Subject: **Quarterly Progress Report (December 2025 through March 2026)**  
**Former Hercules Facility, Hattiesburg, MS**

USEPA Region IV, RCRA 3013(a) Administrative Order  
Docket # RCRA-04-2011-4251

USEPA Region IV, RCRA 3008(h) Administrative Order on Consent  
Docket # RCRA-04-2014-4201(b)

USEPA Region IV, CERCLA Administrative Settlement Agreement and Order on Consent  
Docket # 04-2023-2521

Our Ref: 30274506.3003

Dear Shelby Johnston and David Egetter:

This *Quarterly Progress Report* summarizes the activities completed between December 1, 2025, and March 31, 2026, per the 2011 Resource Conservation and Recovery Act (RCRA) 3013(a) Administrative Order, the 2014 RCRA 3008(h) Administrative Order on Consent, and the 2022 Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Administrative Settlement Agreement and Order on Consent (ASAO) for the Remedial Investigation (RI)/Feasibility Study (FS) for the former Hercules LLC (Hercules) site in Hattiesburg, Mississippi, referred to herein as “the site”. As noted in the summary below, the submittal frequency for this Progress Report was adjusted from monthly to quarterly, as approved by the U.S. Environmental Protection Agency (USEPA) on December 17, 2025.

The information summarized herein is intended to document significant activities (e.g., field work, conference calls, technical deliverables, correspondence) performed throughout the reporting period and is not intended to capture all email correspondence between the USEPA and the Mississippi Department of Environmental Quality (MDEQ) (together, the Agencies) and Hercules over that same period.

## Tasks Initiated, Continued, or Completed: December 2025 through March 2026

Hercules and the Agencies continued working on finalizing the *Revised Remedial Investigation/Feasibility Study Work Plan* (Revised RI/FS Work Plan) for the site:

- On December 3, 2025, Hercules provided a summary of the key takeaways and items of agreement with the USEPA, as well as links to the materials presented during the November 17, 2025 conference call (i.e., figures, PowerPoint presentation of the Bouie River Preliminary Conceptual Site Model, and documents requested by the USEPA that were previously submitted under the RCRA program) that was held to discuss the October 28, 2025 USEPA's comments regarding the Revised RI/FS Work Plan. The USEPA provided an email concurring with the summary on December 4, 2025.
- On December 19, 2025, Hercules submitted a *Response to Comments* (RTC) letter addressing the October 28, 2025 USEPA comments on the Revised RI/FS Work Plan.
- On March 5, 2026, the USEPA provided a response letter with final comments on the December 19, 2025 RTC letter on the Revised RI/FS Work Plan.

Hercules and the Agencies also continued working on finalizing the other RI Deliverables for the site:

- On December 12, 2025, the USEPA provided a response letter with comments on the *Revised Quality Assurance Project Plan* (Revised QAPP) submitted by Hercules on June 30, 2025. The USEPA also provided a crosswalk against USEPA QAPP Standard CIO 2105-S-02.
- On January 9, 2026, Hercules submitted an email to the USEPA proposing a conference call to review the status and schedule of RI Deliverables following the submittal of the December 19, 2025 RTC letter on the Revised RI/FS Work Plan.
- On January 15, 2026, the USEPA provided a response letter with one comment on the *Revised Field Sampling Plan* (Revised FSP) submitted by Hercules on September 18, 2025.
- On March 23, 2026, the USEPA provided a response letter with one comment on the *Revised Data Management Plan* (Revised DMP) submitted by Hercules on September 18, 2025.
- On March 23, 2026, the USEPA provided a response letter with comments on the development of the Site-Specific Constituent List for Remedial Investigation submitted by Hercules on September 19, 2025; these comments will be addressed as part of the Revised RI/FS Work Plan.

Additional activities completed by Hercules for the site include the following:

- Submitted the *Monthly Progress Report* for November 2025 to the Agencies on December 17, 2025, which included a request to transition submittal of Progress Reports from a monthly to quarterly frequency. The USEPA provided an email concurring with the request on December 17, 2025.
- Decommissioned the three inactive industrial supply wells at the site on February 3 through February 6, 2026. The work was completed as approved by the USEPA in a letter dated September 24, 2025. A technical memorandum dated April 8, 2026 was submitted to the Agencies providing a field summary documenting the completion of this work.

- Completed the data management of the groundwater and surface water samples collected during the 2025 annual monitoring event (conducted in November 2025). Copies of the laboratory analytical reports for those samples are provided in **Attachment A**. Analytical data summary tables are provided in **Table 1** and **Table 2** for groundwater in the alluvial aquifer and the Hattiesburg Formation, respectively. In addition, **Table 3** presents the analytical data summary for surface water from Greens Creek and **Table 4** summarizes the data for quality assurance/quality control samples.
- Continued preparation of the *2025 Annual Consolidated Monitoring Report* documenting the activities and results of the 2025 annual monitoring event.

## Conceptual Schedule

**Attachment B** includes the updated conceptual schedule to implement the RI. The schedule was originally discussed and agreed to by the USEPA on January 14, 2025, and is being updated by Hercules as work progresses and in accordance with communications, agreements, and requests by the Agencies.

Based on the updated conceptual schedule, RI implementation is planned to begin in Fall 2026, following completion of the document review process. The USEPA is collaborating with Hercules to expedite the review process and meet RI objectives.

## Tasks Planned for Next Three Months (April through June 2026)

- Continue review and finalization of the RI/FS Work Plan and RI Deliverables in accordance with discussions with the USEPA (**Attachment B**):
  - Concurrent submittal of an RTC letter addressing the USEPA's December 12, 2025 comment letter and the Final QAPP.
  - Concurrent submittal of an RTC letter addressing the USEPA's comment letters for each document, along with the Final RI/FS Work Plan, FSP, DMP, and HASP.
  - Coordinate conference call(s), as needed, to discuss submittals and streamline approval of RI Deliverables.
- Submittal of a technical memorandum documenting the decommissioning of the three inactive industrial supply wells at the site on April 8, 2026 (noted above).
- Submittal of the *2025 Annual Consolidated Monitoring Report* documenting the activities and results of the 2025 annual monitoring event.

## Personnel and/or Project Changes

- None this period.

## Community Involvement

- On December 10, 2025, the USEPA distributed a fact sheet providing an update to the community on work completed at the site.

- On January 30, 2026, the USEPA distributed a postcard (email and regular mail) inviting the community to participate in a public meeting on February 24, 2026 to discuss findings and recommendations from the Technical Assistance Needs Assessment (TANA) conducted by Skeo and USEPA in September/October 2025.
- On February 11, 2026, Hercules participated in a USEPA-hosted conference call with the Agencies, as well as representatives from the City of Hattiesburg and Skeo (USEPA contractor), to discuss the public meeting scheduled for February 24, 2026.
- On February 24, 2026, the USEPA and Skeo hosted a public meeting to present the findings and recommendations from the TANA completed in September/October 2025. The meeting took place at the C.E. Roy Community Center in Hattiesburg, Mississippi, and was open to the public with an afternoon session from 2:00 to 4:00 pm, followed by an evening session from 5:00 to 7:00 pm. Representatives from Hercules, MDEQ, and the City of Hattiesburg participated in the meeting, and provided the USEPA with assistance responding to comments and questions from the public during both sessions. Hercules had a table at the public meeting and shared materials (i.e., posters and fact sheet) for use and/or distribution during the USEPA's meeting.
- On March 24, 2026, Hercules provided a summary of key takeaways from the meeting, feedback received from the community, and suggestions that could improve community involvement for future activities. The USEPA acknowledged the email and provided responses to the suggestions.
- On March 28, 2026, Gloria Tatum, Hercules' Community Involvement Coordinator, attended a community meeting at the invitation of the Mobile Bouie Community Organization to provide an update on the status of environmental cleanup activities at the site and shared an email summary of community feedback with the Agencies on April 14, 2026.

## USEPA/MDEQ Support Needed

Hercules is awaiting Agency approval of the *Revised Emergency Response and Notification Plan* submitted on August 20, 2025, so the document can be finalized.

The Hercules team appreciates USEPA's continued support with this project. If there are any questions concerning this submittal, please contact the Hercules Project Coordinator, Chrissy Piechoski at 302-647-9798/ [chrissy.piechoski@ashland.com](mailto:chrissy.piechoski@ashland.com), or me, Suzy Weber, Arcadis Project Manager at 618-208-6957/ [suzy.weber@arcadis.com](mailto:suzy.weber@arcadis.com).

Sincerely,

Arcadis U.S., Inc.

Suzy Weber  
Project Manager

**Notes:**  
(1) MDEQ has indicated that the published TRG for acetophenone is incorrect and that the USEPA RSL should be used; therefore, the MDEQ TRG is shown as "NS."  
Results are reported in micrograms per liter (µg/L).  
Detections are in **bold** print.  
Concentrations above USEPA Tapwater RSL are **red and italic font**.  
Concentrations above USEPA MCL are underlined.  
Concentrations above MDEQ Groundwater TRG are shaded gray.  
\* LCS or LCS duplicate is outside acceptance limits.  
\*- LCS and/or LCS duplicate is outside acceptance limits, low biased.  
\*+ LCS and/or LCS duplicate is outside acceptance limits, high biased.  
\*1 LCS/LCS duplicate relative percent difference exceeds control limits.  
< / U - Indicates analyte was analyzed for but not detected.  
B - Compound was found in the blank and sample.  
ft bgs - feet below ground surface.  
F1 - Matrix spike and/or matrix spike duplicate recovery outside of acceptance limits.  
F2 - Matrix spike/Matrix spike duplicate relative percent difference exceeds control limits.  
H - Sample was prepped or analyzed beyond the specified holding time.  
HI - Hazard Index.  
J - Result is less than the reporting limit but greater than or equal to the method detection limit. Concentration is an approximate value.  
LCS - Laboratory Control Sample.  
MCL - Maximum Contaminant Level.  
MDEQ - Mississippi Department of Environmental Quality.  
NS - No Standard.  
RSL - Regional Screening Level.  
RUAO - Restrictive Use Agreed Order.  
TRG - Target Remediation Goal.  
USEPA - U.S. Environmental Protection Agency.

**Table 2**  
**Groundwater Analytical Results - Hattiesburg Formation Well Network**  
**Quarterly Progress Report (December 2025 - March 2026)**  
**Hercules Inc. Superfund Site**  
**Hattiesburg, Mississippi**

**Notes:**

<sup>(1)</sup> MDEQ has indicated that the published TRG for acetophenone is incorrect and that the USEPA RSL should be used; therefore, the MDEQ TRG is shown as "NS."

Results are reported in micrograms per liter (µg/L).

Detections are in **bold** print.

Concentrations above USEPA Tapwater RSL are *red and italic font*.

Concentrations above USEPA MCL are underlined.

Concentrations above MDEQ Groundwater TRG are shaded gray.

\* LCS or LCS duplicate is outside acceptance limits.

\*- LCS and/or LCS duplicate is outside acceptance limits, low biased.

\*+ LCS and/or LCS duplicate is outside acceptance limits, high biased.

\*1 LCS/LCS duplicate relative percent difference exceeds control limits.

< / U - Indicates analyte was analyzed for but not detected.

ft bgs - feet below ground surface.

HI - Hazard Index.

J - Result is less than the reporting limit but greater than or equal to the method detection limit. Concentration is an approximate value.

LCS - Laboratory Control Sample.

MCL - Maximum Contaminant Level.

MDEQ - Mississippi Department of Environmental Quality.

NS - No Standard.

RSL - Regional Screening Level.

TRG - Target Remediation Goal.

USEPA - U.S. Environmental Protection Agency.

**Table 3**  
**Surface Water Analytical Results - Greens Creek**  
**Quarterly Progress Report (December 2025 - March 2026)**  
**Hercules Inc. Superfund Site**  
**Hattiesburg, Mississippi**

**Notes:**

<sup>(1)</sup> Screening Levels refer to the 2015 USEPA Human Health Water Quality Criteria for the consumption of Water + Organism, or to the USEPA Tap Water RSL (HI=0.1, November 2024) if no Water Quality Criterion exists.

<sup>(2)</sup> MDEQ has indicated that the published TRG for acetophenone is incorrect and that the USEPA RSL should be used; therefore, the MDEQ TRG is shown as "NS."

Results are reported in micrograms per liter (µg/L).

Detections are in **bold** print.

Concentrations above USEPA Water Quality Criteria are **red and italic font**.

Concentrations above MDEQ Groundwater TRG are shaded gray.

\* LCS or LCS duplicate is outside acceptance limits.

\*- LCS and/or LCS duplicate is outside acceptance limits, low biased.

\*+ LCS and/or LCS duplicate is outside acceptance limits, high biased.

\*1 LCS/LCS duplicate relative percent difference exceeds control limits.

< / U - Indicates analyte was analyzed for but not detected.

HI - Hazard Index.

J - Result is less than the reporting limit but greater than or equal to the method detection limit. Concentration is an approximate value.

LCS - Laboratory Control Sample.

MDEQ - Mississippi Department of Environmental Quality.

NS - No Standard.

RSL - Regional Screening Level.

TRG - Target Remediation Goal.

USEPA - U.S. Environmental Protection Agency.

| Total Dioxathion                                         |              | --         | --        | --        | --         | <1.00 U     | --             | --           | --         | --        | --        | --        | --        | --        | --        | --         | --         | --         | --         |

**Notes:**  
Results are reported in micrograms per liter (µg/L).  
Detections are in **bold** print.  
\* LCS or LCS duplicate is outside acceptance limits.  
\*- LCS and/or LCS duplicate is outside acceptance limits, low biased.  
\*+ LCS and/or LCS duplicate is outside acceptance limits, high biased.  
\*1 LCS/LCS duplicate relative percent difference exceeds control limits.  
< / U - Indicates analyte was analyzed for but not detected.  
J - Result is less than the reporting limit but greater than or equal to the method detection limit. Concentration is an approximate value.  
LCS - Laboratory Control Sample.

**Laboratory Analytical Reports – November 2025**

# ANALYTICAL REPORT

## PREPARED FOR

Attn: Timothy Hassett  
Ashland LLC  
Ashland Hercules Research Center  
500 Hercules Road  
Bldg 8145  
Wilmington, Delaware 19808  
Generated 11/18/2025 3:49:08 PM

## JOB DESCRIPTION

Hercules Hattiesburg, MS

## JOB NUMBER

860-115709-1

# Eurofins Houston

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.

## Authorization

### Qualifiers

#### GC/MS VOA

| Qualifier | Qualifier Description                                      |
|-----------|------------------------------------------------------------|
| *+        | LCS and/or LCSD is outside acceptance limits, high biased. |
| F1        | MS and/or MSD recovery exceeds control limits.             |
| U         | Indicates the analyte was analyzed for but not detected.   |

#### GC/MS Semi VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *-        | LCS and/or LCSD is outside acceptance limits, low biased.                                                      |
| *+        | LCS and/or LCSD is outside acceptance limits, high biased.                                                     |
| I         | Value is EMPC (estimated maximum possible concentration).                                                      |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| S1+       | Surrogate recovery exceeds control limits, high biased.                                                        |
| U         | Indicates the analyte was analyzed for but not detected.                                                       |

### Glossary

| Abbreviation   | These commonly used abbreviations may or may not be present in this report.                                 |
|----------------|-------------------------------------------------------------------------------------------------------------|
| ☼              | Listed under the "D" column to designate that the result is reported on a dry weight basis                  |
| %R             | Percent Recovery                                                                                            |
| CFL            | Contains Free Liquid                                                                                        |
| CFU            | Colony Forming Unit                                                                                         |
| CNF            | Contains No Free Liquid                                                                                     |
| DER            | Duplicate Error Ratio (normalized absolute difference)                                                      |
| Dil Fac        | Dilution Factor                                                                                             |
| DL             | Detection Limit (DoD/DOE)                                                                                   |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC            | Decision Level Concentration (Radiochemistry)                                                               |
| EDL            | Estimated Detection Limit (Dioxin)                                                                          |
| LOD            | Limit of Detection (DoD/DOE)                                                                                |
| LOQ            | Limit of Quantitation (DoD/DOE)                                                                             |
| MCL            | EPA recommended "Maximum Contaminant Level"                                                                 |
| MDA            | Minimum Detectable Activity (Radiochemistry)                                                                |
| MDC            | Minimum Detectable Concentration (Radiochemistry)                                                           |
| MDL            | Method Detection Limit                                                                                      |
| ML             | Minimum Level (Dioxin)                                                                                      |
| MPN            | Most Probable Number                                                                                        |
| MQL            | Method Quantitation Limit                                                                                   |
| NC             | Not Calculated                                                                                              |
| ND             | Not Detected at the reporting limit (or MDL or EDL if shown)                                                |
| NEG            | Negative / Absent                                                                                           |
| POS            | Positive / Present                                                                                          |
| PQL            | Practical Quantitation Limit                                                                                |
| PRES           | Presumptive                                                                                                 |
| QC             | Quality Control                                                                                             |
| RER            | Relative Error Ratio (Radiochemistry)                                                                       |
| RL             | Reporting Limit or Requested Limit (Radiochemistry)                                                         |
| RPD            | Relative Percent Difference, a measure of the relative difference between two points                        |
| TEF            | Toxicity Equivalent Factor (Dioxin)                                                                         |
| TEQ            | Toxicity Equivalent Quotient (Dioxin)                                                                       |
| TNTC           | Too Numerous To Count                                                                                       |

# Case Narrative

Project: Hercules Hattiesburg, MS

Job ID: 860-115709-1

**Job ID: 860-115709-1**

**Eurofins Houston**

## Job Narrative 860-115709-1

The analytical test results presented in this report meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page, unless otherwise noted. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable. Regulated compliance samples (e.g. SDWA, NPDES) must comply with associated agency requirements/permits.

- Matrix-specific batch QC (e.g., MS, MSD, SD) may not be reported when insufficient sample volume is available or when site-specific QC samples are not submitted. In such cases, a Laboratory Control Sample Duplicate (LCSD) may be analyzed to provide precision data for the batch.
- For samples analyzed using surrogate and/or isotope dilution analytes, any recoveries falling outside of established acceptance criteria are re-prepared and/or re-analyzed to confirm results, unless the deviation is due to sample dilution or otherwise explained in the case narrative.

### Receipt

The samples were received on 11/5/2025 9:11 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 2.9°C.

### GC/MS VOA

Method 8260D: The continuing calibration verification (CCV) associated with batch 860-274817 recovered above the upper control limit for Ethyl methacrylate (32%), Methylene Chloride (45%). The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-274817/2).

Method 8260D: The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for analytical batch 860-274817 recovered outside control limits for the following analytes: Ethyl methacrylate and Methylene Chloride. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

Method 8260D: The matrix spike (MS) recoveries for analytical batch 860-274817 were outside control limits. Sample matrix interference is suspected.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

### GC/MS Semi VOA

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-274826 recovered above the upper control limit for 1,3-Dichlorobenzene, Di-n-octyl phthalate, N-Nitrosodi-n-butylamine and Pronamide. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-274826/2).

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-274826 recovered above the upper control limit for Dimethoate, Disulfoton, Ethyl Parathion, Methyl parathion, Phorate, Sulfotepp and Thionazin. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-274826/3).

Method 8270E\_QQQ: The laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for preparation batch 860-275005 and analytical batch 860-274826 recovered outside control limits for the following analytes: Dimethoate, Disulfoton, Ethyl Parathion, Methyl parathion, Phorate and Sulfotepp. These analytes were biased high in the LCS/LCSD and were not detected in the associated samples; therefore, the data have been reported.

Method 8270E\_QQQ: The laboratory control sample and/or the laboratory control sample duplicate (LCS/LCSD) for preparation batch 860-275005 and analytical batch 860-274826 recovered outside control limits for the following analyte(s): 3,3'-

Dimethylbenzidine. 3,3'-Dimethylbenzidine have been identified as poor performing analytes when analyzed using this method; therefore, re-extraction/re-analysis was not performed. These results have been reported and qualified.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-275090 recovered above the upper control limit for Dimethoate, Disulfoton, Ethyl Parathion, Methyl parathion, Phorate, Sulfotepp and Thionazin. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-275090/3).

Method 8270E\_QQQ: Six surrogates are used for this analysis. The laboratory's SOP allows one acid and one base of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following sample contained an allowable number of surrogate compounds outside limits: HMW-5 (860-115709-5). These results have been reported and qualified.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Eurofins Houston

## Detection Summary

Client: Ashland LLC  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-115709-1

**Client Sample ID: HMW-4**

**Lab Sample ID: 860-115709-1**

No Detections.

**Client Sample ID: HMW-2**

**Lab Sample ID: 860-115709-2**

| Analyte        | Result | Qualifier | RL    | MDL   | Unit | Dil Fac | D | Method | Prep Type |
|----------------|--------|-----------|-------|-------|------|---------|---|--------|-----------|
| Diphenyl ether | 0.209  | J         | 0.568 | 0.100 | ug/L | 1       |   | 8270E  | Total/NA  |

**Client Sample ID: HMW-1**

**Lab Sample ID: 860-115709-3**

No Detections.

**Client Sample ID: HMW-3**

**Lab Sample ID: 860-115709-4**

No Detections.

**Client Sample ID: HMW-5**

**Lab Sample ID: 860-115709-5**

No Detections.

**Client Sample ID: TB-01**

**Lab Sample ID: 860-115709-6**

No Detections.

This Detection Summary does not include radiochemical test results.

# Client Sample Results

Client: Ashland LLC  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-115709-1

Client Sample ID: HMW-2

Lab Sample ID: 860-115709-2

Date Collected: 11/04/25 10:18

Matrix: Water

Date Received: 11/05/25 09:11

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

# Client Sample Results

Client: Ashland LLC  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-115709-1

Client Sample ID: HMW-1

Lab Sample ID: 860-115709-3

Date Collected: 11/04/25 11:27

Matrix: Water

Date Received: 11/05/25 09:11

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

# Client Sample Results

Client: Ashland LLC  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-115709-1

Client Sample ID: HMW-3

Lab Sample ID: 860-115709-4

Date Collected: 11/04/25 13:45

Matrix: Water

Date Received: 11/05/25 09:11

## Method: SW846 8260D - Volatile Organic Compounds by GC/MS (Continued)

Eurofins Houston

# QC Sample Results

Client: Ashland LLC  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-115709-1

## Method: 8260D - Volatile Organic Compounds by GC/MS (Continued)

Lab Sample ID: 860-115888-D-2 MS

Matrix: Water

Analysis Batch: 274817

Client Sample ID: Matrix Spike

Prep Type: Total/NA

Eurofins Houston

# QC Sample Results

Client: Ashland LLC  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-115709-1

## Method: 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

Lab Sample ID: LCSD 860-275005/3-A

Matrix: Water

Analysis Batch: 274826

Client Sample ID: Lab Control Sample Dup

Prep Type: Total/NA

Prep Batch: 275005

| Question                                                                                 | Answer | Comment |
|------------------------------------------------------------------------------------------|--------|---------|
| Radioactivity wasn't checked or is $\leq$ background as measured by a survey meter.      | True   |         |
| The cooler's custody seal, if present, is intact.                                        | N/A    |         |
| Sample custody seals, if present, are intact.                                            | True   |         |
| The cooler or samples do not appear to have been compromised or tampered with.           | True   |         |
| Samples were received on ice.                                                            | True   |         |
| Cooler Temperature is acceptable.                                                        | True   |         |
| Cooler Temperature is recorded.                                                          | True   |         |
| COC is present.                                                                          | True   |         |
| COC is filled out in ink and legible.                                                    | True   |         |
| COC is filled out with all pertinent information.                                        | True   |         |
| Is the Field Sampler's name present on COC?                                              | True   |         |
| There are no discrepancies between the containers received and the COC.                  | True   |         |
| Samples are received within Holding Time (excluding tests with immediate HTs)            | True   |         |
| Sample containers have legible labels.                                                   | True   |         |
| Containers are not broken or leaking.                                                    | True   |         |
| Sample collection date/times are provided.                                               | True   |         |
| Appropriate sample containers are used.                                                  | True   |         |
| Sample bottles are completely filled.                                                    | True   |         |
| Sample Preservation Verified.                                                            | True   |         |
| There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs         | True   |         |
| Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4"). | True   |         |
| Multiphasic samples are not present.                                                     | True   |         |
| Samples do not require splitting or compositing.                                         | True   |         |
| Residual Chlorine Checked.                                                               | True   |         |

# ANALYTICAL REPORT

## PREPARED FOR

Attn: Mr. Antonio Cardoso  
Arcadis US Inc.  
4300 West Cypress Street  
Suite 450  
Tampa, Florida 33607

Generated 11/25/2025 1:49:27 PM

## JOB DESCRIPTION

Hercules Hattiesburg, MS

## JOB NUMBER

860-115932-1

# Eurofins Houston

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.

## Authorization

### Qualifiers

#### GC/MS VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| F1        | MS and/or MSD recovery exceeds control limits.                                                                 |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U         | Indicates the analyte was analyzed for but not detected.                                                       |

#### GC/MS Semi VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *-        | LCS and/or LCSD is outside acceptance limits, low biased.                                                      |
| *+        | LCS and/or LCSD is outside acceptance limits, high biased.                                                     |
| *1        | LCS/LCSD RPD exceeds control limits.                                                                           |
| *3        | ISTD response or retention time outside acceptable limits.                                                     |
| E         | Result exceeded calibration range.                                                                             |
| H         | Sample was prepped or analyzed beyond the specified holding time. This does not meet regulatory requirements.  |
| I         | Value is EMPC (estimated maximum possible concentration).                                                      |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U         | Indicates the analyte was analyzed for but not detected.                                                       |

### Glossary

| Abbreviation   | These commonly used abbreviations may or may not be present in this report.                                 |
|----------------|-------------------------------------------------------------------------------------------------------------|
| ☼              | Listed under the "D" column to designate that the result is reported on a dry weight basis                  |
| %R             | Percent Recovery                                                                                            |
| CFL            | Contains Free Liquid                                                                                        |
| CFU            | Colony Forming Unit                                                                                         |
| CNF            | Contains No Free Liquid                                                                                     |
| DER            | Duplicate Error Ratio (normalized absolute difference)                                                      |
| Dil Fac        | Dilution Factor                                                                                             |
| DL             | Detection Limit (DoD/DOE)                                                                                   |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC            | Decision Level Concentration (Radiochemistry)                                                               |
| EDL            | Estimated Detection Limit (Dioxin)                                                                          |
| LOD            | Limit of Detection (DoD/DOE)                                                                                |
| LOQ            | Limit of Quantitation (DoD/DOE)                                                                             |
| MCL            | EPA recommended "Maximum Contaminant Level"                                                                 |
| MDA            | Minimum Detectable Activity (Radiochemistry)                                                                |
| MDC            | Minimum Detectable Concentration (Radiochemistry)                                                           |
| MDL            | Method Detection Limit                                                                                      |
| ML             | Minimum Level (Dioxin)                                                                                      |
| MPN            | Most Probable Number                                                                                        |
| MQL            | Method Quantitation Limit                                                                                   |
| NC             | Not Calculated                                                                                              |
| ND             | Not Detected at the reporting limit (or MDL or EDL if shown)                                                |
| NEG            | Negative / Absent                                                                                           |
| POS            | Positive / Present                                                                                          |
| PQL            | Practical Quantitation Limit                                                                                |
| PRES           | Presumptive                                                                                                 |
| QC             | Quality Control                                                                                             |
| RER            | Relative Error Ratio (Radiochemistry)                                                                       |
| RL             | Reporting Limit or Requested Limit (Radiochemistry)                                                         |
| RPD            | Relative Percent Difference, a measure of the relative difference between two points                        |
| TEF            | Toxicity Equivalent Factor (Dioxin)                                                                         |
| TEQ            | Toxicity Equivalent Quotient (Dioxin)                                                                       |
| TNTC           | Too Numerous To Count                                                                                       |

# Case Narrative

**Job ID: 860-115932-1**

**Eurofins Houston**

## Job Narrative 860-115932-1

The analytical test results presented in this report meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page, unless otherwise noted. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable. Regulated compliance samples (e.g. SDWA, NPDES) must comply with associated agency requirements/permits.

- Matrix-specific batch QC (e.g., MS, MSD, SD) may not be reported when insufficient sample volume is available or when site-specific QC samples are not submitted. In such cases, a Laboratory Control Sample Duplicate (LCSD) may be analyzed to provide precision data for the batch.
- For samples analyzed using surrogate and/or isotope dilution analytes, any recoveries falling outside of established acceptance criteria are re-prepared and/or re-analyzed to confirm results, unless the deviation is due to sample dilution or otherwise explained in the case narrative.

### Receipt

The samples were received on 11/7/2025 9:02 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 2.5°C.

### GC/MS VOA

Method 8260D: The continuing calibration verification (CCV) associated with batch 860-275382 recovered outside acceptance criteria, low biased, for Benzyl chloride (-23%) and Vinyl acetate (-32%). A low level standard was analyzed, and the target analytes are detected. Since the associated samples were non-detect for the analyte(s), the data are reported.

Method 8260D: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for analytical batch 860-275382 were outside control limits. Sample matrix interference is suspected.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

### GC/MS Semi VOA

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-275269 recovered above the upper control limit for Butyl benzyl phthalate and Di-n-octyl phthalate. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-275269/2).

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276080 recovered above the upper control limit for 2,4,5-Trichlorophenol, Bis(2-ethylhexyl) phthalate and Di-n-octyl phthalate. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-276080/2).

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276080 recovered above the upper control limit for Dimethoate, Disulfoton, Ethyl Parathion, Famphur, Methyl parathion, Phorate, Sulfotepp and Thionazin. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-276080/3).

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-275269 recovered above the upper control limit for Dimethoate, Dinoseb, Disulfoton, Ethyl Parathion, Methyl parathion, Phorate and Sulfotepp. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-275269/3).

Method 8270E\_QQQ: The laboratory control sample and/or the laboratory control sample duplicate (LCS/LCSD) for preparation batch 860-274823 and analytical batch 860-275269 recovered outside control limits for the following analytes: 2-Picoline, 2-

Eurofins Houston

## Case Narrative

### Job ID: 860-115932-1 (Continued)

Eurofins Houston

Toluidine, 3,3'-Dimethylbenzidine, Aniline, and Pyridine. These analytes have been identified as poor performing analytes when analyzed using this method; therefore, re-extraction/re-analysis was not performed. Batch precision also exceeded control limits for these analytes. These results have been reported and qualified.

Method 8270E\_QQQ: The laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for preparation batch 860-274823 and analytical batch 860-275269 recovered outside control limits for the following analytes: Dimethoate, Dinoseb, Disulfoton, Ethyl Parathion, Methyl parathion, Phorate and Sulfotepp. These analytes were biased high in the LCS/LCSD and were not detected in the associated samples; therefore, the data have been reported.

Method 8270E\_QQQ: The RPD of the laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for preparation batch 860-274823 and analytical batch 860-275269 recovered outside control limits for the following analytes: 2-Naphthylamine, 4-Chloroaniline, Aniline and p-Phenylene diamine.

Method 8270E\_QQQ: Internal standard (ISTD) Chrysene-d12, Perylene-d12, and Phenanthrene-d10 responses for the following sample in analytical batch 860-276600 was outside acceptance criteria (biased low): (MB 860-274823/1-A). These ISTD correspond to the requested target compounds reported from this analytical batch were non-detected; therefore, the data have been reported.

Method 8270E\_QQQ: The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for preparation batch 860-276655 and analytical batch 860-276932 recovered outside control limits for the following analytes: multiple Analytes. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276932 recovered above the upper control limit for multiple Analytes. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-276932/3).

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276932 recovered above the upper control limit for Di-n-octyl phthalate. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are.

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-277397 recovered above the upper control limit for multiple Analytes. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-277397/3).

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-115932-1

Client Sample ID: MW-47

Lab Sample ID: 860-115932-2

Date Collected: 11/06/25 07:55

Matrix: Water

Date Received: 11/07/25 09:02

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-115932-1

Client Sample ID: MW-47

Lab Sample ID: 860-115932-2

Date Collected: 11/06/25 07:55

Matrix: Water

Date Received: 11/07/25 09:02

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-115932-1

## Method: 8260D - Volatile Organic Compounds by GC/MS

Lab Sample ID: MB 860-275382/10

Matrix: Water

Analysis Batch: 275382

Client Sample ID: Method Blank

Prep Type: Total/NA

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-115932-1

## Method: 8260D - Volatile Organic Compounds by GC/MS (Continued)

Lab Sample ID: 860-116038-B-11 MS

Matrix: Water

Analysis Batch: 275382

Client Sample ID: Matrix Spike

Prep Type: Total/NA

## QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-115932-1

### Method: 8260D - Volatile Organic Compounds by GC/MS (Continued)

Lab Sample ID: 860-116038-B-11 MSD

Matrix: Water

Analysis Batch: 275382

Client Sample ID: Matrix Spike Duplicate

Prep Type: Total/NA

Eurofins Houston

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-115932-1

## Method: 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

Lab Sample ID: MB 860-274823/1-A

Matrix: Water

Analysis Batch: 275269

Client Sample ID: Method Blank

Prep Type: Total/NA

Prep Batch: 274823

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-115932-1

## Method: 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

Lab Sample ID: MB 860-274823/1-A

Matrix: Water

Analysis Batch: 275269

Client Sample ID: Method Blank

Prep Type: Total/NA

Prep Batch: 274823

Eurofins Houston

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-115932-1

## Method: 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

Lab Sample ID: LCS 860-276655/2-A

Matrix: Water

Analysis Batch: 276932

Client Sample ID: Lab Control Sample

Prep Type: Total/NA

Prep Batch: 276655

| Question                                                                                 | Answer | Comment |
|------------------------------------------------------------------------------------------|--------|---------|
| Radioactivity wasn't checked or is $\leq$ background as measured by a survey meter.      | True   |         |
| The cooler's custody seal, if present, is intact.                                        | True   |         |
| Sample custody seals, if present, are intact.                                            | True   |         |
| The cooler or samples do not appear to have been compromised or tampered with.           | True   |         |
| Samples were received on ice.                                                            | True   |         |
| Cooler Temperature is acceptable.                                                        | True   |         |
| Cooler Temperature is recorded.                                                          | True   | 2.5     |
| COC is present.                                                                          | True   |         |
| COC is filled out in ink and legible.                                                    | True   |         |
| COC is filled out with all pertinent information.                                        | True   |         |
| Is the Field Sampler's name present on COC?                                              | True   |         |
| There are no discrepancies between the containers received and the COC.                  | True   |         |
| Samples are received within Holding Time (excluding tests with immediate HTs)            | True   |         |
| Sample containers have legible labels.                                                   | True   |         |
| Containers are not broken or leaking.                                                    | True   |         |
| Sample collection date/times are provided.                                               | True   |         |
| Appropriate sample containers are used.                                                  | True   |         |
| Sample bottles are completely filled.                                                    | True   |         |
| Sample Preservation Verified.                                                            | True   |         |
| There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs         | True   |         |
| Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4"). | True   |         |
| Multiphasic samples are not present.                                                     | True   |         |
| Samples do not require splitting or compositing.                                         | True   |         |
| Residual Chlorine Checked.                                                               | True   |         |

# ANALYTICAL REPORT

## PREPARED FOR

Attn: Mr. Antonio Cardoso  
Arcadis US Inc.  
4300 West Cypress Street  
Suite 450  
Tampa, Florida 33607

Generated 11/25/2025 1:51:45 PM

## JOB DESCRIPTION

Hercules Hattiesburg, MS

## JOB NUMBER

860-115977-1

# Eurofins Houston

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.

## Authorization

### Qualifiers

#### GC/MS VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *+        | LCS and/or LCSD is outside acceptance limits, high biased.                                                     |
| F1        | MS and/or MSD recovery exceeds control limits.                                                                 |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U         | Indicates the analyte was analyzed for but not detected.                                                       |

#### GC/MS Semi VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *-        | LCS and/or LCSD is outside acceptance limits, low biased.                                                      |
| *+        | LCS and/or LCSD is outside acceptance limits, high biased.                                                     |
| *1        | LCS/LCSD RPD exceeds control limits.                                                                           |
| *3        | ISTD response or retention time outside acceptable limits.                                                     |
| I         | Value is EMPC (estimated maximum possible concentration).                                                      |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U         | Indicates the analyte was analyzed for but not detected.                                                       |

### Glossary

| Abbreviation   | These commonly used abbreviations may or may not be present in this report.                                 |
|----------------|-------------------------------------------------------------------------------------------------------------|
| ☼              | Listed under the "D" column to designate that the result is reported on a dry weight basis                  |
| %R             | Percent Recovery                                                                                            |
| CFL            | Contains Free Liquid                                                                                        |
| CFU            | Colony Forming Unit                                                                                         |
| CNF            | Contains No Free Liquid                                                                                     |
| DER            | Duplicate Error Ratio (normalized absolute difference)                                                      |
| Dil Fac        | Dilution Factor                                                                                             |
| DL             | Detection Limit (DoD/DOE)                                                                                   |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC            | Decision Level Concentration (Radiochemistry)                                                               |
| EDL            | Estimated Detection Limit (Dioxin)                                                                          |
| LOD            | Limit of Detection (DoD/DOE)                                                                                |
| LOQ            | Limit of Quantitation (DoD/DOE)                                                                             |
| MCL            | EPA recommended "Maximum Contaminant Level"                                                                 |
| MDA            | Minimum Detectable Activity (Radiochemistry)                                                                |
| MDC            | Minimum Detectable Concentration (Radiochemistry)                                                           |
| MDL            | Method Detection Limit                                                                                      |
| ML             | Minimum Level (Dioxin)                                                                                      |
| MPN            | Most Probable Number                                                                                        |
| MQL            | Method Quantitation Limit                                                                                   |
| NC             | Not Calculated                                                                                              |
| ND             | Not Detected at the reporting limit (or MDL or EDL if shown)                                                |
| NEG            | Negative / Absent                                                                                           |
| POS            | Positive / Present                                                                                          |
| PQL            | Practical Quantitation Limit                                                                                |
| PRES           | Presumptive                                                                                                 |
| QC             | Quality Control                                                                                             |
| RER            | Relative Error Ratio (Radiochemistry)                                                                       |
| RL             | Reporting Limit or Requested Limit (Radiochemistry)                                                         |
| RPD            | Relative Percent Difference, a measure of the relative difference between two points                        |
| TEF            | Toxicity Equivalent Factor (Dioxin)                                                                         |
| TEQ            | Toxicity Equivalent Quotient (Dioxin)                                                                       |
| TNTC           | Too Numerous To Count                                                                                       |

**Eurofins Houston**

## Job Narrative 860-115977-1

The analytical test results presented in this report meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page, unless otherwise noted. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable. Regulated compliance samples (e.g. SDWA, NPDES) must comply with associated agency requirements/permits.

- Matrix-specific batch QC (e.g., MS, MSD, SD) may not be reported when insufficient sample volume is available or when site-specific QC samples are not submitted. In such cases, a Laboratory Control Sample Duplicate (LCSD) may be analyzed to provide precision data for the batch.
- For samples analyzed using surrogate and/or isotope dilution analytes, any recoveries falling outside of established acceptance criteria are re-prepared and/or re-analyzed to confirm results, unless the deviation is due to sample dilution or otherwise explained in the case narrative.

### Receipt

The samples were received on 11/7/2025 9:02 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 3.3°C.

### GC/MS VOA

Method 8260D: The continuing calibration verification (CCV) associated with batch 860-274817 recovered above the upper control limit for Ethyl methacrylate (32%), Methylene Chloride (45%). The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-274817/2).

Method 8260D: The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for analytical batch 860-274817 recovered outside control limits for the following analytes: Ethyl methacrylate and Methylene Chloride. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

Method 8260D: The matrix spike (MS) recoveries for analytical batch 860-274817 were outside control limits. Sample matrix interference is suspected.

Method 8260D: The continuing calibration verification (CCV) associated with batch 860-275028 recovered above the upper control limit for ; Ethyl methacrylate (38%) and Iodomethane (25%) The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-275028/2).

Method 8260D: The continuing calibration verification (CCV) associated with batch 860-275028 recovered outside acceptance criteria, low biased, Acrolein (-32.0%) and Dichloro difluoromethane(-24.0%). A reporting limit (RL) standard was analyzed, and the target analytes are detected. Since the associated samples were non-detect for the analyte(s), the data are reported.

Method 8260D: The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for analytical batch 860-275028 recovered outside control limits for the following analytes: Ethyl methacrylate. These analytes were biased high in the LCS/LCSD and were not detected in the associated samples; therefore, the data have been reported.

Method 8260D: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 860-274977 and analytical batch 860-275028 were outside control limits. Sample matrix interference is suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

### GC/MS Semi VOA

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-275564 recovered above the upper control limit for 2-Methylphenol, Phenol-d5 (Surr), N-Nitrosodiphenylamine, N-Nitrosopyrrolidine, Bis(2-ethylhexyl) phthalate, Benzo[a]anthracene and Di-n-octyl phthalate. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-275564/2).

Eurofins Houston

## Case Narrative

Client: Arcadis US Inc.  
Project: Hercules Hattiesburg, MS

Job ID: 860-115977-1

### Job ID: 860-115977-1 (Continued)

Eurofins Houston

Method 8270E\_QQQ: The laboratory control sample and/or the laboratory control sample duplicate (LCS/LCSD) for preparation batch 860-274823 and analytical batch 860-275269 recovered outside control limits for the following analytes: 2-Picoline, 2-Toluidine, 3,3'-Dimethylbenzidine, Aniline, and Pyridine. These analytes have been identified as poor performing analytes when analyzed using this method; therefore, re-extraction/re-analysis was not performed. Batch precision also exceeded control limits for these analytes. These results have been reported and qualified.

Method 8270E\_QQQ: The laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for preparation batch 860-274823 and analytical batch 860-275269 recovered outside control limits for the following analytes: Dimethoate, Dinoseb, Disulfoton, Ethyl Parathion, Methyl parathion, Phorate and Sulfotepp. These analytes were biased high in the LCS/LCSD and were not detected in the associated samples; therefore, the data have been reported.

Method 8270E\_QQQ: The RPD of the laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for preparation batch 860-274823 and analytical batch 860-275269 recovered outside control limits for the following analytes: 2-Naphthylamine, 4-Chloroaniline, Aniline and p-Phenylene diamine.

Method 8270E\_QQQ: Internal standard (ISTD) Chrysene-d12, Perylene-d12, and Phenanthrene-d10 responses for the following sample in analytical batch 860-276600 was outside acceptance criteria (biased low): (MB 860-274823/1-A). These ISTD correspond to the requested target compounds reported from this analytical batch were non-detected; therefore, the data have been reported.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-275564 recovered above the upper control limit for multiple Analytes. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-275564/3).

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-275269 recovered above the upper control limit for Butyl benzyl phthalate and Di-n-octyl phthalate. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-275269 recovered above the upper control limit for multiple Analytes. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-275269/3).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-115977-1

Client Sample ID: MW-86

Lab Sample ID: 860-115977-2

Date Collected: 11/05/25 08:30

Matrix: Water

Date Received: 11/07/25 09:02

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-115977-1

Client Sample ID: MW-87

Lab Sample ID: 860-115977-3

Date Collected: 11/05/25 09:24

Matrix: Water

Date Received: 11/07/25 09:02

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-115977-1

## Method: 8260D - Volatile Organic Compounds by GC/MS (Continued)

Lab Sample ID: MB 860-274817/9

Matrix: Water

Analysis Batch: 274817

Client Sample ID: Method Blank

Prep Type: Total/NA

Eurofins Houston

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-115977-1

## Method: 8260D - Volatile Organic Compounds by GC/MS (Continued)

Lab Sample ID: 860-115888-D-2 MS

Matrix: Water

Analysis Batch: 274817

Client Sample ID: Matrix Spike

Prep Type: Total/NA

Eurofins Houston

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-115977-1

## Method: 8260D - Volatile Organic Compounds by GC/MS (Continued)

Lab Sample ID: LCSD 860-275028/4

Matrix: Water

Analysis Batch: 275028

Client Sample ID: Lab Control Sample Dup

Prep Type: Total/NA

| Question                                                                                 | Answer | Comment |
|------------------------------------------------------------------------------------------|--------|---------|
| Radioactivity wasn't checked or is $\leq$ background as measured by a survey meter.      | True   |         |
| The cooler's custody seal, if present, is intact.                                        | True   |         |
| Sample custody seals, if present, are intact.                                            | True   |         |
| The cooler or samples do not appear to have been compromised or tampered with.           | True   |         |
| Samples were received on ice.                                                            | True   |         |
| Cooler Temperature is acceptable.                                                        | True   |         |
| Cooler Temperature is recorded.                                                          | True   | 3.3     |
| COC is present.                                                                          | True   |         |
| COC is filled out in ink and legible.                                                    | True   |         |
| COC is filled out with all pertinent information.                                        | True   |         |
| Is the Field Sampler's name present on COC?                                              | True   |         |
| There are no discrepancies between the containers received and the COC.                  | True   |         |
| Samples are received within Holding Time (excluding tests with immediate HTs)            | True   |         |
| Sample containers have legible labels.                                                   | True   |         |
| Containers are not broken or leaking.                                                    | True   |         |
| Sample collection date/times are provided.                                               | True   |         |
| Appropriate sample containers are used.                                                  | True   |         |
| Sample bottles are completely filled.                                                    | True   |         |
| Sample Preservation Verified.                                                            | True   |         |
| There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs         | True   |         |
| Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4"). | True   |         |
| Multiphasic samples are not present.                                                     | True   |         |
| Samples do not require splitting or compositing.                                         | True   |         |
| Residual Chlorine Checked.                                                               | True   |         |

# ANALYTICAL REPORT

## PREPARED FOR

Attn: Mr. Antonio Cardoso  
Arcadis US Inc.  
4300 West Cypress Street  
Suite 450  
Tampa, Florida 33607

Generated 11/25/2025 2:19:02 PM

## JOB DESCRIPTION

Hercules Hattiesburg, MS

## JOB NUMBER

860-116013-1

# Eurofins Houston

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.

## Authorization

### Qualifiers

#### GC/MS VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| F1        | MS and/or MSD recovery exceeds control limits.                                                                 |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U         | Indicates the analyte was analyzed for but not detected.                                                       |

#### GC/MS Semi VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *-        | LCS and/or LCSD is outside acceptance limits, low biased.                                                      |
| *+        | LCS and/or LCSD is outside acceptance limits, high biased.                                                     |
| *1        | LCS/LCSD RPD exceeds control limits.                                                                           |
| *3        | ISTD response or retention time outside acceptable limits.                                                     |
| I         | Value is EMPC (estimated maximum possible concentration).                                                      |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| S1+       | Surrogate recovery exceeds control limits, high biased.                                                        |
| U         | Indicates the analyte was analyzed for but not detected.                                                       |

### Glossary

| Abbreviation   | These commonly used abbreviations may or may not be present in this report.                                 |
|----------------|-------------------------------------------------------------------------------------------------------------|
| ☼              | Listed under the "D" column to designate that the result is reported on a dry weight basis                  |
| %R             | Percent Recovery                                                                                            |
| CFL            | Contains Free Liquid                                                                                        |
| CFU            | Colony Forming Unit                                                                                         |
| CNF            | Contains No Free Liquid                                                                                     |
| DER            | Duplicate Error Ratio (normalized absolute difference)                                                      |
| Dil Fac        | Dilution Factor                                                                                             |
| DL             | Detection Limit (DoD/DOE)                                                                                   |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC            | Decision Level Concentration (Radiochemistry)                                                               |
| EDL            | Estimated Detection Limit (Dioxin)                                                                          |
| LOD            | Limit of Detection (DoD/DOE)                                                                                |
| LOQ            | Limit of Quantitation (DoD/DOE)                                                                             |
| MCL            | EPA recommended "Maximum Contaminant Level"                                                                 |
| MDA            | Minimum Detectable Activity (Radiochemistry)                                                                |
| MDC            | Minimum Detectable Concentration (Radiochemistry)                                                           |
| MDL            | Method Detection Limit                                                                                      |
| ML             | Minimum Level (Dioxin)                                                                                      |
| MPN            | Most Probable Number                                                                                        |
| MQL            | Method Quantitation Limit                                                                                   |
| NC             | Not Calculated                                                                                              |
| ND             | Not Detected at the reporting limit (or MDL or EDL if shown)                                                |
| NEG            | Negative / Absent                                                                                           |
| POS            | Positive / Present                                                                                          |
| PQL            | Practical Quantitation Limit                                                                                |
| PRES           | Presumptive                                                                                                 |
| QC             | Quality Control                                                                                             |
| RER            | Relative Error Ratio (Radiochemistry)                                                                       |
| RL             | Reporting Limit or Requested Limit (Radiochemistry)                                                         |
| RPD            | Relative Percent Difference, a measure of the relative difference between two points                        |
| TEF            | Toxicity Equivalent Factor (Dioxin)                                                                         |
| TEQ            | Toxicity Equivalent Quotient (Dioxin)                                                                       |
| TNTC           | Too Numerous To Count                                                                                       |

**Job ID: 860-116013-1**

**Eurofins Houston**

## Job Narrative 860-116013-1

The analytical test results presented in this report meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page, unless otherwise noted. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable. Regulated compliance samples (e.g. SDWA, NPDES) must comply with associated agency requirements/permits.

- Matrix-specific batch QC (e.g., MS, MSD, SD) may not be reported when insufficient sample volume is available or when site-specific QC samples are not submitted. In such cases, a Laboratory Control Sample Duplicate (LCSD) may be analyzed to provide precision data for the batch.
- For samples analyzed using surrogate and/or isotope dilution analytes, any recoveries falling outside of established acceptance criteria are re-prepared and/or re-analyzed to confirm results, unless the deviation is due to sample dilution or otherwise explained in the case narrative.

### Receipt

The samples were received on 11/7/2025 9:02 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 4.2°C.

### GC/MS VOA

Method 8260D: The continuing calibration verification (CCV) associated with batch 860-274815 recovered outside acceptance criteria, low biased, for Chloromethane (-22%). A low level standard was analyzed, and the target analytes are detected. Since the associated samples were non-detect for the analyte(s), the data are reported.

Method 8260D: The continuing calibration verification (CCV) associated with batch 860-274815 recovered above the upper control limit for Hexachlorobutadiene (21%) and Isopropyl alcohol (21%). The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-274815/2).

Method 8260D: The following samples were diluted to bring the concentration of target analytes within the calibration range: MW-68 (860-116013-6), MW-66 (860-116013-8) and MW-64 (860-116013-12). Elevated reporting limits (RLs) are provided.

Method 8260D: The following sample was diluted to bring the concentration of target analytes within the calibration range: DUPE-03 (860-116013-9). Elevated reporting limits (RLs) are provided.

Method 8260D: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for analytical batch 860-275131 were outside control limits. Sample matrix interference is suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

### GC/MS Semi VOA

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-275269 recovered above the upper control limit for Butyl benzyl phthalate and Di-n-octyl phthalate. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-275269/2).

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276080 recovered above the upper control limit for 2,4,5-Trichlorophenol, Bis(2-ethylhexyl) phthalate and Di-n-octyl phthalate. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-276080/2).

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-275269 recovered above the upper control limit for Dimethoate, Dinoseb, Disulfoton, Ethyl Parathion, Methyl parathion, Phorate and Sulfotepp. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-275269/3).

Eurofins Houston

## Case Narrative

Client: Arcadis US Inc.  
Project: Hercules Hattiesburg, MS

Job ID: 860-116013-1

### Job ID: 860-116013-1 (Continued)

Eurofins Houston

Method 8270E\_QQQ: The laboratory control sample and/or the laboratory control sample duplicate (LCS/LCSD) for preparation batch 860-274823 and analytical batch 860-275269 recovered outside control limits for the following analytes: 2-Picoline, 2-Toluidine, 3,3'-Dimethylbenzidine, Aniline, and Pyridine. These analytes have been identified as poor performing analytes when analyzed using this method; therefore, re-extraction/re-analysis was not performed. Batch precision also exceeded control limits for these analytes. These results have been reported and qualified.

Method 8270E\_QQQ: The laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for preparation batch 860-274823 and analytical batch 860-275269 recovered outside control limits for the following analytes: Dimethoate, Dinoseb, Disulfoton, Ethyl Parathion, Methyl parathion, Phorate and Sulfotepp. These analytes were biased high in the LCS/LCSD and were not detected in the associated samples; therefore, the data have been reported.

Method 8270E\_QQQ: The RPD of the laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for preparation batch 860-274823 and analytical batch 860-275269 recovered outside control limits for the following analytes: 2-Naphthylamine, 4-Chloroaniline, Aniline and p-Phenylene diamine.

Method 8270E\_QQQ: Internal standard (ISTD) Chrysene-d12, Perylene-d12, and Phenanthrene-d10 responses for the following sample in analytical batch 860-276600 was outside acceptance criteria (biased low): (MB 860-274823/1-A). These ISTD correspond to the requested target compounds reported from this analytical batch were non-detected; therefore, the data have been reported.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-275931 recovered above the upper control limit for 2-Acetylaminofluorene, Aramite Peak 1, Butyl benzyl phthalate and Di-n-octyl phthalate. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-275931/2).

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-275931 recovered above the upper control limit for Dimethoate, Dinoseb, Disulfoton, Ethyl Parathion, Famphur, Methyl parathion, Phorate, Sulfotepp and Thionazin. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-275931/3).

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-275822 recovered above the upper control limit for 2-Fluorophenol (Surr) and Hexachloroethane. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-275822/2).

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276080 recovered above the upper control limit for multiple Analytes. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-276080/3).

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276619 recovered above the upper control limit for 2-Fluorophenol (Surr). The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-276619/2).

Method 8270E\_QQQ: The following samples required a dilution due to the nature of the sample matrix: MW-68 (860-116013-6), MW-66 (860-116013-8), DUPE-03 (860-116013-9) and MW-64 (860-116013-12). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

Method 8270E\_QQQ: The following samples were diluted to bring the concentration of target analytes within the calibration range: MW-68 (860-116013-6) and MW-64 (860-116013-12). Elevated reporting limits (RLs) are provided.

Method 8270E\_QQQ: Internal standard (ISTD) response for Chrysene-d12 and Perylene-d12 for the following samples in analytical batch 860-276926 was outside acceptance criteria: MW-66 (860-116013-8) and MW-64 (860-116013-12). This ISTD does not correspond to any of the requested target compounds reported from this analytical batch; therefore, the data have been reported.

## Case Narrative

Client: Arcadis US Inc.  
Project: Hercules Hattiesburg, MS

Job ID: 860-116013-1

### Job ID: 860-116013-1 (Continued)

Eurofins Houston

Method 8270E\_QQQ: The following samples required a dilution due to the nature of the sample matrix: MW-66 (860-116013-8) and DUPE-03 (860-116013-9). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-277276 recovered above the upper control limit for Phenol-d5 and 2-Fluorophenol. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-277276/2).

Method 8270E\_QQQ: Six surrogates are used for this analysis. The laboratory's SOP allows one acid and one base of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following sample contained an allowable number of surrogate compounds outside limits: MW-67 (860-116013-5). These results have been reported and qualified.

Method 8270E\_QQQ: The following sample was diluted to bring the concentration of target analytes within the calibration range: MW-67 (860-116013-5). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Eurofins Houston

## Detection Summary

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116013-1

## Detection Summary

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116013-1

### Client Sample ID: DUPE-03 (Continued)

Lab Sample ID: 860-116013-9

| Analyte                  | Result | Qualifier | RL    | MDL    | Unit | Dil Fac | D | Method | Prep Type |
|--------------------------|--------|-----------|-------|--------|------|---------|---|--------|-----------|
| Isophorone               | 0.314  | J I       | 0.572 | 0.106  | ug/L | 1       |   | 8270E  | Total/NA  |
| Diphenyl ether           | 6.08   |           | 0.572 | 0.101  | ug/L | 1       |   | 8270E  | Total/NA  |
| 1,1'-Biphenyl            | 1.93   |           | 0.572 | 0.113  | ug/L | 1       |   | 8270E  | Total/NA  |
| 2,6-Dichlorophenol       | 0.143  | J         | 0.572 | 0.0974 | ug/L | 1       |   | 8270E  | Total/NA  |
| 2-Methylnaphthalene - DL | 48.7   | J         | 57.2  | 10.9   | ug/L | 100     |   | 8270E  | Total/NA  |
| Naphthalene - DL         | 240    |           | 57.2  | 11.4   | ug/L | 100     |   | 8270E  | Total/NA  |

### Client Sample ID: MW-69

Lab Sample ID: 860-116013-10

| Analyte             | Result | Qualifier | RL    | MDL   | Unit | Dil Fac | D | Method | Prep Type |
|---------------------|--------|-----------|-------|-------|------|---------|---|--------|-----------|
| 2-Methylnaphthalene | 1.11   |           | 0.571 | 0.109 | ug/L | 1       |   | 8270E  | Total/NA  |
| Acenaphthene        | 0.129  | J         | 0.571 | 0.101 | ug/L | 1       |   | 8270E  | Total/NA  |
| Naphthalene         | 1.25   |           | 0.571 | 0.114 | ug/L | 1       |   | 8270E  | Total/NA  |
| Phenol              | 7.61   |           | 1.14  | 0.506 | ug/L | 1       |   | 8270E  | Total/NA  |

### Client Sample ID: FB-03

Lab Sample ID: 860-116013-11

| Analyte                   | Result | Qualifier | RL   | MDL   | Unit | Dil Fac | D | Method | Prep Type |

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116013-1

Client Sample ID: MW-71

Lab Sample ID: 860-116013-1

Date Collected: 11/05/25 10:54

Matrix: Water

Date Received: 11/07/25 09:02

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116013-1

Client Sample ID: MW-70

Lab Sample ID: 860-116013-2

Date Collected: 11/05/25 11:08

Matrix: Water

Date Received: 11/07/25 09:02

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116013-1

Client Sample ID: MW-67

Lab Sample ID: 860-116013-5

Date Collected: 11/05/25 13:34

Matrix: Water

Date Received: 11/07/25 09:02

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116013-1

Client Sample ID: MW-68

Lab Sample ID: 860-116013-6

Date Collected: 11/05/25 13:47

Matrix: Water

Date Received: 11/07/25 09:02

## Method: SW846 8260D - Volatile Organic Compounds by GC/MS (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116013-1

Client Sample ID: MW-66

Lab Sample ID: 860-116013-8

Date Collected: 11/05/25 14:24

Matrix: Water

Date Received: 11/07/25 09:02

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116013-1

Client Sample ID: MW-69

Lab Sample ID: 860-116013-10

Date Collected: 11/05/25 14:34

Matrix: Water

Date Received: 11/07/25 09:02

## Method: SW846 8260D - Volatile Organic Compounds by GC/MS (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116013-1

Client Sample ID: MW-64

Lab Sample ID: 860-116013-12

Date Collected: 11/05/25 15:11

Matrix: Water

Date Received: 11/07/25 09:02

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116013-1

## Method: 8260D - Volatile Organic Compounds by GC/MS (Continued)

Lab Sample ID: MB 860-274815/9

Matrix: Water

Analysis Batch: 274815

Client Sample ID: Method Blank

Prep Type: Total/NA

Eurofins Houston

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116013-1

## Method: 8260D - Volatile Organic Compounds by GC/MS (Continued)

Lab Sample ID: LCSD 860-274815/4

Matrix: Water

Analysis Batch: 274815

Client Sample ID: Lab Control Sample Dup

Prep Type: Total/NA

| Analyte                     | Spike Added | LCSD Result | LCSD Qualifier | Unit | D | %Rec | %Rec Limits | RPD | RPD Limit |
|-----------------------------|-------------|-------------|----------------|------|---|------|-------------|-----|-----------|
| Carbon tetrachloride        | 50.0        | 45.58       |                | ug/L |   | 91   | 70 - 130    | 7   | 25        |
