# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116013-1

## Method: 8260D - Volatile Organic Compounds by GC/MS (Continued)

Lab Sample ID: 860-116013-1 MS

Matrix: Water

Analysis Batch: 274815

Client Sample ID: MW-71

Prep Type: Total/NA

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116013-1

## Method: 8260D - Volatile Organic Compounds by GC/MS (Continued)

Lab Sample ID: MB 860-275131/9

Matrix: Water

Analysis Batch: 275131

Client Sample ID: Method Blank

Prep Type: Total/NA

Eurofins Houston

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116013-1

## Method: 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

Lab Sample ID: MB 860-274823/1-A

Matrix: Water

Analysis Batch: 275269

Client Sample ID: Method Blank

Prep Type: Total/NA

Prep Batch: 274823

| Question                                                                                 | Answer | Comment |
|------------------------------------------------------------------------------------------|--------|---------|
| Radioactivity wasn't checked or is $\leq$ background as measured by a survey meter.      | True   |         |
| The cooler's custody seal, if present, is intact.                                        | True   |         |
| Sample custody seals, if present, are intact.                                            | True   |         |
| The cooler or samples do not appear to have been compromised or tampered with.           | True   |         |
| Samples were received on ice.                                                            | True   |         |
| Cooler Temperature is acceptable.                                                        | True   |         |
| Cooler Temperature is recorded.                                                          | True   | 4.2     |
| COC is present.                                                                          | True   |         |
| COC is filled out in ink and legible.                                                    | True   |         |
| COC is filled out with all pertinent information.                                        | True   |         |
| Is the Field Sampler's name present on COC?                                              | True   |         |
| There are no discrepancies between the containers received and the COC.                  | True   |         |
| Samples are received within Holding Time (excluding tests with immediate HTs)            | True   |         |
| Sample containers have legible labels.                                                   | True   |         |
| Containers are not broken or leaking.                                                    | True   |         |
| Sample collection date/times are provided.                                               | True   |         |
| Appropriate sample containers are used.                                                  | True   |         |
| Sample bottles are completely filled.                                                    | True   |         |
| Sample Preservation Verified.                                                            | True   |         |
| There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs         | True   |         |
| Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4"). | True   |         |
| Multiphasic samples are not present.                                                     | True   |         |
| Samples do not require splitting or compositing.                                         | True   |         |
| Residual Chlorine Checked.                                                               | True   |         |

# ANALYTICAL REPORT

## PREPARED FOR

Attn: Mr. Antonio Cardoso  
Arcadis US Inc.  
4300 West Cypress Street  
Suite 450  
Tampa, Florida 33607

Generated 12/9/2025 3:50:07 PM

## JOB DESCRIPTION

Hercules Hattiesburg, MS

## JOB NUMBER

860-116038-1

# Eurofins Houston

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.

### Qualifiers

#### GC/MS VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *+        | LCS and/or LCSD is outside acceptance limits, high biased.                                                     |
| F1        | MS and/or MSD recovery exceeds control limits.                                                                 |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U         | Indicates the analyte was analyzed for but not detected.                                                       |

#### GC/MS Semi VOA

| Qualifier | Qualifier Description                                                                                                                                     |
|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| *-        | LCS and/or LCSD is outside acceptance limits, low biased.                                                                                                 |
| *+        | LCS and/or LCSD is outside acceptance limits, high biased.                                                                                                |
| *1        | LCS/LCSD RPD exceeds control limits.                                                                                                                      |
| 4         | MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable. |
| E         | Result exceeded calibration range.                                                                                                                        |
| F1        | MS and/or MSD recovery exceeds control limits.                                                                                                            |
| F2        | MS/MSD RPD exceeds control limits                                                                                                                         |
| H         | Sample was prepped or analyzed beyond the specified holding time. This does not meet regulatory requirements.                                             |
| I         | Value is EMPC (estimated maximum possible concentration).                                                                                                 |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.                                            |
| S1-       | Surrogate recovery exceeds control limits, low biased.                                                                                                    |
| U         | Indicates the analyte was analyzed for but not detected.                                                                                                  |

### Glossary

| Abbreviation   | These commonly used abbreviations may or may not be present in this report.                                 |
|----------------|-------------------------------------------------------------------------------------------------------------|
| ☼              | Listed under the "D" column to designate that the result is reported on a dry weight basis                  |
| %R             | Percent Recovery                                                                                            |
| CFL            | Contains Free Liquid                                                                                        |
| CFU            | Colony Forming Unit                                                                                         |
| CNF            | Contains No Free Liquid                                                                                     |
| DER            | Duplicate Error Ratio (normalized absolute difference)                                                      |
| Dil Fac        | Dilution Factor                                                                                             |
| DL             | Detection Limit (DoD/DOE)                                                                                   |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC            | Decision Level Concentration (Radiochemistry)                                                               |
| EDL            | Estimated Detection Limit (Dioxin)                                                                          |
| LOD            | Limit of Detection (DoD/DOE)                                                                                |
| LOQ            | Limit of Quantitation (DoD/DOE)                                                                             |
| MCL            | EPA recommended "Maximum Contaminant Level"                                                                 |
| MDA            | Minimum Detectable Activity (Radiochemistry)                                                                |
| MDC            | Minimum Detectable Concentration (Radiochemistry)                                                           |
| MDL            | Method Detection Limit                                                                                      |
| ML             | Minimum Level (Dioxin)                                                                                      |
| MPN            | Most Probable Number                                                                                        |
| MQL            | Method Quantitation Limit                                                                                   |
| NC             | Not Calculated                                                                                              |
| ND             | Not Detected at the reporting limit (or MDL or EDL if shown)                                                |
| NEG            | Negative / Absent                                                                                           |
| POS            | Positive / Present                                                                                          |
| PQL            | Practical Quantitation Limit                                                                                |
| PRES           | Presumptive                                                                                                 |
| QC             | Quality Control                                                                                             |
| RER            | Relative Error Ratio (Radiochemistry)                                                                       |
| RL             | Reporting Limit or Requested Limit (Radiochemistry)                                                         |
| RPD            | Relative Percent Difference, a measure of the relative difference between two points                        |

## Job Narrative 860-116038-1

The analytical test results presented in this report meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page, unless otherwise noted. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable. Regulated compliance samples (e.g. SDWA, NPDES) must comply with associated agency requirements/permits.

- Matrix-specific batch QC (e.g., MS, MSD, SD) may not be reported when insufficient sample volume is available or when site-specific QC samples are not submitted. In such cases, a Laboratory Control Sample Duplicate (LCSD) may be analyzed to provide precision data for the batch.
- For samples analyzed using surrogate and/or isotope dilution analytes, any recoveries falling outside of established acceptance criteria are re-prepared and/or re-analyzed to confirm results, unless the deviation is due to sample dilution or otherwise explained in the case narrative.

### Receipt

The samples were received on 11/8/2025 9:20 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 1.8°C.

### GC/MS VOA

Method 8260D: The continuing calibration verification (CCV) associated with batch 860-275382 recovered outside acceptance criteria, low biased, for Benzyl chloride (-23%) and Vinyl acetate (-32%). A low level standard was analyzed, and the target analytes are detected. Since the associated samples were non-detect for the analyte(s), the data are reported.

Method 8260D: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for analytical batch 860-275382 were outside control limits. Sample matrix interference is suspected.

Method 8260D: The following samples were diluted to bring the concentration of target analytes within the calibration range: MW-30D (860-116038-6), MW-29S (860-116038-7), MW-29D (860-116038-8) and DUPE-02 (860-116038-9). Elevated reporting limits (RLs) are provided.

Method 8260D: The following samples were diluted to bring the concentration of target analytes within the calibration range: MW-29S (860-116038-7), (560-129512-A-4) and (560-129512-A-4 MS). Elevated reporting limits (RLs) are provided.

Method 8260D: The laboratory control sample (LCS) for analytical batch 860-275621 recovered outside control limits for the following analytes: Ethyl methacrylate and Propionitrile. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

Method 8260D: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for analytical batch 860-275621 were outside control limits. Sample matrix interference is suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

Method 8260D: The continuing calibration verification (CCV) associated with batch 860-275621 recovered outside acceptance criteria, low biased, for Acrolein (-47%). A reporting limit (RL) standard was analyzed, and the target analytes are detected. Since the associated samples were non-detect for the analyte(s), the data are reported.

Method 8260D: The continuing calibration verification (CCV) associated with batch 860-275621 recovered above the upper control limit for 2-Butanone, Butadiene, Dichloro difluoromethane, Ethyl methacrylate, Iodomethane, Methacrylonitrile, Propionitrile, and Vinyl acetate. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is: (CCVIS 860-275621/2).

Method 8260D: The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for analytical batch 860-275621 recovered outside control limits for the following analytes: Ethyl methacrylate, Propionitrile, Methacrylonitrile, Tetrahydrofuran and 2-Butanone. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

### Job ID: 860-116038-1 (Continued)

Eurofins Houston

Method 8270E\_QQQ: The laboratory control sample and/or the laboratory control sample duplicate (LCS/LCSD) for preparation batch 860-275601 and analytical batch 860-275964 recovered outside control limits for the following analyte(s): Benzyl alcohol. Benzyl alcohol has been identified as a poor performing analyte when analyzed using this method; therefore, re-extraction/re-analysis was not performed. Batch precision also exceeded control limits for these analyte(s). These results have been reported and qualified.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-275964 recovered above the upper control limit for Di-n-octyl phthalate, 1,3-Dinitrobenzene, Hexachloropropene and Pronamide. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are.

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for preparation batch 860-275601 and analytical batch 860-275964 recovered outside control limits for the following analytes: Dimethoate, Ethyl Parathion, Dinoseb, Phorate, Sulfotepp, Methyl parathion, Methapyrilene, Disulfoton and Thionazin. These analytes were biased high in the LCS/LCSD and were not detected in the associated samples; therefore, the data have been reported.

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276089 recovered above the upper control limit for Bis(2-ethylhexyl) phthalate and Di-n-octyl phthalate. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are.

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276089 recovered above the upper control limit for multiple Analytes. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-276089/3).

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-275964 recovered above the upper control limit for Dimethoate, Ethyl Parathion, Dinoseb, Phorate, Sulfotepp, Methyl parathion, Disulfoton and Thionazin. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-275964/3).

Method 8270E\_QQQ: The laboratory is using 70 - 130% as interim acceptance criteria for recoveries of spiked analytes for Safrole, Total, until in-house LCS limits are developed. Data is flagged and reported.

(LCS 860-275601/2-A)

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276290 recovered above the upper control limit for multiple Analytes. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-276290/2).

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276290 recovered above the upper control limit for multiple Analytes. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-276290/3).

Method 8270E\_QQQ: The laboratory is using default limits of 70-130% as interim acceptance criteria for the recovery of spiked

Eurofins Houston

analytes for Safrole, Total until in house limits are developed. The data is flagged and reported.

(LCS 860-275601/2-A) and (LCSD 860-275601/3-A)

Method 8270E\_QQQ: Internal standard (ISTD) response for Perylene-d12 for the following samples in analytical batch 860-276737 was outside acceptance criteria: MW-29D (860-116038-8) and DUPE-02 (860-116038-9). This ISTD does not correspond to any of the requested target compounds reported from this analytical batch; therefore, the data have been reported.

Method 8270E\_QQQ: Six surrogates are used for this analysis. The laboratory's SOP allows one acid and one base of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following samples contained an allowable number of surrogate compounds outside limits: MW-33S (860-116038-11[MS]) and MW-33S (860-116038-11[MSD]). These results have been reported and qualified.

Method 8270E\_QQQ: The following samples were diluted due to abundance of target analytes : MW-29D (860-116038-8), DUPE-02 (860-116038-9) and MW-33D (860-116038-12). As such, surrogate recoveries are below the calibration range or are not reported, and elevated reporting limits (RLs) are provided.

Method 8270E\_QQQ: The following sample required a dilution due to the nature of the sample matrix: MW-33D (860-116038-12). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

Method 8270E\_QQQ: The following sample required a dilution due to the nature of the sample matrix: MW-34DR (860-116038-2). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

Method 8270E\_QQQ: The following sample was diluted to bring the concentration of target analytes within the calibration range: MW-34DR (860-116038-2). Elevated reporting limits (RLs) are provided.

Method 8270E\_QQQ: The following samples required a dilution due to the nature of the sample matrix: MW-33S (860-116038-11[MS]) and MW-33S (860-116038-11[MSD]). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-277389 recovered above the upper control limit for Phenol-d5 (Surr). The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-277389/2).

Method 8270E\_QQQ: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 860-277294 and analytical batch 860-277683 were outside control limits for one or more analytes. See QC Sample Results for detail. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery is within acceptance limits.

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The following samples were re-prepared outside of preparation holding time due to initial analysis MS/MS data not matching: MW-33S (860-116038-11), MW-33S (860-116038-11[MS]) and MW-33S (860-116038-11[MSD]).

Method 8270E\_QQQ: The laboratory control sample (LCS) for preparation batch 860-277294 and analytical batch 860-277514 recovered outside control limits for multiple analytes. The associated sample(s) was re-prepared and/or re-analyzed outside holding time.

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-277514 recovered above the upper control limit for multiple Analytes. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-277514/3).

## Case Narrative

Client: Arcadis US Inc.  
Project: Hercules Hattiesburg, MS

Job ID: 860-116038-1

### Job ID: 860-116038-1 (Continued)

Eurofins Houston

Method 8270E\_QQQ: The following samples were diluted to bring the concentration of target analytes within the calibration range: MW-33S (860-116038-11[MS]) and MW-33S (860-116038-11[MSD]). Elevated reporting limits (RLs) are provided.

Method 8270E\_QQQ: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 860-275601 and analytical batch 860-276926 were outside control limits for one or more analytes. See QC Sample Results for detail. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery is within acceptance limits.

Method 8270E\_QQQ: The native sample, matrix spike, and matrix spike duplicate (MS/MSD) associated with preparation batch 860-275601 and analytical batch 860-276926 were performed at the same dilution. Due to the additional level of analyte present in the spiked samples, the concentration of 1,1'-Biphenyl in the MSD was above the instrument calibration range. The data have been reported and qualified.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-278793 recovered above the upper control limit for Dimethoate, Disulfoton, Ethyl Parathion, Famphur, Phorate, Sulfotepp, Methapyrilene and Methyl parathion. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is: (CCV 860-278793/3).

Method 8270E\_QQQ: The following samples were diluted due to the nature of the sample matrix: MW-33S (860-116038-11[MS]) and MW-33S (860-116038-11[MSD]). Elevated reporting limits (RLs) are provided.

Method 8270E\_QQQ: The following samples were re-prepared and re-analyzed outside of preparation holding time due to initial analysis

A9 spike omitted: MW-33S (860-116038-11[MS]) and MW-33S (860-116038-11[MSD]).

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The following samples were diluted due to the nature of the sample matrix: MW-33S (860-116038-11[MS]) and MW-33S (860-116038-11[MSD]). Because of this dilution, the matrix spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116038-1

Client Sample ID: MW-34SR

Lab Sample ID: 860-116038-1

Date Collected: 11/06/25 08:25

Matrix: Water

Date Received: 11/08/25 09:20

## Method: SW846 8260D - Volatile Organic Compounds by GC/MS (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116038-1

Client Sample ID: MW-34DR

Lab Sample ID: 860-116038-2

Date Collected: 11/06/25 09:07

Matrix: Water

Date Received: 11/08/25 09:20

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116038-1

Client Sample ID: MW-32S

Lab Sample ID: 860-116038-3

Date Collected: 11/06/25 09:54

Matrix: Water

Date Received: 11/08/25 09:20

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116038-1

Client Sample ID: MW-32D

Lab Sample ID: 860-116038-4

Date Collected: 11/06/25 10:29

Matrix: Water

Date Received: 11/08/25 09:20

## Method: SW846 8260D - Volatile Organic Compounds by GC/MS (Continued)

Eurofins Houston

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116038-1

Client Sample ID: MW-30D

Lab Sample ID: 860-116038-6

Date Collected: 11/06/25 13:20

Matrix: Water

Date Received: 11/08/25 09:20

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

Eurofins Houston

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116038-1

Client Sample ID: MW-29S

Lab Sample ID: 860-116038-7

Date Collected: 11/06/25 14:12

Matrix: Water

Date Received: 11/08/25 09:20

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

Eurofins Houston

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116038-1

Client Sample ID: DUPE-02

Lab Sample ID: 860-116038-9

Date Collected: 11/06/25 00:00

Matrix: Water

Date Received: 11/08/25 09:20

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116038-1

Client Sample ID: MW-33D

Lab Sample ID: 860-116038-12

Date Collected: 11/07/25 09:04

Matrix: Water

Date Received: 11/08/25 09:20

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

Surrogate Legend

Eurofins Houston

# Surrogate Summary

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

TBP = 2,4,6-Tribromophenol (Surr)

FBP = 2-Fluorobiphenyl

2FP = 2-Fluorophenol (Surr)

NBZ = Nitrobenzene-d5 (Surr)

PHL = Phenol-d5 (Surr)

TPHd14 = p-Terphenyl-d14

Job ID: 860-116038-1

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116038-1

## Method: 8260D - Volatile Organic Compounds by GC/MS

Lab Sample ID: MB 860-275140/19

Matrix: Water

Analysis Batch: 275140

Client Sample ID: Method Blank

Prep Type: Total/NA

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116038-1

## Method: 8260D - Volatile Organic Compounds by GC/MS (Continued)

Lab Sample ID: MB 860-275382/10

Matrix: Water

Analysis Batch: 275382

Client Sample ID: Method Blank

Prep Type: Total/NA

Eurofins Houston

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116038-1

## Method: 8260D - Volatile Organic Compounds by GC/MS (Continued)

Lab Sample ID: 860-116038-11 MSD

Matrix: Water

Analysis Batch: 275382

Client Sample ID: MW-33S

Prep Type: Total/NA

Eurofins Houston

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116038-1

## Method: 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

Lab Sample ID: LCSD 860-275601/3-A

Matrix: Water

Analysis Batch: 275964

Client Sample ID: Lab Control Sample Dup

Prep Type: Total/NA

Prep Batch: 275601

Eurofins Houston

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116038-1

## Method: 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

Lab Sample ID: LCSD 860-275601/3-A

Matrix: Water

Analysis Batch: 276290

Client Sample ID: Lab Control Sample Dup

Prep Type: Total/NA

Prep Batch: 275601

Eurofins Houston

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116038-1

## Method: 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

Lab Sample ID: 860-116038-11 MSD

Matrix: Water

Analysis Batch: 276089

Client Sample ID: MW-33S

Prep Type: Total/NA

Prep Batch: 275601

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116038-1

## Method: 8270E - Semivolatile Organic Compounds (GC-MS/MS) - RE (Continued)

Lab Sample ID: 860-116038-11 MS

Matrix: Water

Analysis Batch: 277683

Client Sample ID: MW-33S

Prep Type: Total/NA

Prep Batch: 277294

Eurofins Houston

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116038-1

## Method: 8270E - Semivolatile Organic Compounds (GC-MS/MS) - RE (Continued)

Lab Sample ID: 860-116038-11 MSD

Matrix: Water

Analysis Batch: 277683

Client Sample ID: MW-33S

Prep Type: Total/NA

Prep Batch: 277294

| Question                                                                                 | Answer | Comment |
|------------------------------------------------------------------------------------------|--------|---------|
| Radioactivity wasn't checked or is $\leq$ background as measured by a survey meter.      | True   |         |
| The cooler's custody seal, if present, is intact.                                        | N/A    |         |
| Sample custody seals, if present, are intact.                                            | True   |         |
| The cooler or samples do not appear to have been compromised or tampered with.           | True   |         |
| Samples were received on ice.                                                            | True   |         |
| Cooler Temperature is acceptable.                                                        | True   |         |
| Cooler Temperature is recorded.                                                          | True   |         |
| COC is present.                                                                          | True   |         |
| COC is filled out in ink and legible.                                                    | True   |         |
| COC is filled out with all pertinent information.                                        | True   |         |
| Is the Field Sampler's name present on COC?                                              | True   |         |
| There are no discrepancies between the containers received and the COC.                  | True   |         |
| Samples are received within Holding Time (excluding tests with immediate HTs)            | True   |         |
| Sample containers have legible labels.                                                   | True   |         |
| Containers are not broken or leaking.                                                    | True   |         |
| Sample collection date/times are provided.                                               | True   |         |
| Appropriate sample containers are used.                                                  | True   |         |
| Sample bottles are completely filled.                                                    | True   |         |
| Sample Preservation Verified.                                                            | True   |         |
| There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs         | True   |         |
| Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4"). | True   |         |
| Multiphasic samples are not present.                                                     | True   |         |
| Samples do not require splitting or compositing.                                         | True   |         |
| Residual Chlorine Checked.                                                               | True   |         |

# ANALYTICAL REPORT

## PREPARED FOR

Attn: Mr. Antonio Cardoso  
Arcadis US Inc.  
4300 West Cypress Street  
Suite 450  
Tampa, Florida 33607

Generated 11/25/2025 2:20:26 PM

## JOB DESCRIPTION

Hercules Hattiesburg, MS

## JOB NUMBER

860-116043-1

# Eurofins Houston

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.

### Qualifiers

#### GC/MS VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *+        | LCS and/or LCSD is outside acceptance limits, high biased.                                                     |
| *1        | LCS/LCSD RPD exceeds control limits.                                                                           |
| F1        | MS and/or MSD recovery exceeds control limits.                                                                 |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U         | Indicates the analyte was analyzed for but not detected.                                                       |

#### GC/MS Semi VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *-        | LCS and/or LCSD is outside acceptance limits, low biased.                                                      |
| *+        | LCS and/or LCSD is outside acceptance limits, high biased.                                                     |
| *1        | LCS/LCSD RPD exceeds control limits.                                                                           |
| F1        | MS and/or MSD recovery exceeds control limits.                                                                 |
| F2        | MS/MSD RPD exceeds control limits                                                                              |
| I         | Value is EMPC (estimated maximum possible concentration).                                                      |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| S1-       | Surrogate recovery exceeds control limits, low biased.                                                         |
| S1+       | Surrogate recovery exceeds control limits, high biased.                                                        |
| U         | Indicates the analyte was analyzed for but not detected.                                                       |

### Glossary

| Abbreviation   | These commonly used abbreviations may or may not be present in this report.                                 |
|----------------|-------------------------------------------------------------------------------------------------------------|
| ☼              | Listed under the "D" column to designate that the result is reported on a dry weight basis                  |
| %R             | Percent Recovery                                                                                            |
| CFL            | Contains Free Liquid                                                                                        |
| CFU            | Colony Forming Unit                                                                                         |
| CNF            | Contains No Free Liquid                                                                                     |
| DER            | Duplicate Error Ratio (normalized absolute difference)                                                      |
| Dil Fac        | Dilution Factor                                                                                             |
| DL             | Detection Limit (DoD/DOE)                                                                                   |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC            | Decision Level Concentration (Radiochemistry)                                                               |
| EDL            | Estimated Detection Limit (Dioxin)                                                                          |
| LOD            | Limit of Detection (DoD/DOE)                                                                                |
| LOQ            | Limit of Quantitation (DoD/DOE)                                                                             |
| MCL            | EPA recommended "Maximum Contaminant Level"                                                                 |
| MDA            | Minimum Detectable Activity (Radiochemistry)                                                                |
| MDC            | Minimum Detectable Concentration (Radiochemistry)                                                           |
| MDL            | Method Detection Limit                                                                                      |
| ML             | Minimum Level (Dioxin)                                                                                      |
| MPN            | Most Probable Number                                                                                        |
| MQL            | Method Quantitation Limit                                                                                   |
| NC             | Not Calculated                                                                                              |
| ND             | Not Detected at the reporting limit (or MDL or EDL if shown)                                                |
| NEG            | Negative / Absent                                                                                           |
| POS            | Positive / Present                                                                                          |
| PQL            | Practical Quantitation Limit                                                                                |
| PRES           | Presumptive                                                                                                 |
| QC             | Quality Control                                                                                             |

## Job Narrative 860-116043-1

The analytical test results presented in this report meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page, unless otherwise noted. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable. Regulated compliance samples (e.g. SDWA, NPDES) must comply with associated agency requirements/permits.

- Matrix-specific batch QC (e.g., MS, MSD, SD) may not be reported when insufficient sample volume is available or when site-specific QC samples are not submitted. In such cases, a Laboratory Control Sample Duplicate (LCSD) may be analyzed to provide precision data for the batch.
- For samples analyzed using surrogate and/or isotope dilution analytes, any recoveries falling outside of established acceptance criteria are re-prepared and/or re-analyzed to confirm results, unless the deviation is due to sample dilution or otherwise explained in the case narrative.

### Receipt

The samples were received on 11/10/2025 9:20 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 3.1°C.

### GC/MS VOA

Method 8260D: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for analytical batch 860-275424 were outside control limits. Sample matrix interference is suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

Method 8260D: The continuing calibration verification (CCV) associated with batch 860-275424 recovered above the upper control limit for Ethyl methacrylate, Iodomethane, Naphthalene, Vinyl acetate, and trans-1,4-Dichloro-2-butene. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is: (CCVIS 860-275424/2).

Method 8260D: The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for analytical batch 860-275424 recovered outside control limits for the following analytes: Ethyl methacrylate. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

Method 8260D: The laboratory control sample duplicate (LCSD) for analytical batch 860-275424 recovered outside control several analytes. These analytes were biased high in the LCSD and were not detected in the associated samples; therefore, the data have been reported.

Method 8260D: The RPD of the laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for analytical batch 860-275424 recovered outside control limits for several analytes. These analytes were not detected in the associated samples; therefore, the data have been reported.

Method 8260D: The continuing calibration verification (CCV) associated with batch 860-275429 recovered above the upper control limit for 1,2-Dibromoethane (22%), 2-Butanone (30%), 2-Hexanone (43%), 3-Chloropropene-1-propene (30%), 4-Methyl-2-pentanone (39%), Acetone (38%), Acetonitrile (46%), Acrylonitrile (34%), Carbon disulfide (30%), Ethyl methacrylate (60%), iodomethane (29%), Isobutyl alcohol (30%), Methylene chloride (23%), Propionitrile (29%), Tetrahydrofuran (25%), trans-1,2-Dichloroethene (26%), trans-1,4-Dichloro-2-butene (25%). The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is: (CCVIS 860-275429/2).

Method 8260D: The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for analytical batch 860-275424 recovered outside control limits for the following analytes: Benzyl chloride. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

Method 8260D: The RPD of the laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for analytical batch 860-275424 recovered outside control limits for the following analytes: Benzyl chloride and Vinyl acetate.

Method 8260D: The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for analytical batch 860-275429 recovered outside control limits for the following analytes: Ethyl methacrylate. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

## Case Narrative

Client: Arcadis US Inc.  
Project: Hercules Hattiesburg, MS

Job ID: 860-116043-1

### Job ID: 860-116043-1 (Continued)

Eurofins Houston

Method 8260D: The laboratory control sample duplicate (LCSD) for analytical batch 860-275429 recovered outside control limits for the following analytes: Iodomethane. These analytes were biased high in the LCSD and were not detected in the associated samples; therefore, the data have been reported.

Method 8260D: The matrix spike (MS) recoveries for analytical batch 860-275429 were outside control limits. Sample matrix interference is suspected.

Method 8260D: The following samples were diluted to bring the concentration of target analytes within the calibration range: MW-26-S (860-116043-8), MW-26-D (860-116043-9), MW-28-S (860-116043-11) and MW-28-D (860-116043-12). Elevated reporting limits (RLs) are provided.

Method 8260D: The continuing calibration verification (CCV) associated with batch 860-275621 recovered above the upper control limit for 2-Butanone, Dichloro difluoromethane, Ethyl methacrylate, Iodomethane, Methacrylonitrile, Propionitrile, Vinyl acetate, Butadiene. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is: (CCVIS 860-275621/2).

Method 8260D: The laboratory control sample (LCS) for analytical batch 860-275621 recovered outside control limits for the following analytes: Ethyl methacrylate and Propionitrile. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

Method 8260D: The laboratory control sample duplicate (LCSD) for analytical batch 860-275621 recovered outside control limits for the following analytes: Ethyl methacrylate, Propionitrile, Methyl methacrylate, Tetrahydrofuran and 2-Butanone. These analytes were biased high in the LCSD and were not detected in the associated samples; therefore, the data have been reported.

Method 8260D: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for analytical batch 860-275621 were outside control limits. Sample matrix interference is suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

Method 8260D: The continuing calibration verification (CCV) associated with batch 860-275621 recovered outside acceptance criteria, low biased, for Acrolein (-47%). A reporting limit (RL) standard was analyzed, and the target analytes are detected. Since the associated samples were non-detect for the analyte(s), the data are reported.

Method 8260D: The matrix spike (MS) recoveries for analytical batch 860-275893 were outside control limits. Sample matrix interference is suspected.

Method 8260D: The following samples were diluted to bring the concentration of target analytes within the calibration range: MW-26-S (860-116043-8) and (860-116043-B-8 MS). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### GC/MS Semi VOA

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-275964 recovered above the upper control limit for Di-n-octyl phthalate, 1,3-Dinitrobenzene, Hexachloropropene and Pronamide. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are.

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for preparation batch 860-275601 and 860-275662 and analytical batch 860-275964 recovered outside control limits for the following analytes: Dimethoate, Ethyl Parathion, Dinoseb, Phorate, Sulfotepp, Methyl parathion, Methapyrilene, Disulfoton and Thionazin. These analytes were biased high in the LCS/LCSD and were not detected in the associated samples; therefore, the data have been reported.

Method 8270E\_QQQ: The laboratory control sample and the laboratory control sample duplicate (LCS/LCSD) for preparation batch 860-275662 and analytical batch 860-275964 recovered outside control limits for the following analyte(s): Benzyl alcohol, Pyridine, 2-Picoline, 3,3'-Dimethylbenzidine and p-Phenylene diamine. Benzyl alcohol, Pyridine, 2-Picoline, 3,3'-Dimethylbenzidine and p-Phenylene diamine have been identified as a poor performing analyte when analyzed using this method; therefore, re-extraction/re-analysis was not performed. Batch precision also exceeded control limits for these analyte(s). These results have been reported and qualified.

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276089 recovered above the upper control limit for Bis(2-ethylhexyl) phthalate and Di-n-octyl phthalate. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are.

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276089 recovered above the upper control limit for multiple Analytes. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-276089/3).

Method 8270E\_QQQ: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 860-275601 and analytical batch 860-276089 were outside control limits for one or more analytes. See QC Sample Results for detail. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery is within acceptance limits.

Method 8270E\_QQQ: Six surrogates are used for this analysis. The laboratory's SOP allows one base and one acid of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following sample contained an allowable number of surrogate compounds outside limits: (860-116038-D-11-B MS). These results have been reported and qualified.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-275964 recovered above the upper control limit for Dimethoate, Ethyl Parathion, Dinoseb, Phorate, Sulfotepp, Methyl parathion, Disulfoton and Thionazin. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-275964/3).

Method 8270E\_QQQ: The laboratory is using 70 - 130% as interim acceptance criteria for recoveries of spiked analytes for Safole, Total, until in-house LCS limits are developed. Data is flagged and reported.

(LCS 860-275601/2-A), (LCS 860-275662/2-A) and (LCSD 860-275662/3-A)

Method 8270E\_QQQ: Six surrogates are used for this analysis. The laboratory's SOP allows one acid and one base of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following samples contained an allowable number of surrogate compounds outside limits: (860-116304-G-5-A MS) and (860-116304-G-5-B MSD). These results have been reported and qualified.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276083 recovered above the upper control limit for Dimethoate, Disulfoton, Ethyl Parathion, Famphur, Methyl parathion, Phorate, Sulfotepp and Thionazin. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-276083/3).

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The matrix spike / matrix spike duplicate (MS/MSD) recoveries and precision for preparation batch 860-275662 and analytical batch 860-276083 were outside control limits. Sample matrix interference and non-homogeneity are suspected because the associated laboratory control sample / laboratory sample control duplicate (LCS/LCSD) precision was within acceptance limits.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276083 recovered above the upper control limit for Butyl benzyl phthalate. The samples associated with this CCV were non-detects for the affected analytes;

Eurofins Houston

therefore, the data have been reported. The associated sample is:(CCVIS 860-276083/2).

Method 8270E\_QQQ: The laboratory control sample and the laboratory control sample duplicate (LCS/LCSD) for preparation batch 860-275662 and analytical batch 860-276290 recovered outside control limits for the following analyte: alpha,alpha-Dimethyl phenethylamine. alpha,alpha-Dimethyl phenethylamine has been identified as a poor performing analyte when analyzed using this method; therefore, re-extraction/re-analysis was not performed. These results have been reported and qualified.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276290 recovered above the upper control limit for multiple Analytes. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-276290/2).

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276290 recovered above the upper control limit for multiple Analytes. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-276290/2).

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-275931 recovered above the upper control limit for 2-Acetylaminofluorene, Aramite Peak 1, Butyl benzyl phthalate and Di-n-octyl phthalate. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-275931/2).

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-275931 recovered above the upper control limit for Dimethoate, Dinoseb, Disulfoton, Ethyl Parathion, Famphur, Methyl parathion, Phorate, Sulfotepp and Thionazin. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-275931/3).

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276472 recovered above the upper control limit for 2-Fluorophenol. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-276472/2).

Method 8270E\_QQQ: The matrix spike / matrix spike duplicate (MS/MSD) recoveries and precision for preparation batch 860-275662 and analytical batch 860-276472 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample / laboratory sample control duplicate (LCS/LCSD) precision was within acceptance limits.

Method 8270E\_QQQ: The following sample was diluted to bring the concentration of target analytes within the calibration range: MW-26-D (860-116043-9). Elevated reporting limits (RLs) are provided.

Method 8270E\_QQQ: The laboratory is using default limits of 70-130% as interim acceptance criteria for the recovery of spiked analytes for Safrole, Total until in house limits are developed. The data is flagged and reported.

(LCS 860-275601/2-A) and (LCSD 860-275601/3-A)

Method 8270E\_QQQ: Six surrogates are used for this analysis. The laboratory's SOP allows one acid and one base of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following samples contained an allowable number of surrogate compounds outside limits: (860-116038-D-11-B MS) and (860-116038-D-11-C MSD). These results have been reported and qualified.

Method 8270E\_QQQ: The following sample required a dilution due to the nature of the sample matrix: MW-28-S (860-116043-11). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

Method 8270E\_QQQ: The following samples required a dilution due to the nature of the sample matrix: MW-26-D (860-116043-9) and MW-28-D (860-116043-12). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116043-1

Client Sample ID: MW-25

Lab Sample ID: 860-116043-2

Date Collected: 11/06/25 08:59

Matrix: Water

Date Received: 11/10/25 09:20

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116043-1

Client Sample ID: MW-31-S

Lab Sample ID: 860-116043-4

Date Collected: 11/06/25 10:56

Matrix: Water

Date Received: 11/10/25 09:20

## Method: SW846 8260D - Volatile Organic Compounds by GC/MS (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116043-1

Client Sample ID: MW-31-D

Lab Sample ID: 860-116043-5

Date Collected: 11/06/25 11:31

Matrix: Water

Date Received: 11/10/25 09:20

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116043-1

Client Sample ID: MW-27-S

Lab Sample ID: 860-116043-7

Date Collected: 11/06/25 14:41

Matrix: Water

Date Received: 11/10/25 09:20

## Method: SW846 8260D - Volatile Organic Compounds by GC/MS (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116043-1

Client Sample ID: MW-26-S

Lab Sample ID: 860-116043-8

Date Collected: 11/07/25 08:09

Matrix: Water

Date Received: 11/10/25 09:20

## Method: SW846 8260D - Volatile Organic Compounds by GC/MS

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116043-1

Client Sample ID: MW-26-S

Lab Sample ID: 860-116043-8

Date Collected: 11/07/25 08:09

Matrix: Water

Date Received: 11/10/25 09:20

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116043-1

Client Sample ID: MW-26-D

Lab Sample ID: 860-116043-9

Date Collected: 11/07/25 08:59

Matrix: Water

Date Received: 11/10/25 09:20

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116043-1

Client Sample ID: MW-28-S

Lab Sample ID: 860-116043-11

Date Collected: 11/07/25 10:05

Matrix: Water

Date Received: 11/10/25 09:20

## Method: SW846 8260D - Volatile Organic Compounds by GC/MS (Continued)

# Client Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116043-1

Client Sample ID: MW-28-D

Lab Sample ID: 860-116043-12

Date Collected: 11/07/25 10:44

Matrix: Water

Date Received: 11/10/25 09:20

## Method: SW846 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

### Surrogate Legend

DCA = 1,2-Dichloroethane-d4 (Surr)  
BFB = 4-Bromofluorobenzene (Surr)  
DBFM = Dibromofluoromethane (Surr)  
TOL = Toluene-d8 (Surr)

## Method: 8270E - Semivolatile Organic Compounds (GC-MS/MS)

Matrix: Water

Prep Type: Total/NA

Eurofins Houston

# Surrogate Summary

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116043-1

**Surrogate Legend**

TBP = 2,4,6-Tribromophenol (Surr)  
FBP = 2-Fluorobiphenyl  
2FP = 2-Fluorophenol (Surr)  
NBZ = Nitrobenzene-d5 (Surr)  
PHL = Phenol-d5 (Surr)  
TPHd14 = p-Terphenyl-d14

**Method: 8270E - Semivolatile Organic Compounds (GC-MS/MS)**

Matrix: Water

Prep Type: Total/NA

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116043-1

## Method: 8260D - Volatile Organic Compounds by GC/MS (Continued)

Lab Sample ID: 860-116043-7 MS

Matrix: Water

Analysis Batch: 275424

Client Sample ID: MW-27-S

Prep Type: Total/NA

Eurofins Houston

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116043-1

## Method: 8260D - Volatile Organic Compounds by GC/MS (Continued)

Lab Sample ID: LCSD 860-275429/4

Matrix: Water

Analysis Batch: 275429

Client Sample ID: Lab Control Sample Dup

Prep Type: Total/NA

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116043-1

## Method: 8260D - Volatile Organic Compounds by GC/MS - DL (Continued)

Lab Sample ID: 860-116043-8 MS

Matrix: Water

Analysis Batch: 275893

Client Sample ID: MW-26-S

Prep Type: Total/NA

Eurofins Houston

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116043-1

## Method: 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

Lab Sample ID: MB 860-275601/1-A

Matrix: Water

Analysis Batch: 275964

Client Sample ID: Method Blank

Prep Type: Total/NA

Prep Batch: 275601

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116043-1

## Method: 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

Lab Sample ID: MB 860-275601/1-A

Matrix: Water

Analysis Batch: 276290

Client Sample ID: Method Blank

Prep Type: Total/NA

Prep Batch: 275601

Eurofins Houston

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116043-1

## Method: 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

Lab Sample ID: 860-116038-D-11-C MSD

Matrix: Water

Analysis Batch: 276089

Client Sample ID: Matrix Spike Duplicate

Prep Type: Total/NA

Prep Batch: 275601

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116043-1

## Method: 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

Lab Sample ID: MB 860-275662/1-A

Matrix: Water

Analysis Batch: 275964

Client Sample ID: Method Blank

Prep Type: Total/NA

Prep Batch: 275662

Eurofins Houston

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116043-1

## Method: 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

Lab Sample ID: 860-116304-G-5-A MS

Matrix: Water

Analysis Batch: 276083

Client Sample ID: Matrix Spike

Prep Type: Total/NA

Prep Batch: 275662

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116043-1

## Method: 8270E - Semivolatile Organic Compounds (GC-MS/MS) (Continued)

Lab Sample ID: 860-116304-G-5-A MS

Matrix: Water

Analysis Batch: 276083

Client Sample ID: Matrix Spike

Prep Type: Total/NA

Prep Batch: 275662

Eurofins Houston

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116043-1

## Method: 8270E - Semivolatile Organic Compounds (GC-MS/MS) - RA (Continued)

Lab Sample ID: 860-116304-G-5-A MS

Client Sample ID: Matrix Spike

Matrix: Water

Prep Type: Total/NA

Analysis Batch: 276472

Prep Batch: 275662

| Analyte                                 | Sample Result | Sample Qualifier | Spike Added | MS Result | MS Qualifier | Unit | D | %Rec | %Rec Limits |

Eurofins Houston

# QC Sample Results

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116043-1

## Method: 8270E - Semivolatile Organic Compounds (GC-MS/MS) - RA (Continued)

Lab Sample ID: 860-116304-G-5-B MSD

Matrix: Water

Analysis Batch: 276472

Client Sample ID: Matrix Spike Duplicate

Prep Type: Total/NA

Prep Batch: 275662

## Method Summary

Client: Arcadis US Inc.  
Project/Site: Hercules Hattiesburg, MS

Job ID: 860-116043-1

| Method | Method Description                        | Protocol | Laboratory |
|--------|-------------------------------------------|----------|------------|
| 8260D  | Volatile Organic Compounds by GC/MS       | SW846    | EET HOU    |
| 8270E  | Semivolatile Organic Compounds (GC-MS/MS) | SW846    | EET HOU    |
| 3511   | Microextraction of Organic Compounds      | SW846    | EET HOU    |
| 5030C  | Purge and Trap                            | SW846    | EET HOU    |

| Question                                                                                 | Answer | Comment |
|------------------------------------------------------------------------------------------|--------|---------|
| Radioactivity wasn't checked or is $\leq$ background as measured by a survey meter.      | True   |         |
| The cooler's custody seal, if present, is intact.                                        | N/A    |         |
| Sample custody seals, if present, are intact.                                            | True   |         |
| The cooler or samples do not appear to have been compromised or tampered with.           | True   |         |
| Samples were received on ice.                                                            | True   |         |
| Cooler Temperature is acceptable.                                                        | True   |         |
| Cooler Temperature is recorded.                                                          | True   |         |
| COC is present.                                                                          | True   |         |
| COC is filled out in ink and legible.                                                    | True   |         |
| COC is filled out with all pertinent information.                                        | True   |         |
| Is the Field Sampler's name present on COC?                                              | True   |         |
| There are no discrepancies between the containers received and the COC.                  | True   |         |
| Samples are received within Holding Time (excluding tests with immediate HTs)            | True   |         |
| Sample containers have legible labels.                                                   | True   |         |
| Containers are not broken or leaking.                                                    | True   |         |
| Sample collection date/times are provided.                                               | True   |         |
| Appropriate sample containers are used.                                                  | True   |         |
| Sample bottles are completely filled.                                                    | True   |         |
| Sample Preservation Verified.                                                            | True   |         |
| There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs         | True   |         |
| Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4"). | True   |         |
| Multiphasic samples are not present.                                                     | True   |         |
| Samples do not require splitting or compositing.                                         | True   |         |
| Residual Chlorine Checked.                                                               | True   |         |

# ANALYTICAL REPORT

## PREPARED FOR

Attn: Mr. Antonio Cardoso  
Arcadis US Inc.  
4300 West Cypress Street  
Suite 450  
Tampa, Florida 33607

## JOB DESCRIPTION

Hercules Hattiesburg, MS

## JOB NUMBER

860-116246-1

# Eurofins Houston

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

Analytical test results meet all requirements of the associated regulatory program (i.e., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis.

### Qualifiers

#### GC/MS VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *-        | LCS and/or LCSD is outside acceptance limits, low biased.                                                      |
| *+        | LCS and/or LCSD is outside acceptance limits, high biased.                                                     |
| *1        | LCS/LCSD RPD exceeds control limits.                                                                           |
| F1        | MS and/or MSD recovery exceeds control limits.                                                                 |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| U         | Indicates the analyte was analyzed for but not detected.                                                       |

#### GC/MS Semi VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *-        | LCS and/or LCSD is outside acceptance limits, low biased.                                                      |
| *+        | LCS and/or LCSD is outside acceptance limits, high biased.                                                     |
| *1        | LCS/LCSD RPD exceeds control limits.                                                                           |
| F1        | MS and/or MSD recovery exceeds control limits.                                                                 |
| F2        | MS/MSD RPD exceeds control limits                                                                              |
| I         | Value is EMPC (estimated maximum possible concentration).                                                      |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| S1+       | Surrogate recovery exceeds control limits, high biased.                                                        |
| U         | Indicates the analyte was analyzed for but not detected.                                                       |

### Glossary

| Abbreviation   | These commonly used abbreviations may or may not be present in this report.                                 |
|----------------|-------------------------------------------------------------------------------------------------------------|
| ☼              | Listed under the "D" column to designate that the result is reported on a dry weight basis                  |
| %R             | Percent Recovery                                                                                            |
| CFL            | Contains Free Liquid                                                                                        |
| CFU            | Colony Forming Unit                                                                                         |
| CNF            | Contains No Free Liquid                                                                                     |
| DER            | Duplicate Error Ratio (normalized absolute difference)                                                      |
| Dil Fac        | Dilution Factor                                                                                             |
| DL             | Detection Limit (DoD/DOE)                                                                                   |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC            | Decision Level Concentration (Radiochemistry)                                                               |
| EDL            | Estimated Detection Limit (Dioxin)                                                                          |
| LOD            | Limit of Detection (DoD/DOE)                                                                                |
| LOQ            | Limit of Quantitation (DoD/DOE)                                                                             |
| MCL            | EPA recommended "Maximum Contaminant Level"                                                                 |
| MDA            | Minimum Detectable Activity (Radiochemistry)                                                                |
| MDC            | Minimum Detectable Concentration (Radiochemistry)                                                           |
| MDL            | Method Detection Limit                                                                                      |
| ML             | Minimum Level (Dioxin)                                                                                      |
| MPN            | Most Probable Number                                                                                        |
| MQL            | Method Quantitation Limit                                                                                   |
| NC             | Not Calculated                                                                                              |
| ND             | Not Detected at the reporting limit (or MDL or EDL if shown)                                                |
| NEG            | Negative / Absent                                                                                           |
| POS            | Positive / Present                                                                                          |
| PQL            | Practical Quantitation Limit                                                                                |
| PRES           | Presumptive                                                                                                 |
| QC             | Quality Control                                                                                             |
| RER            | Relative Error Ratio (Radiochemistry)                                                                       |
| RL             | Reporting Limit or Requested Limit (Radiochemistry)                                                         |
| RPD            | Relative Percent Difference, a measure of the relative difference between two points                        |
| TEF            | Toxicity Equivalent Factor (Dioxin)                                                                         |
| TEQ            | Toxicity Equivalent Quotient (Dioxin)                                                                       |

**Job ID: 860-116246-1**

**Eurofins Houston**

## Job Narrative 860-116246-1

The analytical test results presented in this report meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page, unless otherwise noted. Data qualifiers and/or narrative comments are included to explain any exceptions, if applicable. Regulated compliance samples (e.g. SDWA, NPDES) must comply with associated agency requirements/permits.

- Matrix-specific batch QC (e.g., MS, MSD, SD) may not be reported when insufficient sample volume is available or when site-specific QC samples are not submitted. In such cases, a Laboratory Control Sample Duplicate (LCSD) may be analyzed to provide precision data for the batch.
- For samples analyzed using surrogate and/or isotope dilution analytes, any recoveries falling outside of established acceptance criteria are re-prepared and/or re-analyzed to confirm results, unless the deviation is due to sample dilution or otherwise explained in the case narrative.

### Receipt

The samples were received on 11/12/2025 9:00 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 2.4°C.

### GC/MS VOA

Method 8260D: The continuing calibration verification (CCV) associated with batch 860-276045 recovered outside acceptance criteria, low biased, for 1,2,4-Trichlorobenzene (-27.0%), Benzyl chloride(-37.0%), Naphthalene(-31.0%), 1,2-Dibromo-3-Chloropropane(-25.0%) and Hexachlorobutadiene(-24.0%) A reporting limit (RL) standard was analyzed, and the target analytes are detected. Since the associated samples were non-detect for the analyte(s), the data are reported.

Method 8260D: The continuing calibration verification (CCV) associated with batch 860-276045 recovered above the upper control limit for Acetone. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is: (CCVIS 860-276045/2).

Method 8260D: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for analytical batch 860-276045 were outside control limits for one or more analytes. See QC Sample Results for detail. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery is within acceptance limits.

Method 8260D: The matrix spike (MS) recoveries for analytical batch 860-276330 were outside control limits. Sample matrix interference is suspected.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

### GC/MS Semi VOA

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-275964 recovered above the upper control limit for Di-n-octyl phthalate, 1,3-Dinitrobenzene, Hexachloropropene and Pronamide. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are.

Method 8270E\_QQQ: The laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for preparation batch 860-275662 and 860-275664 and analytical batch 860-275964 recovered outside control limits for the following analytes: Dimethoate, Ethyl Parathion, Dinoseb, Phorate, Sulfotepp, Methyl parathion, Methapyrilene, Disulfoton and Thionazin. These analytes were biased high in the LCS/LCSD and were not detected in the associated samples; therefore, the data have been reported.

Method 8270E\_QQQ: The laboratory control sample and the laboratory control sample duplicate (LCS/LCSD) for preparation batch 860-275662 and analytical batch 860-275964 recovered outside control limits for the following analyte(s): Benzyl alcohol, Pyridine, 2-Picoline, 3,3'-Dimethylbenzidine and p-Phenylene diamine. Benzyl alcohol, Pyridine, 2-Picoline, 3,3'-Dimethylbenzidine and p-Phenylene diamine have been identified as a poor performing analyte when analyzed using this method; therefore, re-extraction/re-analysis was not performed. Batch precision also exceeded control limits for these analyte(s). These results have been reported and qualified.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-275964 recovered above the upper control limit for Dimethoate, Ethyl Parathion, Dinoseb, Phorate, Sulfotepp, Methyl parathion, Disulfoton and Thionazin. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The

associated sample is:(CCV 860-275964/3).

Method 8270E\_QQQ: The laboratory is using 70 - 130% as interim acceptance criteria for recoveries of spiked analytes for Safrole, Total, until in-house LCS limits are developed. Data is flagged and reported.

(LCS 860-275662/2-A) and (LCSD 860-275662/3-A)

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-275604 recovered above the upper control limit for 1,3-Dinitrobenzene, 2-Acetylaminofluorene, Aramite Peak 1, Di-n-octyl phthalate and Hexachloropropene. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-275604/2).

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-275604 recovered above the upper control limit for Dimethoate, Dinoseb, Disulfoton, Ethyl Parathion, Methyl parathion, Phorate, Sulfotepp and Thionazin. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-275604/3).

Method 8270E\_QQQ: The laboratory control sample and/or the laboratory control sample duplicate (LCS/LCSD) for preparation batch 860-275664 and analytical batch 860-275604 recovered outside control limits for the following analytes: 3-Methylcholanthrene and Pronamide. These analytes have been identified as poor performing analytes when analyzed using this method; therefore, re-extraction/re-analysis was not performed. These results have been reported and qualified.

Method 8270E\_QQQ: The laboratory is using 70 - 130% as interim acceptance criteria for recoveries of spiked analytes for Safrole, Total, until in-house LCS limits are developed. Data is flagged and reported.

Method 8270E\_QQQ: Six surrogates are used for this analysis. The laboratory's SOP allows one acid and one base of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following samples contained an allowable number of surrogate compounds outside limits: (860-116304-G-5-A MS) and (860-116304-G-5-B MSD). These results have been reported and qualified.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276083 recovered above the upper control limit for Dimethoate, Disulfoton, Ethyl Parathion, Famphur, Methyl parathion, Phorate, Sulfotepp and Thionazin. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCV 860-276083/3).

Method 8270E\_QQQ: The large number of analytes included in the continuing calibration verification (CCV) gives a high probability that one or more analytes will be outside acceptance criteria. As indicated in the reference method, analysis may proceed as long as no more than 20% of the analytes of interest are outside the method-defined %D criteria.

Method 8270E\_QQQ: The matrix spike / matrix spike duplicate (MS/MSD) recoveries and precision for preparation batch 860-275662 and analytical batch 860-276083 were outside control limits. Sample matrix interference and non-homogeneity are suspected because the associated laboratory control sample / laboratory sample control duplicate (LCS/LCSD) precision was within acceptance limits.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276083 recovered above the upper control limit for Butyl benzyl phthalate. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-276083/2).

Method 8270E\_QQQ: The laboratory control sample and the laboratory control sample duplicate (LCS/LCSD) for preparation batch 860-275662 and analytical batch 860-276290 recovered outside control limits for the following analyte: alpha,alpha-Dimethyl phenethylamine. alpha,alpha-Dimethyl phenethylamine has been identified as a poor performing analyte when analyzed using this method; therefore, re-extraction/re-analysis was not performed. These results have been reported and qualified.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276472 recovered above the upper control limit for 2-Fluorophenol. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-276472/2).

Method 8270E\_QQQ: The matrix spike / matrix spike duplicate (MS/MSD) recoveries and precision for preparation batch

860-275662 and analytical batch 860-276472 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample / laboratory sample control duplicate (LCS/LCSD) precision was within acceptance limits.

Method 8270E\_QQQ: The continuing calibration verification (CCV) associated with batch 860-276619 recovered above the upper control limit for 2-Fluorophenol (Surr). The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated sample is:(CCVIS 860-276619/2).

Method 8270E\_QQQ: The following sample was diluted to bring the concentration of target analytes within the calibration range: MW-05 (860-116246-7). Elevated reporting limits (RLs) are provided.

Method 8270E\_QQQ: The following sample required a dilution due to the nature of the sample matrix: MW-05 (860-116246-7). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.
