD Limit |

Eurofins Houston

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116515-1

## Method: 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

Lab Sample ID: MB 860-276379/1-A

Matrix: Water

Analysis Batch: 276617

Client Sample ID: Method Blank

Prep Type: Total/NA

Prep Batch: 276379

| Question                                                                                 | Answer | Comment |
|------------------------------------------------------------------------------------------|--------|---------|
| Radioactivity wasn't checked or is $\leq$ background as measured by a survey meter.      | True   |         |
| The cooler's custody seal, if present, is intact.                                        | N/A    |         |
| Sample custody seals, if present, are intact.                                            | True   |         |
| The cooler or samples do not appear to have been compromised or tampered with.           | True   |         |
| Samples were received on ice.                                                            | True   |         |
| Cooler Temperature is acceptable.                                                        | True   |         |
| Cooler Temperature is recorded.                                                          | True   |         |
| COC is present.                                                                          | True   |         |
| COC is filled out in ink and legible.                                                    | True   |         |
| COC is filled out with all pertinent information.                                        | True   |         |
| Is the Field Sampler's name present on COC?                                              | True   |         |
| There are no discrepancies between the containers received and the COC.                  | True   |         |
| Samples are received within Holding Time (excluding tests with immediate HTs)            | True   |         |
| Sample containers have legible labels.                                                   | True   |         |
| Containers are not broken or leaking.                                                    | True   |         |
| Sample collection date/times are provided.                                               | True   |         |
| Appropriate sample containers are used.                                                  | True   |         |
| Sample bottles are completely filled.                                                    | True   |         |
| Sample Preservation Verified.                                                            | True   |         |
| There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs         | True   |         |
| Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4"). | True   |         |
| Multiphasic samples are not present.                                                     | True   |         |
| Samples do not require splitting or compositing.                                         | True   |         |
| Residual Chlorine Checked.                                                               | True   |         |
