

**MINUTES OF THE MISSISSIPPI ENVIRONMENTAL QUALITY PERMIT BOARD
HELD IN JACKSON, MISSISSIPPI, ON TUESDAY, MARCH 10, 2026**

The Mississippi Environmental Quality Permit Board held a meeting in the Commission Hearing Room of the Department of Environmental Quality, located at 515 East Amite Street, in Jackson, Mississippi, March 10, 2026. Brian Perry, Acting Chair, called the meeting to order at 9:00 a.m. with the following members and designated representatives present:

Brian Perry for Andy Gipson, Acting Chair
John Banks for Kay Whittington
David Dockery
Les Herrington
Jennifer Wittmann
Ryan Jones for Lynn Posey

Absent: David Snodgrass for Jess New

Anderson Thomas, Senior Attorney for MDEQ, was present as legal counsel. Acting Chair Brian Perry called the meeting to order. On motion by Jennifer Wittmann and second by Les Herrington, the Permit Board voted to adopt and approve the minutes for the regular Permit Board meeting held on February 10, 2026.

REPORT OF STAFF PERMIT ACTIONS/CERTIFICATIONS

Staff reported to the Permit Board that staff had acted on various permits since February 10, 2026, Permit Board Meeting pursuant to the regulations delegating this authority to the Executive Director of the Mississippi Department of Environmental Quality and the Executive Director's delegation of this authority to the staff in accordance with those regulations. The Permit Board voted to note and record in its minutes the reports of permit actions and certifications by staff since February 10, 2026, Permit Board Meeting. [John Banks abstained from voting on all Office of Land and Water Resources permitting matters. David Dockery abstained from voting on all Office of Geology permitting matters].

OLWR REPORT

THE PERMIT BOARD CONSIDERED THE FOLLOWING

OFFICE OF GEOLOGY MATTERS:

Mining and Reclamation Division

Surface Mining Permit Bond Releases

After presentation by Guillermo Gibson with the Mining and Reclamation Division, Office of Geology, MDEQ, receiving no public comment from the audience and on motion by Les Herrington and second by Jennifer Wittman, the Permit Board voted to approve the following surface mining permit transfers (David Dockery Abstained):

Hammet Gravel Company	P02-030AAA	Yazoo County	Final 30%
Oil – Dri Production Company	P99-059AA	Tippah County	Final 22%
W.H. Roark Farms, LLC	P98-052TAT	Benton County	Final 90%

OFFICE OF LEGAL

Proposed Findings of Fact and Conclusions of Law – Amite BioEnergy, LLC. Denial of Amite BioEnergy’s proposed modified air permit to construct number 0080-00031 and initial Title V Air Operating Permit No. 0800-00050, Gloster, Amite County, MS

Laura Gibbes, Senior Attorney, presented this matter to the Board. The two permits at issue – a Third Modified Permit to Construct Air Emissions Equipment and the initial Title V Air Permit – were first presented to this Board on April 8, 2025. Following extensive public discussion of the permits and two Executive Sessions to allow deliberations among the Board, the Permit Board voted to deny the proposed air permitting actions on the basis of Amite BioEnergy’s past noncompliance with emission requirements of its permits and its failure, as of the date of the April 8 meeting, to complete all corrective actions required by previous Agreed Orders with MDEQ. The Permit Board further indicated at that time that it would reconsider its stance on Amite BioEnergy’s permit requests in the future, after Amite BioEnergy provided support for an improved compliance history and after the remaining item to be performed under the Agreed Orders – a dust screen – had been completely installed.

The Permit Board held an evidentiary hearing over two days on October 14 and 15, 2025. The parties to the hearing were MDEQ, Amite BioEnergy, and Greater Greener Gloster, a group of Gloster citizens who opposed the permits and were allowed to intervene as a party. All parties were represented by counsel, and all parties presented both documents and witness testimony as evidence.

After considering all documents, witness testimony, and arguments of counsel, the Permit Board reversed its prior decision and voted to issue the permits to Amite BioEnergy. First, evidence was presented that, since the April 8, 2025, meeting, Amite BioEnergy had completed installation of the dust suppression screen and had now fulfilled all corrective actions required of it under previous Agreed Orders issued by MDEQ. In addition, Amite BioEnergy presented evidence that it had been in compliance with VOC permit limits since April 2022 and in compliance with HAP permit limits since December 2024. This evidence was un rebutted.

In addition, although these issues had not formed the basis for its original decision, the Permit Board also heard evidence regarding health and environmental effects, destruction removal efficiency (DRE), alleged defects in emission analysis, and alleged defects in MDEQ’s industry knowledge related to wood pellet facilities. On all of those issues, Greater Greener Gloster failed to meet the necessary evidentiary standard, i.e. “sufficient evidence”, to establish that the permits should be denied for any of these reasons.

Accordingly, having reconsidered the permits based on the fuller record presented at the evidentiary hearing, the Permit Board found that there was substantial evidence to support its conclusion that the permits should be issued. Past instances of permit noncompliance and completion of all terms of the Agreed Orders no longer stood as sufficient bases to deny the permits, and opposing parties had failed to present sufficient evidence that the permits should be denied on any other basis. Because the permits fully complied with all applicable requirements of state and federal law, the Permit Board held that the permits should be issued.

Jennifer Wittmann had a question for Mrs. Gibbes about an incorrect date on page 44 and Mrs. Gibbes stated that the correction had been made. There were no questions from the audience. Jennifer Wittmann moved to approve, and John Banks seconded. The Permit Board approved the Findings of Fact and Conclusions of Law.

OFFICE OF POLLUTION CONTROL

Air Division

Chevron USA, Chevron Products Company – Pascagoula Refinery

Jeffrey Bland, Air Permitting Coordinator of the Air Division at MDEQ, presented the proposed issuance of a Prevention of Significant Deterioration Permit to Construct Air Emissions Equipment, or “PSD Permit,” Permit Number 1280-00058, to modify existing emissions units at Chevron USA Inc., Chevron Products Company’s Pascagoula Refinery. The Pascagoula Refinery is located at 250 Industrial Road in the John C. Stennis – Bayou Casotte Industrial Park, east of Pascagoula, Mississippi.

The Pascagoula Refinery currently operates 20 major refining process units, approximately 200 storage vessels, and four marine terminals on approximately 1,000 of 3,000 acres owned by Chevron. The Pascagoula Refinery can currently process 361,000 barrels per operating day of crude oil, which yields about 5.5 million gallons of motor gasoline per day, along with jet and diesel fuel, aviation gasoline, liquefied petroleum gas, petroleum coke, ammonia, sulfur, and benzene.

The proposed PSD Permit addresses an increase to daily crude throughput from 361,000 barrels per operating day to 394,000 barrels per operating day through upgrades and improvements to equipment, such as heat exchangers, pumps, and piping, which will debottleneck operations. These improvements will also allow the Pascagoula Refinery to process lighter crude slates. With the exception of new piping, the proposed changes do not involve construction of new emission units or the modification of existing emission units. However, a number of units may experience increased utilization due to the increased crude processing capacity. Because increased crude throughput can impact numerous downstream processes, the project is referred to as the “Pascagoula Aggregates PSD Project.”

The Project is considered a major modification under the PSD regulations due to potential increases of particulate matter, particulate matter with a diameter of 10 microns and less (referred to as PM-10), particulate matter with a diameter of 2.5 microns and less (referred to as PM-2.5), nitrogen oxides, volatile organic compounds, and greenhouse gases. Therefore, Chevron evaluated the best available control technologies for the modified emission source, the new piping, and evaluated the impacts of emissions on air quality through modeling and other EPA-prescribed techniques. Review of the application, particularly the air quality analysis, was conducted in close coordination with EPA Region 4.

The draft permit and supporting documents were available for public review and comment from December 17, 2025, through January 22, 2026, with a public hearing held in Pascagoula on January 22. All comments received during the comment period and hearing were thoroughly reviewed by MDEQ staff. MDEQ staff prepared a “Response to Comments” to address each comment. The comments received did not result in any changes to the proposed PSD Permit. The Permit Board received a copy of MDEQ’s Response to Comments document, including both the written comments and the hearing transcript, as well as copies of the proposed PSD Permit and the Preliminary Determination.

Individuals who submitted oral comments of concern during the public hearing or written comments during the public notice period were notified of the Permit Board meeting. There were representatives from Chevron, as well as visitors from Pascagoula in the audience. Staff believe the PSD Permit for the “Pascagoula Aggregates PSD Project” proposed for Chevron USA Inc., Chevron Products Company’s Pascagoula Refinery has been developed with the proper constraints, limits and requirements such that the facility can operate within all state and federal environmental laws and regulations.

Laura Godshall of EarthJustice was there representing Cherokee Concerned Citizens. This group was formed in 2019 to protect the community. Ms. Godshall noted that there was an incorrect address on the website for the public hearing. She stated it violated certain rules and Mississippi

case law. Ms. Godshall stated it was her belief that MDEQ is rushing the process and made note the facility has had an expired Title V permit since 2019.

Barbara Weckesser, community member, spoke and stated that she lives very close to the Chevron facility. She requested that the Permit Board not approve the modified permit because the Title V permit has not been renewed since 2014. Ms. Weckesser stated that increasing emissions would further hurt her community.

Jennifer Wittmann questioned Mr. Bland about the address in the package for the public hearing. Mr. Bland confirmed that the packet that went to the public contained the correct address and the only incorrect address was on the enSearch online website. Les Herrington moved to approve, and Jennifer Wittmann seconded. All members voted to approve the permit.

OFFICE OF POLLUTION CONTROL

Air Division

**MZX Tech, LLC – Air Permit No. 0680-00119,
which will be located at 2875 Stanton Road; Southaven, MS 38671**

Jaricus Whitlock, Chief of the Air Division, presented this matter before the Permit Board. Permit Board members received the “Response to Comments” packet containing the following materials: MDEQ’s response to all comments pertaining to this permitting action; all comments that were received during the overall public notice period; the certified transcript of the public hearing held Feb. 17, 2026; the updated draft PSD Permit to Construct and the supporting “Statement of Basis” document. There were community members as well as representatives of MZX Tech in attendance. The draft permit has been of significant interest to the public.

On August 22, 2025, MDEQ received an application from MZX Tech requesting a PSD Permit to Construct for the installation and operation of forty-one (41) natural gas-fired, simple cycle stationary combustion turbines and supporting equipment for continuous “behind-the-meter” power generation to a capacity of 1.2 gigawatts. As a point of clarity, “behind-the-meter” means any power generated by the proposed facility will not be exported to the electrical grid.

Mr. Whitlock noted that the twenty-seven (27) portable combustion turbines being used on site are “mobile sources” which are exempt by MDEQ’s existing air regulations. These regulations exempt the owner/operator of a “mobile source” from needing to obtain a Permit to Construct or a Permit to Operate. This was clarified in a letter dated July 29, 2025. These turbines are not part of the proposed project under consideration.

With the projected operation of forty-one (41) permanent turbines, the overall project is subject to PSD permitting because the potential emission of several air pollutants exceeds the applicable thresholds established by the Federal PSD rule.

As a PSD major source, MZX Tech is required to complete a Best Available Control Technology (or “BACT” for short) analysis and an ambient air quality analysis for each regulated air pollutant in which emissions exceed the established PSD threshold. The specific pollutants that are subject to the referenced analyses are particulate matter less than 10 microns in diameter (or “PM₁₀”), particulate matter less than 2.5 microns in diameter (or “PM_{2.5}”), nitrogen oxides, volatile organic compounds, sulfur dioxide, and carbon monoxide.

The BACT analysis is required to ensure that MZX Tech incorporates the best practical air pollution control devices, techniques, and/or emission limitations to minimize the emission of each applicable pollutant to the best extent practicable.

Upon completing this analysis and submitting it to MDEQ for review, MDEQ proposes the following as BACT for each stationary combustion turbine:

- *For PM₁₀ and PM_{2.5}* – the application of “good combustion practices” and the sole usage of pipeline-grade natural gas;
- *For nitrogen oxides* – the usage of a selective catalytic reduction control device and a limitation on air emissions to no more than 2 parts per million;
- *For carbon monoxide* – the usage of an oxidation catalyst control device and a limitation on air emissions to no more than 4 parts per million;
- *For sulfur dioxide* – the sole usage of pipeline-grade natural gas; and
- *For volatile organic compounds* – the application of “good combustion practices” and a limitation on air emissions to no more than 2.5 parts per million.

The ambient air quality analysis is also required to demonstrate that the allowable emission increases from MZX Tech will not cause or contribute to air pollution that ultimately violates either an EPA-established National Ambient Air Quality Standard or any applicable maximum allowable increase over the baseline concentration for the area. Such a complex demonstration,

which accounts for existing air quality and average meteorological conditions, is accomplished through dispersion modeling. With consideration to “existing air quality”, it must be noted that (at present) the existing ambient air quality for Desoto County, Mississippi – which is part of the Memphis metropolitan statistical area – is considered “in-attainment” with all national standards by EPA.

For this proposed project, the following pollutants were evaluated in the ambient air quality analysis: PM₁₀, PM_{2.5}, nitrogen dioxide, sulfur dioxide, and ground level ozone (for which volatile organic compounds and nitrogen oxides are precursors).

MDEQ is conscious of the concerns regarding the contributions that emissions from MZX Tech will potentially have on existing air quality, and because of this the analysis was thoroughly scrutinized by both MDEQ air modeling staff and EPA Region 4. As such, in tandem with established emission limitations and operational restrictions, the proposed facility’s impacts from their modeled emissions and the estimates of precursor secondary formation were found to be compliant with the applicable National Ambient Air Quality Standards, PSD increments, and significant impact levels.

Upon completing the draft PSD Permit to Construct and supporting documentation, MDEQ provided a 32-day public notice period that began January 16, 2026, and ended February 17, 2026. MDEQ held a public hearing during the evening of February 17th at the Ranger Conference Center on the Desoto Campus of Northwest Mississippi Community College to ensure meaningful public involvement for the community members to express their concern.

During the overall public notice period, approximately one hundred ninety-nine (199) separate parties submitted written comments expressing concern against MZX Tech on a multitude of issues. Moreover, at the public hearing, thirty-one (31) separate parties verbally expressed comments of concern against the proposed project. All comments received have been thoroughly examined by MDEQ staff. Accordingly, a “Response to Comments” document was prepared to address concerns, and as appropriate, revisions were made to the draft PSD Permit to Construct to update certain requirements. Permit Board members were provided a copy of updated draft PSD Permit to Construct as well as the supporting “Statement of Basis” that explain such revisions.

After a comprehensive review and consideration of the information presented within the application, the corresponding ambient air quality modeling report, and all comments received during the public notice period, MDEQ has concluded that the draft PSD Permit to Construct contains sufficient emission limitations, operational restrictions, and compliance assurance mechanisms to meet all applicable Mississippi and Federal environmental laws, regulations, and air quality standards.

After Mr. Whitlock finished speaking, Mr. Brent Mayo, a representative of MZX Tech spoke to the Board. Mr. Mayo stated: MZX is a subsidiary of xAI, which is an innovative AI company with a mission to advance discovery and better understand the universe. Through our technology products we are seeking to benefit folks all around the world as well as the United States Government. Although our impact is global, we are proud to be driving this powerful American technology forward right here from the Great State of Mississippi.

As we said to President Trump last week at the White House, we are committed to developing sustainable, self-generating power to support our AI efforts. This commitment reflects our focus on American innovation and values, helping us lead the global AI race. The permit in front of this Board today marks the first step of turning this important vision into reality.

I want to take a moment to give special thanks to the dedicated, hardworking staff of MDEQ. Throughout this permitting process, we have worked closely and transparently with MDEQ staff as well as the EPA. We’ve kept MDEQ informed of our actions every step of the way. We have maintained open discussions, hosted site visits, sought guidance as needed, and adjusted our application based on MDEQ’s and the EPA’s valuable input. We are truly grateful to work with such fine permitting agencies as MDEQ and the EPA in Atlanta.

The proposed PSD permit in front of the Board today not only meets all state and federal permitting regulations but goes above and beyond what is required by law. Our application

emphasizes the sustainable initiatives underlying all our operations. We have advanced emission controls on all our turbines to reduce environmental effects. We use this modern technology to adhere to stringent air quality standards to help maintain healthy environment for everyone. We have completed robust air modeling approved by MDEQ and the EPA. MDEQ and the EPA agree that not a single person around our facility will be exposed to unhealthy levels of air pollution. We also remain committed to complete ongoing monitoring, reporting, and compliance efforts to ensure that we always operate in accordance with the commitments in our application.

The permit is the cornerstone of developing our Southaven power facility to support our local Mississippi data center. This combined project marks the largest private investment in Mississippi's history—over \$20 billion in cutting-edge AI infrastructure.

Beyond this substantial investment, this project is providing real benefits to the public right now. We have already created thousands of well-paying jobs in construction, engineering, and operations that support local families and strengthen the regional economy. Completion of this project will position Mississippi as a hub for innovation, attracting talent and creating ongoing opportunities for advancement. Even more important than providing these substantial economic benefits, we are, and always will be, dedicated to being a good neighbor in the communities and environments where we operate. We've already supported vital public services like police and firefighters, along with important infrastructure projects that make an actual difference right here in Mississippi.

xAI believes in always doing what is right even when no one is looking. Approving this permit today will unlock the power needed for the next era of AI innovation for America while also securing lasting economic growth, job creation, and technological leadership for Mississippi. These positive impacts will uplift the communities we operate in as well as the great state of Mississippi for generation to come. Thank you for the opportunity to present our vision to you today. .

Following Mr. Mayo's comments, ten (10) individuals spoke in opposition to the proposed permit including Carol Mann, Shannon Sampsa, Nsombi Lambright-Haynes, Yolanda Daniel, Ramona Taylor Williams, Schenague Watson, KeShaun Pearson, Gordon Jackson, Jason Haley, and Krystal Martin. Comments included complaints about an increase in air pollution, noise from the turbines, a lack of transparency regarding the permitting process and local government communication, as well as little to no communication with residents from MZX Tech LLC.

Chair Brian Perry noted he would entertain a motion. Jennifer Wittman made a motion to enter a closed session to discuss entering an executive session. Les Herrington seconded. All approved. Les Herrington made motion to enter executive session due to prospective litigation on the permit. John Banks seconded. All approved. David Dockery made motion to exit executive session. John Banks seconded. All approved the motion to exit the executive session. Counsel, Anderson Thomas, noted upon the Board's return from executive session that the Board voted to enter executive session to discuss issues that could be a matter for prospective litigation.

Les Herrington asked a clarifying question from Mr. Whitlock, who indicated earlier that additional restrictions were added to the proposed permit due to public comments. Mr. Whitlock stated that federal rule KKKK of the air regulations was released when public comments started. There were comments from the EPA and the public regarding the updated rule, so the draft permit was amended to include the more stringent requirements as set forth in the updated rule KKKK.

Ryan Jones asked why this facility is not subject to the offset rule. Mr. Whitlock stated that the offset rule only applies to facilities in areas in non-attainment, but this area is in attainment, so the offset rule does not apply. Mr. Jones also asked, "would this facility be able to operate under state and federal guidelines?" Mr. Whitlock responded that, "Yes, under the draft permit they can comply."

The Chair stated he would entertain a motion. Les Herrington made a motion to approve, and John Banks seconded. All voted to approve the permit.

OTHER BUSINESS

Les Herrington announced his retirement from State service. Chair Brian Perry thanked him for his time serving on the Board and in state government.

CONFIRMATION OF THE NEXT REGULAR PERMIT BOARD MEETING

Acting Chair Brian Perry confirmed the next regular meeting of the Permit Board was scheduled for Tuesday, April 14, 2026.

MEETING ADJOURNED

There being no further business to come before the Permit Board, on motion by David Dockery and second by Les Herrington, the Permit Board voted to adjourn the meeting. Acting Chair Brian Perry then adjourned the meeting.

DATED at Jackson, Mississippi, this the 10th day of March 2026.

CHRIS WELLS
EXECUTIVE DIRECTOR

BRIAN PERRY
PERMIT BOARD CHAIR
